

No. 439 Bearinheart

No. 1 You have to try to control a bear and try to collect as many hearts as possible with him, in this open free world game, these hearts are spread all over the landscape, you have to locate them using your radar and get to the places where these hearts are

No. 2 You must overcome blockades and obstacles and eliminate enemy opponents who try to take your hearts away

No. 3 In each challenge, you have a set amount of time and quantity to collect the hearts and bring them back to your main headquarters. For each completed task in the challenge, you get an additional bear to help you collect more hearts. Make sure that you have the full amount of your heart display shortly before you hand in the hearts, otherwise you will not be given a new bear to help you collect the hearts in other places in the landscape. No. 4 You also have to be careful that your opponent does not snatch the hearts away from you with his bears beforehand and deliver them to his main headquarters in the set amount and time.

does

No. 5 While you are looking for hearts, you collect various weapon systems and try to use them to chase away or destroy the other bears or to shoot them with a weapon and its color so that the bear is converted to your side and then helps you collect the other hearts.

No. 6 Try to color the other bears that appear in your eyes with a different color using your color cannon and win them over to your team. Also collect more hearts than your other opponents and let new bears appear so that you can finally collect the specified amount of hearts with them in the team.

No. 7 Be careful and this is the important thing in the game that your opponents do not break into your headquarters or come and steal your hearts just before you hand them in and hand them over to your headquarters

No. 8 At the beginning, try to collect as many hearts as possible to activate several bears and then join in the hunt, either destroying or re-poling the opponent's other bears with your weapon to complete the hunt for the hearts for them. The more bears you color, the more chance you have to collect all the hearts in the given time and quantity.

No. 440 Critterfresh

No. 1 You control a critter through different directions and paths of the universe, you have to try to reach different planets with it and try to eat the people who are on them

No. 2 They hunt these people using a radar and try to locate them. The more people they eat, the better their critter becomes and they receive points. These points can be used to improve and optimize their critter.

No. 3 You must try to cleanse every planet you colonize, within your scope, of the people and eat them up.
sen

No. 4 You will receive a display where a bar shows you how many people you have to eat in order to unlock a new critter, as some people cannot be caught or eaten by a critter

No. 5 You have to find these people and eat them within a given time, otherwise you have to repeat the quest, which is always different on each planet

No. 6 The people hide in houses in buildings or in villages and cities, they have to locate them with their radar and try to eat them, if they have eaten enough people and the life indicator of the people decreases to a certain degree, they can leave this planet with their spaceship and go in search of the next one

No. 7 The more humans you eat, the more chances you have to unlock new critters and work with them to improve the hunt for humans

No. 8 You have to be careful not to completely exhaust your critter in the radar and not to bring it to a standstill, because every person or crowd of people is to be seen at a precise distance, you have to have collected enough kilometers in the real world to charge your critter with it in order to reach the routes to the people you are looking for

No. 9 Ultimately, you have to eat a given number of people on the different planets in a given time in order to unlock new critters for new levels and use them to improve the hunt for people

No. 10 Try to clean the planets and bring about the end of humanity, be careful not to get killed or caught and reach the number of kills of humans in a given time

No. 441 Firecolor -

You select an overview from various areas and categories, for example, comedy, action, romance, sci-fi, drama, music, crafts, sport, then you are given a character at random, you then use this character in a new type of beat 'em up game against an opponent randomly selected from the internet. If the random selection has been made, you are given a character from the various categories and areas mentioned above, with which you compete against another player in beat 'em up mode. So you have no idea which character you are playing, no matter how creative and combative you are, because the opponent doesn't know at random what kind of character he has to play against you. Since you don't know how to make so-called moves with the character, it is a good idea to look at the display board during the game and read how they work, use these moves and the fight will be easier for you. Please note, and this is the most important thing about the game, to win the fight, hit the illuminated vector points on the opponent's body to receive different points, as the game must end with a KO or a predetermined score, in addition, the game is timed and the clock is individually changed, sometimes it runs faster, sometimes slower, sometimes in normal mode.

No. 442 Jidibram

Dear Christmas tree, please implement the following idea in the future with the help of Santa Claus: make it possible to have singing Christmas balls played by the world's favorite musicians by making these balls available on the website.

Each ball should be able to reproduce an extraordinary sound and radiate happiness into the world. The extraordinary abilities of these balls should be apparent on oohletter-me.com. The function behind these Christmas balls is in the eyes of the observer and the Jidi alias the DJ cannot be missing in order to realize the sound option of these Christmas balls. The Jidi uses certain options of the oohletterme.com system as a sound desk to make Christmas even better for you.

No. 443 Emojitimemac

No. 1 You have to try to enter your time on Spotify or yt music from a scale or scroller, once you have set the first time set, a song appears which is played automatically, set a second step or time set and the third step after that, now Spotify and yt music try to play a song for you from the first set time set

No. 2 If you like the song, you can mark it with an emoji and give your opinion on it simultaneously after the song has finished. The second song will be linked and played according to the instrumental and the story you specified before. This is followed by the third step, which follows exactly the same pattern as mentioned above with the emoji rating system.

No. 3 Try to reach your music lesson by time and forget the boring time at work or at home and make the time clock you are in more relaxed with an individual playlist to make your time forgotten faster and to be in the flow

No. 444 Sendyouflowers

No. 1 You have a garden that looks incomplete, in this garden belong some valuable flowers that you try to place with your character to your best friend

No. 2 Try to visit your friend's garden and give him his flowers in a certain amount of time, according to your pedometer, which you build digitally from the real world

No. 3 You have to manage not to get caught, because the alarm systems are always on alert, try it best at night and with the help of your flashlight as a guide, to make your friend's requested and usable flowers disappear from his garden

No. 4 If you have got hold of the flower you wanted and were not caught, plant it in your garden and let it bloom, make sure that you position your alarm systems correctly, because your friend and counterpart will try to steal your flowers from you

No. 5 If you have finally planted the flowers that were required in your garden, you will receive points for this. With these points you can buy the optimal weather to let them bloom, because without the perfect match between the weather adversities these flowers cannot bloom to perfection.

No. 6 Your opponent is trying to do the same for himself, so be quicker and more cautious with the theft and try not to get caught

No. 7 Once you have completed your garden, you can choose a flower from the garden library as a bonus and send it home to your friend, whom you stole from in this game, as a real plant

No. 445 Dappes

No. 1 You have an mp3 player of the future, this contains a transcript button with which you can feed the instrumental beats, you choose your individual instrumental beat and simultaneously press the transcript button on your mp3 player, the mp3 player now plays soft words of the transcript that you downloaded from YouTube and mixes these words with the instrumental beat and hopefully lets you fall asleep better or get up better if you use it as an alarm function, good night or good morning

No. 446 LittleAlbert+

Using the Little Albert app, instead of putting the products back in the same places, this time you try to position the transcript of your favorite song in the right places. While you do this, make sure that you set traps for the burglars at the most important points where you place the pieces of the transcript, so that you don't change these positions. Your goal is to place the transcript in the villa in a certain time so that you put the entire song together correctly. If you have put the transcript 100 percent back in the right places and set enough traps against the transcript thieves, you will receive a new transcript for new positions in the villa. The correctly placed and correctly positioned transcript in the villa, if it was placed correctly, ultimately results in a new song of the song where it actually came from. This should make you think about possibly making a remix of it and generating a new hit from it. You should know that this remix will help you to scare away the transcript thieves if they try to post their new script, which is provided as a new task for them, to make them paranoid.

Don't forget to activate the remix that the app plays at the right time when all the thieves are in the villa. You will also receive points for correctly positioned new transcripts and can use them to buy new traps to catch or scare away the transcript thieves. Once you have completely positioned the required transcripts, you will receive a remix for each one that the app's AI will develop for you. Ultimately, you can place these remixes on streaming platforms and hope that they reach listeners.

No. 447 Pintscroll

You click on the picture of a woman that inspired you, then use the vector points to purchase any of the options shown that you would like to buy. Click on an option that you like and an options scroller will appear where you can select the year, day, and one of the categories, for example, drama, comedy, action, romance, sexy, beauty, etc.

You can then select the product from the products offered on the Internet and the product you have selected will appear under the image. Depending on the product you have found, you can now give an effect via voice that will add the image or the item of clothing you have found to the image that inspired you, after a selection of sounds, or add the word, for example, wow, sexy, nice, georgus, beautiful, crush, smash, etc. to the vector point that has appeared. You can then use these voice, word verbs and adjectives, which you can also click on in a list, to spontaneously put together the right dress or outfit on Pinterest using so-called links.

No. 448 Heavenly Magic

You go to a club with your friends in a team that is previously generated by the himmelszauber app. Based on the profile you entered, the app finds the right people to relax with for the weekend and makes them available to you as an offer. You choose complete strangers with whom you then meet in the himmelszauber club and spend the evening together. In the club you can then exchange ideas with the people and possibly make them your future friends.

The special thing about it is that the himmelszauber app compares your profile with faces from the Internet Explorer of the social media apps and links them up with each other in a way that suits you. If you have joined a team with the himmelszauber app, you meet in this club at the weekend and talk to each other in conversation at your first meeting. The club offers you areas where you can face each other in order to communicate with each other in conversation. You can also go to the dance floor with your team and try to find out which person and dance would suit you. The music is played by a DJ with Excalibur technology and gives you new inspiration. In the club, the light effects are brought by the guests themselves, which means that you have to buy a Moon Shine product on goodyby.com, which serves as a product for you with a light show by a Manican alias Moon men and your individual playlist as an mp3, which you have personally transferred to the moon men. This product is then called up by the DJ and can interact as a product with the DJ console, which means that the Moon men are integrated into the DJ console. After the DJ has called out the guest's name, the goodyby.com product is integrated into the DJ console, it plays the guest's music on the dance floor and at the same time the light show appears from the Moon men, which is then split and played on the dance floor. This way, guests can enjoy an individual evening with the interaction of the DJ.

The DJ calls up the registered names of the people who brought a Moon Men and implements the product in the DJ console and mixes the guests' individual playlists with his Excalibur console, thereby creating a new impulse on the dance floor. The guests may interact with the DJ and bring new impulses for the evening. As a reward for a good evening, the guests receive the DJ's recording and can then upload it to the himmelszauber app and expand the music library. Using the recordings in the app, they can then connect other people and invite them to a new evening that could be unforgettable.

No. 449 Yourinlove

No. 1 To get in touch with other singles, you need to have collected enough kilometers on your pedometer. The app shows you which people in the area on the radar have reached a certain pedometer amount in order to connect. For example, if you walk about 5500 steps, you will be shown people who have walked the same or approximately the same amount.

No. 2 After completing the steps, faces of singles who have collected as many steps as they did now appear on the radar

No. 3 Now you can click on the person that was shown and send them a short free message to get in touch with them

No. 4 You send the person or single who is now shown on the radar near you a letter, the letter consists of vector points, the person must now click on the vector points within a certain time, behind the vector points are short words that you have previously thought up to entice them to talk

No. 5 If the person you sent the letter with vector points - words to has pressed the illuminated vector points in the correct order, they will receive the information you sent them, plus they will receive small hearts for each vector point pressed correctly in the correct order

No. 6 The person now has the opportunity to collect their collected hearts if they stay in contact with them for a longer period of time and have a long conversation, and to collect more hearts if the conversation continues

No. 7 If the person has collected enough hearts from the conversation, or from the letters of the vector points that serve as a conversation starter in a new conversation, they can exchange these hearts for great products in the app shop, for example a sticker, flowers, a song, or an extraordinary present that they can then send to the address of their loved one.

No. 8 So they contact their loved one every day with a new letter that they met in the app, in order to give her the opportunity to collect these hearts, which are collected by pressing on the letter and its vector point in the correct order

No. 9 Finally, you have sent an alphabet of letters and given your loved one plenty of hearts, now she can, if she has fallen in love with you, send you a great present from the App Shop.

No. 10 You only have one alphabet per person, if you have used up this, you have to buy a new one, for a few euros you can get a new alphabet to send your loved one new letters so that she can get in touch with them again and in a way, collect new hearts

No. 11 Again, as a man you can also collect hearts when you receive letters from the women and after collecting hearts, you can exchange them for a present in the app shop and send it to your loved one, whom you met through the pedometer

No. 450 Nintendo Snowall

You have a Nintendo with a projector, which you can project onto walls and use the handheld to stream the projections back onto the wall where the projection is taking place. Certain games have to be played with the projector in order to establish a connection to the handheld. For example, if you complete a level in a jump and run game, you get symbols and icons streamed onto your handheld that you need for playing on the go. For example, you collect stars, these stars are then transferred to your handheld and can be exchanged for new items in the shop.

Some levels must be played with the projector to ensure that the level is streamed back to the handheld in order to collect important data that is essential for the game.

For example, you collect stars and these are transferred to your handheld in real time, which you can then use to reach certain levels with the handheld that are not shown on the normal TV.

The projection also offers the option of transferring and streaming things from the handheld to the projection. For example, you can transfer your collected Pokémon to the projection and then integrate them into the game. This only works if you connect the handheld to the projector and stream the Pokémon onto it. If you hold the handheld to the projection, you can see new things that can interact with the game. For example, the wall projects Pokémon which can then be captured by the handheld lens. This way you can locate certain rare Pokémon from the game using the projector projection and catch and capture them using the handheld's rear lens. Meet in a large room and project your game onto a large screen that interacts with the handheld and its back projection lens. You can stream things onto the projection with the handheld and project things that are shown back onto the handheld.

You hold the handheld up to the projection and you see things that you didn't have before, and you can then project objects onto them. Collect objects from the projection wall with the handheld and use them for your main console or for your portable game. For example, you can use the handheld to record the projected objects on the wall and then edit them on the handheld. In some games you have to record certain objects and items from the projected wall in order to continue playing with these objects in normal mode. You can start the projection at various points and locations and make things visible from certain points that you need for the game in normal mode in order to continue the game.

For example, you meet up at your friend's house and project your Pokémon game onto his wall. The location detection recognizes the location and provides new ways to catch new Pokémon in the game. When you catch Pokémon at your new location, you can find and collect new Pokémon that you cannot find at home. So, when you are out and about, you can use your main console in different houses, if you have the opportunity to be invited, to stream new Pokémon from the projected world from the walls where they are displayed to your handheld console or catch them with the projection effect.

New Pokémon will be found in different places in the world and can be picked up from the walls of these locations. Pokémon can also be hidden at different locations for players to search for them. The game remembers the location where you left your Pokémon for other players to find. This means that you can only find these Pokémon in certain places. Once you have collected enough Pokémon in the world and picked them up from the projected walls on your hand console or streamed them back, you can have them compete against each other at a festival after you have trained them on a giant screen with your hand console.

No. 451 Gogliclothes

You go to YouTube and activate the gogliclothes plug in the options. Now you see vector points on the artists' clothes in the music videos. Click on one of the vector points and you will then see the suggested T-shirt under the music video that you clicked on before and you will be redirected to the sellers who want to sell it. You can pause the video and click on the next vector points that appear, for example this time a pair of trousers and the matching hat of the artist. You can click on a maximum of 3 vector points at the same time and select 3 different options under the video that could lead you to the right piece of clothing. Choose your sellers and get the star's outfits for an unbeatable price in the shops shown in your area. Have a good eye and use the vector points to catch your goal of finding your future clothing items in your area and ultimately getting them. The providers who offer these items of clothing receive money from Google for the options to buy the clothes from them. It is also possible to put together a complete outfit and save it as an avatar in the plugin option. This avatar can then be viewed by touching it with the collected vector points of the artists from music videos and clicked on the places you have put together to find out where you can buy these outfits at a good price.

No. 452 Steuerfux

No. 1 You have to try to control a character called Steuerfux, who tries to collect as many coins as possible in the game

No. 2 The game is a jump and run game, in 2D style, special about it is that you can control the fox in different colors, the color of the fox changes as soon as you meet enemies and then through the color change you gain special abilities to destroy the enemies or to avoid them

No. 3 You must try to complete a certain distance and collect a certain number of coins in a given time to complete the level

No. 4 If you encounter enemies, switch the color of the control fox to the appropriate enemies to stop them or jump past them

No. 5 You also have to collect predefined letters to activate your specialist skills, without this switch of the fox's colors you cannot destroy the enemies you want to stop or even get past them

No. 6 Try to give your character enough power, this happens when you charge your digital pedometer with real, walked steps and transfer this to the power display of the control fox

No. 7 Ultimately, you have to collect a certain number of coins at a certain time and climb through the jump and run track with all the barriers and passages and eliminate the nasty enemies that get in your way

No. 8 If you have completed the course and collected enough coins, you can now exchange them in the game's upgrade shop for weapon systems for the next level in order to gain an advantage over the opponents in the new level.

No. 9 At the end of each level you will be asked important questions about your tax return, so as you complete the levels you will also learn how to make a tax return yourself

No. 10 For example, if you have completed the game and successfully finished it, you will receive points. If you reach the required number of points at the end, you will receive the Steuerfux tax return program, provided free of charge as a download link.

No. 453 Aroundmeboy

No. 1 You are in a very large circle, this circle rotates on its own axis and has an opening or a gate open, where you have to get out in order to switch to the next circle, which is smaller than the previous circle. No. 2 You also have to avoid the vector points that are in the circle and try to get through the opening of the circle and through the next opening of the next circle as quickly as possible. No. 3 The circles rotate in an individual rhythm and are also closed by chance, so you have to be careful not to get hit by the moving vector points, otherwise you will receive deductions from your life energy. No. 4 The aim is to get from the huge circle to the large, then to the medium and smaller circle as soon as the openings appear. No. 5 You also have other players who are trying the same thing and are shooting at you with weapons systems to prevent you from getting through the opening of the circle to the next circle. No. 6 So try to avoid vector points and to avoid the enemy projectiles. No. 7 Finally, you can also use your weapon systems to block the other players and eliminate them so that you cannot get through the opening to the next circle. No. 8 The aim is to get to the last circle and be the last surviving player in the game at the end of the game.

No. 454 Rearranged

No. 1 You must try to make a date in this app with a person you have summoned using a face carousel, you must upload your face to the app

No. 2 The app integrates the face into a carousel and, after rotation, simultaneously with another carousel, if it has stopped, tries to randomly bring the first face into a connection with the second face of the other carousel

No. 3 If the two carousels have stopped, you can swipe your face onto the other and hope that you get a match, through the faces Ki and by chance there can be a match between the two faces

No. 4 If there is a match, you now have the opportunity to write to the person and contact them

No. 5 If the person accepts their voice or text message, a connection is now established and the conversation between the faces from the carousels leads

No. 6 Now try to arrange a meeting on a topic selected by the app from the various categories of the news world

No. 7 If you meet up on the News Channel and you can answer the questions about the news posed by the app, you will receive points for this and can use the points you collect to unlock new appointments where you can meet up to discuss new information.

No. 8 Share your experiences with other faces from the carousel by taking notes on the conversations held before

No. 9 Rotate the carousel, reconnect with another participant and share your notes with him via stream

No. 10 If, for example, you have had several conversations and made notes, you can also set up a group where these things are stored in a kind of library, which new users can only access if the faces match each other and they can provide new stuff to upgrade the library. Let's roll

No. 455 Staystaystay

No. 1 They have to try to reach a building that is built very high and is very far away from each other, they stand on top of the building and try to draw a slagline and walk on the slagline to reach the other building.

No. 2 Throw the slagline at the corner of the building you want to climb, which you have chosen and which is near you

No. 3 You have to transport certain things to the other side of the building, in this case it is sweets, be careful not to get hit by vector points and become unbalanced

No. 4 Carry the correct combinations of sweets to the other side of the building and fill them into a large cupboard, of course in the correct order and combination

No. 5 Once you have filled the cupboard, wait for the gong that signals the start for the children who are waiting at the bottom of the building and want to get the sweets, wait until the children take the sweets away and leave the building again, for this you will receive points

No. 6 Collect more points and buy new destinations in the world where you can climb other buildings and try to place the sweets in the right places

No. 7 For each candy transported from one building to the next, you will receive additional points that you need to unlock the other destinations

No. 8 Once you have visited some destinations in the world and climbed buildings, you can compete against another player in Battle Mode and start a slagline challenge between your fellow players

No. 9 Battle against other Slagline players around the world and become the slagline champion

No. 456 Mumblingsplash

No. 1 You record the voice of a singer, the frequency is assigned to vector point units, which means that

You can think of high tones, middle tones, low tones, colored vector points set.

No. 2 Now link the colored high tones, middle with middle, and low with low, through the vector points or switch the whole thing with high and low or middle and high or middle and low tones, through the colored vector points

No. 3 Now you get a new tone from it, either in a crooked position or suitable for example for a new beginning to start a beat

No. 4 Alternatively, select and insert Instrumental beat and bits in the places of the colored vector points to find out if they could fit together

No. 5 If you have used the alternative, you can check whether the sound of the instrumental beats matches the high, middle or low tone

No. 6 For comparison, combine the two options mentioned here and look at the result in a newly generated sound layer.

No. 457 Bratansplash

No. 1 In splashbratan you try to control 2 characters at the same time, whose task is to get to the top of the level with one of them, one character puts the jump floor on and the other jumps on it and then the other then gets on his back as soon as both step on the jump floor and can jump one level up

No. 2 Try to collect letters in the air while you are doing the jump and avoid the vector points that are thrown at you or are heading towards you

No. 3 You must try to build jump floors with both characters simultaneously and in real time, as described above, in order to get higher and higher in the level

No. 4 The game runs for a certain time and a certain height of the level must be reached as a goal

No. 5 For the letters collected in the air, you get additional jump floors, which you start with a specific number that can quickly run out, alternatively you can also take the collected letters as jump floors and wind your way up to the goal

No. 6 With the characters sitting on top of each other after each jump, try to position the appropriate jump floor so that they can avoid the fleeing vector points and collect the letters at the same time

No. 7 Finally, as described, a certain height must be climbed in a certain time in order to reach the next level

No. 8 Splash the set time and height with the Bratans and play your way into the respective levels until you finally have to play the game backwards at the end of the game, so no longer climb up with the jump floors, but climb down with the same goal and the same principle as when climbing up

No. 458 Muskflatfan

No.1 In this game, the fanbase is one that follows a superstar and desires him very much.

No.2 Try to show this fan base, which consists of numerous fans, that you

are the biggest fan No.3 Since you are not accepted

by the fan base because you gave the superstar an impossible and unattainable world record, you have to invent a music machine so that the superstar songwriter can create her new beats on it. Change your flow to the future

No. 4 The idea behind this music machine is that it should be creative and at the same time be a working tool for creating beats

No. 5 The music machine works like this, you have a music alphabet and you put this on the text of the musician, that is, you like a word in the text, so you put the letters of the music alphabet on the word, they should be as the word pretends to be

No. 6 For example, the word Dream is replaced in the text with the music letters from your alphabet, that is, the letter D is drawn on the D of the word, your letter has vector points from which the letter is formed using media design and illustration techniques.

No. 7 There can be 6 or 8 vector points in the letter, each vector point has instrumental tools built in, which you can then control by touching or by pressing or dragging back and forth

No. 9 Touch the instrumental tool e.g. in the first vector point and you will get a sound played, press on the other vector points, you will create an individual instrumental sound that relates exactly to the word Dream, so you can give each word a

certain sound that may release a happy, cheerful, fun need and relaxation satisfaction signal in your subconscious

No. 10 When you have found some words in the text that you like or a passage that you have written over with the letters of the music alphabet, play the song from the beginning and test whether you have optimized it or not.

No. 11 Test this volume on the subjects and on certain selected people.

If you receive positive feedback, you can now combine the song with these music alphabet letters and improve.

No. 12 Be creative and use the vector points diagonally, linearly and pull them apart or towards each other with touch after you have placed an instrument in the given vector points No. 13 Exchange your music alphabet letters with other users in the fan base and optimize the songs of your superstar songwriter and give the songs your individual sound note

No. 459 Brainbuck

No. 1 You have a large brain as a view, in this brain there is a beetle hiding, which you try to maneuver out of the brain, since the brain is built like a labyrinth, you have to try to pull the beetle out of the hiding place through the brain strands with the correct path of the vector points that you place in the brain.

No. 2 Place the colored vector points in the brain and connect the paths together to form a path link

No. 3 Once you have set the paths according to your opinion, press the brain and hope that the beetle comes out of its hiding place and decides to find its way out according to the paths you have set

No. 4 You have a certain amount of time to set the paths and place the colored vector points. If you run out of time, you can no longer use or change these paths in the brain.

No. 5 After starting, the beetle starts its way by pressing the brain, through the paths and vector points you have set, which it then collects, for this or by collecting the vector points, you receive points

No. 6 After a certain time, the beetle disappears to another place and hides in the brain again

No. 7 You have to remember the location, and from there, put the new colored vector points and their paths to each other

No. 8 If the beetle comes out of its hiding place again and continues on the path you set that leads to the goal - to lead it outside, you pass the first level and can try to maneuver two beetles out of the brain in the next level

No. 9 You have 3 moves per game in the brain until the next checkpoint, where the beetle stops, which can be set with the colored vector points and their paths connections.
nen

No. 10 Maneuver the beetle in the given time and the correct most plausible way out, so you finish the level successfully

No. 11 In the next level, you have to maneuver two beetles outside and in the following level three and so on

No. 12 Collect points by picking up the vector points through the beetle and try to reach the high score

No. 13 In the memory battle mode you meet other Internet users and try to win against them according to this game principle and ultimately be the first to get the beetle out of the brain

No. 460 Bababurger

No. 1 You create your own Baba citizen using emojis in the app, register with your personal data (height, age, weight, eye color, hair color) and your face in the application

No. 2 Your face is shown at the bottom or in the middle of the display, now you enter the vegetables, ingredients, spices, etc. side dishes that belong in a burger, using emojis that you can choose from a circle scroller and that reflect what has just been described, into the face at the bottom or in the middle of the display

No. 3 Once you have chosen the right emojis, drag the things you have mentioned onto your face using emojis, as described above. The face will create an effect and show you with a facial expression whether these ingredients suit you by displaying a sound or a facial distortion.

No. 4 You will be shown recommendations that could match the personal data you have provided, so you can create a foretaste of your special Baba Bürger, created with emojis, based on the facial expression

No. 5 Once you have put together your Baba Bürger, you can save the procedure and create an account, enter your contact details and finally click on order, which can be paid via Swip (Paypal), or order it to your home and pay the bill live on site

No. 6 Exchange your creations with other users in the Baba Bürger app by dragging and dropping your profile with your selection of emojis onto other faces that have registered in the app. The other faces just have to accept it and they will know about their Bürger selection. No. 7 Finally, they meet up with their friends in the Baba Bürger restaurant, where they can choose a surface as a control element with the functions described above and put their Baba Bürger together on the spot. They can also take the finished Bürger items into their own hands and put them together themselves, live on site.

No. 461 *Danceonchrome*

No. 1 You have a dance mat, on this dance mat the song is attempted to be danced in the correct order and rhythm using the individual letters that are equipped with vector points on it.

No. 2 Individual consecutive letters of the song appear, they must move their feet onto the first letter and its vector points and follow the order according to the scoreboard

No. 3 For each correct press on the vector point, you receive points. If you have successfully danced the first letter, the next one appears on the digital dance mat. You must now dance to this one and collect points.

No. 4 Your goal is to dance the whole song or a paragraph of the song, for this you get points, the audience chooses the appropriate paragraph of the song for you and you then dance on the digital dance mat to the vector points of the illuminated letters in the correct order

No. 5 In Battle Mode, you can simultaneously compete in real time against another player who is firing up the dance mat on the other side with his dance moves

No. 6 As a special feature, the vector points also serve as an instrumental beat organ. Each touch with the foot on the vector point, depending on how strong and with what pressure, produces an instrumental sound. This instrumental sound can then be integrated into the song as an addition in real time at the end of the paragraph of the song.

No. 462 Cablecat

You must try to turn a path made up of connecting different colored vector points into a ball of wool. You must build layer upon layer and connect these paths diagonally and vertically. This is done with the magic wand, which you can use to create a connection between the paths of the glowing vector points. Once you have done this and created the ball of wool, the product is now usable. Activate the glowing vector points using your smartphone and let the ball of wool glow. Now throw the ball of wool to your cat and press the different colors on the smartphone display, and wait to see what the cat does with it. The cat's goal is to deactivate the glowing vector points with its paw and thus remove the light from the glowing ball of wool. You see the colors that are deactivated on the display in real time. Now a fellow player switches on on the display who tries to deactivate his colored vector points in real time. The first person who manages to deactivate the colored, glowing vector points with his cat wins the game. You can also play the game randomly; a specific order of deactivating the colored, glowing vector points must be followed. You receive points from the app for the correct order of deactivating the colored, glowing vector points. The person who reaches the specified score also wins the game. Use the game to train your cat to see the colored points and become a cablecat master player with him on the Internet in battle mode against other participants.

No. 463 Cablecat+

On this website you can try to transfer the following multimedia media to your hardware device, films, music, programs, live streams, news information, etc.

.Cablecat+ works as follows: You upload all your raw data to the cablecat+ servers. While you are uploading, people who are logged on to the website can download your upload in real time. As soon as you have finished uploading and the stream has ended, you can only access the data that you had downloaded. You will find what you are looking for in channels and can search for media there to get new multimedia data. The channels work on the basis of social media networks. Cablecat+ is connected to the database of social media sites and can access certain people who can be asked to upload or upload new raw data to the cablecat+ servers. The requests are encrypted 3 to 3 and are secured using Swip technology. If you have made a few requests and informed users that you can upload your data to new channels, the channels can be visited at will in order to use the search impact impulse engine (ISS) to search through the data in the channels and browse for useful information in the media world.

Everyone who registers for a channel must meet certain criteria, for example, facial adornment with the specification of their authorization, email address and the screenshot of their respective ID card. If you have met the criteria shown here, you can visit a channel and search for the raw data of the users from the social media users and their data that has been updated and uploaded. You can only start the download; while an upload is taking place in real time, the stream is interrupted and can be moved and activated at a later time. Use the scroller timest generator to search for categories and special data in the channels of the raw data that is made available by the social media upload users. The vector points in the channels are intended for specifying checkpoints and offer collective packages from users that have been made available free of charge; the content is a complete summary of the data you are looking for and can be viewed before downloading. Start your search at cablecat+ for data that you have never seen before or that you would like to remember.

No. 464 Göndirgeld

You have the option of borrowing small amounts of money on this site, this is done via Paypal, which means that you are provided with the money by credit institutions, the amounts start from an amount of 5, 10, 20, 50, 100 euros and can be requested through Paypal. You must transfer the money back via Paypal within 30 days, otherwise you will have to pay 13% interest on a certain amount. Log in with your Paypal account and pass the facial adornment and ID check in order to register on the website for these services.

No. 465 Thewatcher

No. 1 You are observing people moving around in the city from a great distance. Above each person and above the person's head, a letter with colored vector points appears. Try to aim at the sequence of the vector points with a laser and use the laser beam to spool an addition, subtraction, division, multiplication task into the vector point.

No. 2 Once you have done that, the person activates himself and tries to solve this task while walking.

No. 3 If he has solved the task and you can still see him through the scope, you can record this solution again using the laser.
men

No. 4 Write down the results, these are math problems that include numbers from 1 to 49

No. 5 Transfer these results to your lottery ticket

No. 6 Choose from possible locations where there are several people and use your brain to find the next lottery jackpot, with the results that people have solved and transfer these numbers to your personal lottery ticket

No. 466 *Diamondswine*

No. 1 You have to try to get diamonds with a pig, this happens as follows and runs like this

No. 2 Try to control a pig in a certain time using a turn-based strategy process to bring it to the diamonds

No. 3 You must try to follow a path made up of barriers and passages, they have the following, for example, functions that the pig has, jumping, running fast, ducking, pushing, pulling, hiding, shooting, etc.

No. 4 The path consists of vector points that suddenly appear on the map and quickly disappear again. Remember the position of the vector points and set the path so that the pig runs onto the path. There may be other points on the path.

Enemies and barriers and passages that you must overcome, use your special skills as described above

No. 5 If you have overcome these difficulties, you have reached the goal where there is a pile of diamonds, bring the pile back to your headquarters to get a new pig, in order to control several at the same time in the next level in order to ultimately get more diamonds

No. 467 Seeyouinthedark

You have the following task to complete in this game: you have to try to use a flashlight to illuminate things in a room. The flashlight shines letter views and colored vector points on the things. Use it to target things that you haven't seen before. The flashlight illuminates these things and now these things are made visible in the room. The trick is that it is your own room at home. The flashlight records your entire room and converts the products and the room into a digital one. Connect the flashlight to your TV and look at the things that have been virtualized and added to your digital room. Turn your room with the products that are there into a showroom and start a conversation to offer things with other showrooms and their integrated products in a swap deal. Choose a showroom from the circle of faces, grab the things you would like to have and arrange a swap deal with your products. If a digital exchange transaction takes place, you send and package the goods and send them to the seeyouinthedark user at his or her address.

No. 468 Dziencheck

You have to use your individual micro Alf headphones or so-called ear buds to communicate with your inner self while you are out and about, at work, in your free time, in chill-out mode, etc., and speak it into the microphone of the ear buds or headphones. This is all recorded and saved in the memory of the micro Alf ear buds. Once you have talked to your inner self on Monday and the days of the week and recorded and saved everything, upload it to the Dziencheck.pl app at the end of the week. The app now uses your attention and your recording with the ChatGPT technology and filters the voice message of the entire week into a text block, which is displayed in a structured manner as text with paragraphs in the Dziencheck.pl app. Now use the text with the Necronomicon app, see App Gallery, and refine your text block with new information or filter the text to your advantage. Then save it in the Dziencheck.pl app and allow Dzien-check.pl to ask you certain questions about your text modules.

Answer these individual questions and wait for the evaluation, which is shown to you in a needs vector point scale. You can see from the scale afterwards and draw a conclusion from it to make your new week better and thereby optimize it and better into the next week.

to start.

No. 469 Destroyilha

No. 1 You must try to destroy the cities of the world with a large selection of dinosaurs.

No. 2 You choose a dinosaur from the selection and have to find buildings that are on the radar within a certain time and destroy them to the point where you can collect a leftover letter after the building is destroyed

No. 3 You have to put together a given word on the display board, which is being searched for, from the letters found

No. 4 Try to locate the buildings to collect the required letter

No. 5 The game is timed, you have to put the word together in the given time, otherwise the level is lost

No. 6 You collect special abilities in search of the letters, items to destroy buildings , to use the skills to achieve the special

No. 7 The radar shows you a possible direction where these letters that are in the buildings are

No. 8 Be careful not to destroy anything, but rather, follow the radar that will help you find the letters

No. 9 Control several dinosaurs in turn and use the different dinosaurs, their special skills and achievements No. 10 If, for example, you have found the letters and put the

word you are looking for together in the right order and managed to do it in the given time, then you win the game No. 11 Battle against other players in

multiplayer mode and compete against each other, may the better dinosaur that can be switched in turn

win

No. 470 Ramalamadingdong

No. 1 You have to try to control a llama called DingDong, you control the llama in a prairie, in this prairie you have to find items and bring them back to the main headquarters

No. 2 The items contain time points that vary, some only give 1 second, some 3 seconds and so on

No. 3 You must try to collect time and free other Lammass on the prairie that have been captured by your enemies

No. 4 The radar shows you approximately the distance to the lam-mas that are in captivity

No. 5 You must collect time and use this time to free the La-mas

No. 6 The Lamma you control has special properties and is heavily armed to prevent the enemies you are trying to fight from freeing the captured Lammass

No. 7 Ultimately, you must free the Lammass or one Lamma per round to advance to the next level

No. 8 The controlled Lamma uses its ability to destroy the opponents, it can jump on them, spit on them, or overrun them

No. 9 Finally, when you have freed a Lamma, it must be brought back to the main headquarters, for this you will receive points, try to get as many points as possible to unlock the next level

No. 471 Grammynator

No. 1 You must try to use the Grammy Award as a music machine, it works like this, the award is the mouthpiece for the instrumental sounds that are connected together with a vector point hardware

No. 2 You have letters on the hardware surface and then use them to extract sounds, this works when you put vector points on the letters, each vector point has its own sound, such as violin, double bass, piano, guitar, flute and many other instruments

No. 3 You must now try to press the vector point sensors at the right time with soft, medium, hard touch and wait to see if a sound can be created that matches the beat

No. 4 The Grammy now plays the optimized song, touch the letters you have chosen on the paragraphs and song passages of your favorite song and create an individual impression and sound

No. 5 Try listening to your ear and amplifying the high and low tones with the Vectorpunkt Instrumentals

No. 6 Use the Grammy's recording function and record your optimized song live

No. 7 Finally, you get a remix mixed with the Grammy Sound System and you give the song an individual touch

No. 472 Chromeandpaint

No. 1 You have to control a character called Chrome, who has a color palette and a brush, you have to use Chrome to place various graffiti on given buildings and paint them with your brush

No. 2 Try to place as many graphics as possible in the free spaces of the buildings before the police catch them and capture them

No. 3 You have to use the radar to find the free spaces, you can get to the certain place on foot, by scooter, rollerblade, or by skateboard or mountain bike, you have to win the vehicle first by getting points for the painted graffiti

No. 4 Add vector points to each graffiti, these are important for the other players, because they are playing in massive multiplayer this game, the vector points set are used to pick up the graffiti with a flashlight and place it in another place using the flashlight to repaint it

No. 5 Try to place the given graphics on the required buildings and do not get caught by the police

No. 6 Also try to capture so-called painted graffiti with the displayed vector points and your flashlight in order to collect them and place them in other places in the open world

No. 7 Finally, you have to collect points, for every graffiti you place, you get points that you can use in a shop against vehicles, these can only be used for a limited time, so collect enough time items in the open world to continue using them to get to impossible places in the city or village

No. 8 If you have earned a vehicle and were able to place your graffiti, which was specified, in the city or village, including the vector points for the other players that you had left behind, you must now also smear the main police headquarters in order to earn special points to unlock new places and locations on the radar.

No. 9 In addition, they must photograph selected projects and their graffiti from other players and then place these graphics in certain places in order to get special points

No. 10 For the special points you can buy a new outfit to get to the police headquarters and past the police without being recognized

No. 11 Get your outfits and vehicle and try to paint the police headquarters with graffiti, use the time you are given and don't get caught

No. 12 Be careful and careful when you do things and paint the police headquarters. If you have met the requirement to place graffiti there and paint it, you will receive radar points to make new police headquarters visible on the radar. You will also receive new routes and locations on the radar that were not visible before.

No. 13 Exchange them with other players and form a group with which you can place the graphics together in the future

No. 473 Gotochurch

No. 1 You must try to find possessed souls and the spirit of people in the world and bring them to the church so that they can be healed, the game takes place at night and you must find the people who have a possessed soul and a spirit

No. 2 In the best manner and 3rd person action they run through places and locations of the first selected city and try to reach and find the infected people through their radar

No. 3 Once you have found some, go to them and open your conversion book, in this book there are psalms that you previously collected in the open world

No. 4 Read these psalms through the microphone and convert the souls and spiritless people with the hope of transforming them back, every person must be converted with a certain psalm, you can see this by the bright color of the person

No. 5 Your goal is to stun the human and bring him on the way to your own self-created church, this church is guarded by alarm systems and barriers that you have set before the game

No. 6 You can lead up to 3 people back to the church at the same time, be careful on the way that your opponents do not try to stop you, so choose another path or fight these opponents with the weapons you found in the game

No. 7 Collect points in time along the way to keep people's conversion level stable

No. 8 Once you have made it to the church, you will receive points that you can redeem for new items to expand your weapon arsenal

No. 9 Ultimately, you have to convert a number of people in a given time and lead them safely back to your main headquarters, the church you built yourself, where the people will be healed and serve as soldiers if it comes to that, when several groups of the enemy set out to attack them.

No. 10 These healed people each have a special ability to push back the enemy when attacking, use the right positions and place your soldiers in the right places around and in the church, because the enemy's attack can happen sooner than you think possible

No. 11 So they have to convert and find enough people and bring them to the church to convert them so that they can protect this place while they are looking to find other soulless and spiritless people to ultimately bring them to the church to be transformed into soldiers

No. 12 Be diligent and quick in your search for the soulless and spiritless persons, collect new psalms and convert them in the right situation and lead them back to the church

No. 13 You get points for finding and transforming these people and for defending your church, you have to score a certain number of points to get into a new challenge, so be ready for the onslaught of the enemies and their forces

No. 474 Bluebirds

No. 1 You have to try to fly a bird out of several shapes, such as a circle, rectangle, triangle, square or any other shape in which the bird is located

No. 2 You control the bird in the form, which rotates individually around its own axis, either forward, backward or in other directions

No. 3 In the shapes there are letters with vector points that you have to collect in order to be able to open the gate from the shape. For each vector point that you have collected in the correct order with the bird, you get time points, 1 second per vector point.

No. 4 You must also put together the correct word in the order to open a second gate to fly out with the bird

No. 5 Each new form that you fly out of becomes smaller or medium or larger, there are always 3 forms nearby that you can fly out into when the gate from the first form is opened. No. 6 In the forms there

are enemies that you have to avoid or destroy, the bird can attack and crush or destroy the enemies using various means, it can freeze them, fire them away, burst them, let them dodge

No. 7 Try to collect the vector points and their letters in the correct order to open the gate for the next shapes that rotate around their shape

No. 8 If you have managed it, then try to get through the opening to the next form, because if you fly through the opened gate, the other gate of the other form will automatically open, where you can get through

No. 9 In each form, try to bring all birds to the next form. For every bird shot down by the opponent, they lose one life, i.e. one bird.

No. 10 Try to get at least one bird through to the last shape to pass the level and move on to the next one

No. 475 Leizos

No. 1 You must try to maneuver an egg on the edge of a circle and try to maneuver it around the entire circumference of the circle, as in Monkey Ball, the egg must not fall down, as there are no barriers on the circle that can stop the egg from falling down. No. 2 Try to collect colored and bright vector points on the way

around the edge, these must be collected in the correct order, otherwise there will be time deductions, as the game runs for a certain time.

No. 3 When you have collected all the colored and glowing vector points, you can jump from the circle to the next edge of the next circle and try to complete the circle at the edge.

No. 4 The other circles are either next to each other or underneath or above them, which you have to jump onto. No. 5 Once you have jumped onto the next circle after collecting the vector points, you can try again to collect new vector points and try to go around the edge of the circle.

No. 6 Try to create the given circle shapes to get to the next level

No. 7 Pay attention to the time and the recording of the vector points, there are points for this and of course you must not fall off the edge when circling the circle

No. 476 Bugadi

No. 1 You must try to control a character named budagi, your goal is to return and complete the complete vocal notes taken from the text. No. 2 Catch the vocal notes in the air and try to put them into the timeline of the song at the bottom of the display.

No. 3 You have to catch the notes in the air and try to assign them to the song

No. 4 Fly around in the air with budagi and collect the singing notes and insert them into the blank fields of the piece of music at the bottom

No. 5 Watch for falling vector points shot at you from above, left, right, vertically and diagonally

No. 6 Insert the captured vocal notes into the missing fields of the piece of music, when you have finished a passage, press the play button and wait to see if you have placed all the vocal notes correctly, if this is the case, the vector points will disappear from the display and you will have the opportunity to complete the second passage of the song with the vocal notes

No. 7 Pay attention to the flying letters, in which missing special vocal notes can be hidden, so you have to bring the vector points to the letters that you see in the air in order to open the letter in the air, behind which there is a special vocal note, which you then have to put in the special blank field of the timeline at the bottom of the display. No. 8 Finally, you have to correctly complete the entire song with the vocal notes in order to finally be able to download it for free.

No. 477 Brainlikeadonat

No. 1 You have to try to assign a brain and its vector points to the ingredients of a donut, this is done by touch and drag and drop, pull out the ingredients you like from a list of ingredients and drag them onto the vector points of the brain, the brain realizes the ingredients and, when you have dragged the ingredients of the donut onto the vector points, gives you a taste of the donut and shows you a visual representation of your creation

No. 2 The vector points serve as synapses and give feedback as to whether these ingredients go well together, so pay attention to which ingredients you take from the emoji list and drag and drop onto the vector point synapses, you will receive feedback as to whether these ingredients could go together and a preview image of your own created donut will be shown to you. No. 3 Once you have put together your donuts and your brain has helped you to link the right ingredients together, you can

look at the donuts in 3D and finally order them and have them delivered to your home using the PayPal payment system.

No. 478 Battermen

No. 1 You control the batterman, he tries to hit target objects in the air with his various baseball bats that he carries on his back and the balls that serve as vector points

No. 2 You control the battermen from the left to the right edge of the screen and from the right to the left edge of the screen, vector points fall down on him, these serve as balls or ammunition to hit the enemy target objects

No. 3 You must use the club in the same color as the vector point you use as a ball in order to hit the target object that is also in the same color

No. 4 There are objects in the air that have different colors, select the club and hit the vector point with the same color on the target object that has the same color

No. 5 For every mistake and failed attempt, you will receive time deductions, the game is timed, for each successfully hit object you receive time plus points depending on the size and shape, try to keep your time account always positive, because if you go into the minus, more objects will come your way that you have to destroy

No. 6 The Battermen can be played with an additional player, i.e. in multiplayer, this helps you to use the various possibilities to hit and destroy the various objects

No. 7 Finally, you have to collect a certain number of time points to get to the next level after completion, the destruction of the objects

No. 8 If, for example, you have passed the standard levels in 2D, the game switches to a 3D view and you must now try to target the colored objects in 360 degree mode and hit them with the colored vector points and the matching color of the racket you have selected.

No. 9 In 3D mode you can control the battermen in all directions, whether, up, left, right, down, own axis and so on, depending on what directions offer for a free space, because in 3D mode there are passages and barriers in the game that prevent you from capturing the objects

No. 10 Try to score enough points by shooting the objects to reach the specified number so that you can move on to the next level, the game switches from level to level from 2D to 3D mode and from 3D mode to 2D mode, this is intended to increase the player's reaction and improve the gameplay

No. 479 24mohours

No. 1 You have to try to get a character to solve a case in a game time of 24 hours, they have integrated the calculation of the times in real time in this game, which means that the weather conditions and the real time of life are synchronized with the game

No. 2 You are given a task, in this case, the liberation of Piggymen, a character you will have to deal with later in the game

No. 3 You must try to solve several puzzles in 24 hours of play time, if you do not manage it, the game will restart and you will have to invest another 24 hours to solve the puzzles that are given to you

No. 4 The puzzles are individually designed, sometimes you have to find certain objects, sometimes eliminate certain enemies, sometimes get certain time points, sometimes overcome certain passages and barriers, sometimes solve memory puzzles, etc.

No. 5 In this example, try to free Piggymen, who is being held captive by the monsters that are on the mountains of a village. You must first climb these mountains to get to the enemy zones. This happens when you have collected enough kilometers on your digital pedometer. You integrate these into the game and give the character the necessary strength to climb the distance of the mountain.

No. 6 Pay attention to your strength indicator and use your steps at the right places on the mountain to go further up or to reach

No. 7 Once you have climbed the mountain, you must now defeat the enemy troops in this challenge, with the arsenal of weapons you have at your disposal, choose the right weapons for the right and appropriate opponent to finish him off

No. 8 Once you have eliminated the enemy troops, you must now enter the headquarters and search for, find and free the piggyman

No. 9 Finally, try to free the pig-gymen from prison and bring him back to the main headquarters within the allotted time. You have exactly 24 hours of playing time to complete the challenge. If you miss the mountain climb or do not manage to destroy the enemy troops within this time, the game starts again from the beginning with the weather adversities implemented in real time.

No. 10 So you have 24 hours of play time to master the game, be it as in the challenges mentioned above, to master this

No. 11 Once you have brought the piggyman to the headquarters, you must now establish a village of defense with him. You will soon be faced with an onslaught of enemy troops that you must stop. You will then be given 24 hours to establish it and equip it with security technology. No. 12 Be quick and easy in your security building, follow the necessary information and tips that you receive as feedback from other players on the Internet.

No. 13 If you withstand the attack of the enemy troops, you win the game and can now join the other 24 hour challenges mentioned above and complete them.

gene

No. 480 Untilwerich

No. 1 They have a remote control with a button and a touch display, the button looks like the eye of the Pha-raos Rar

No. 2 Press this button during a basketball game and target the player you want to play with, for example Luka Magic Doncic from the Dallas Mavericks

No. 3 If you have targeted him with the remote control, assign him a vector point, this means that the remote control is given a vector point on the display with the number and the name of the player, now click with touch, soft, medium, hard touch to assign the points that he could hit next

No. 4 Soft touch, equals 1 point, medium touch, equals 2 points, hard touch, equals 3 points, the remote control sends its touch behavior to the app in real time and you now bet on the player's next turn, which points he could score soon

No. 5 If you have indicated a touch and touched the correct point throw, you will be credited with one dollar for one point, 2 dollars for the correct 2-point throw and 3 dollars for a 3-point throw. So you basically have to observe the game and feel how the player behaves. You start with a credit of 30 dollars per game, so max. 30, 1 point throws, 15, 2 point throws, 10, 3 point throws.

No. 6 If you have chosen another player during the game, then aim at him again with the remote control, this will then be shown on the touch display with the number and the name, so you can switch between several players and individually set your dollars for the respective throw,

set

No. 7 Finally, you can play the game in split screen to find out who is the better tipper, the tipping of the throw percentage results is then displayed in a table in the app that is connected to the remote control

No. 8 Earn extra dollars while watching basketball or move your base bet, for each new game a base bet is requested that you can play and bet with, let's play

No. 481 Bologneseboy

No. 1 You must try to control a noodle that is initially small in size, in the display there are more pieces of noodle that are loose and scattered across the display

No. 2 You have to collect these pieces of noodle and link them to form a long noodle. Once you have linked the small noodle with the other pieces of noodle, you have a long noodle that you now have to control.

No. 3 Use the long noodle to collect other ingredients that must be collected in the correct order according to the display board, for example minced meat pieces, tomato pieces, celery pieces, cheese pieces, garlic pieces, with the mouth of the long noodle you catch these ingredients and have to bring them to a certain place on the display, namely the cooking pot

No. 4 Be careful not to run into or cross your path with the long noodle, otherwise the game is lost, see Snake

No. 5 If you have caught and collected the ingredients with the long noodle and its mouth and brought them to the cooking pot in the right order, you now have to shake the smartphone, now the display starts to turn into a spaghetti bolognese, if you have done that, the game is considered won, now at the end of the game you have to try to eat the spaghetti bolognese with the bolognese boy, this happens when you put the smartphone at a certain angle and tilt it and thereby aim for the bolognese to fall into the bolognese boy's mouth

No. 482 Rumor Mill

No. 1 in this VR game you have to try to create the following, you will get a recipe provided in the app based on a creation list from Internet users

No. 2 Put on your VR glasses and use live tips on how to use this recipe correctly to create the required meal while you study the recipe and prepare the ingredients

No. 3 You don't have to do anything else, just order the ingredients via the odor sensor product called Richidi and follow the recipe pattern, where users can connect to help you.

No. 4 The users guide you through the tutorial and then they start processing the things and following the sequence of the recipe

No. 5 Follow the application of the recipe and the feedback of the live users you see in VR

No. 6 Once you have prepared all the ingredients and products, start following the cooking tutorial, read the sequence in the VR glasses and get live tips from Internet users who have already done it

No. 7 Once you have followed the recipe and completed the creation, save your sequence digitally in your VR glasses and send this edition of the cooking that you have done digitally to yourself as a video on CD format to review it

No. 8 Now follow the steps you have done digitally as a live video tutorial and start cooking in your real kitchen, remembering your ideas and the sequence you have integrated to create the dish

No. 9 Finally, they follow the structures and scheme from the digital world that you have implemented and make it a reality in the real kitchen in the real world

No. 10 Share your videos with other users on the app and invite other users to the VR Rumors Kitchen in real time and improve or get updates on new creations and recipes that you can then ultimately turn into reality in the real world

No. 483 Steelhero

No. 1 You control the character called Steelhero, this character can absorb iron and transform it

No. 2 His ability to do this is necessary to destroy his opponents who are made of steel

No. 3 You fly with the Steelhero in a 2D flight shooter through the level and try to steal the steel from the enemy and then turn it into ammunition or other weapon systems

No. 4 You fly with the Steelhero in a bird's eye perspective through the level, you use your gravitational pull to steal the metal or iron from the opponents while flying

No. 5 You must use your weapon system, which is initially kept very small, to absorb enough iron and metal from the enemies in order to activate the weapon systems

No. 6 Try to get close to the enemies to activate the attraction force, the enemies throw colored vector points at you, either in large or small quantities, you have to dodge these, if you are hit, the life energy indicator decreases

No. 7 Watch out for the special enemies made of metal and iron to suck these resources away from you with their attraction

No. 8 If you have absorbed enough raw metals such as iron, you can now activate your arsenal of weapons and fire at your enemy opponents

No. 9 Also, while moving around the area, collect letters in the correct order that are searched on the scoreboard to gain special abilities such as faster steering, faster movement, invisibility, armored armor, more ammo, etc.

No. 10 Destroy the enemy opponents with your weapon systems while you can move the Steelhero forward, left, right, or up, or diagonally and vertically

No. 11 At the end of each level there is a difficult final boss that you must overcome in order to progress further in the game

No. 12 Make sure that you collect time items along the way and in foreign areas to clock up your time, which the game buys accordingly to a predetermined time, in which time you have to get to the final boss and kill him in the appropriate time

No. 13 Play in multiplayer with 2 Steelheros and make your game easier, the difficult level of difficulty of the game is tough, the levels are generated by Google Maps and contain original, faithful locations and landscapes

No. 484 Shimmer

No. 1 You must try to reach small towers in a self-created defensive position and equip them with soldiers

No. 2 The towers are created and built before the start of the game using the tools you have at your disposal, you have a time limit to do this

No. 3 You choose one of Google Maps, faithful to the original map and build these towers there

No. 4 They also set up barriers and passages as a shield against the coming enemy

No. 5 The goal is to build the towers in such a way that the enemy troops cannot invade, attack and take the village or the city

No. 6 So think strategically and build a special defense with the towers, in the towers you place soldiers who have special skills to withstand the onslaught of the enemy

No. 7 For each attack repelled and enemy destroyed, you receive points, with the points you can buy new equipment for the construction of new towers

No. 8 If the enemy has been repelled and defeated and you have reached the required score, you can try to assert yourself in a new Google Map

No. 9 Finally, you must protect all the places on the map that are selected as the location for the battle, you must protect the map with your defense percentage and generate a higher percentage value than the attack of the opposing troops

No. 10 For example, you must protect the state of Hesse in such a way that the value of the defense is higher than the capture of the enemy troops

No. 11 If they have achieved this, they can now protect a new federal state and its towns from the enemy

No. 12 Ultimately, they must equip an empire so defensively and strategically with towers that invaders cannot attack or take over the empire

No. 13 You play the game in multiplayer mode, first as a protector and the other player as an attacker, switch the situation in the game to increase the fun of the game, let's shimmer

No. 485 Bringitall

No. 1 You must try to bring your best friend everything you promised her, which means that the app will remind you to get individual things to woo her

No. 2 Enter your mood using bubble words and personal information about yourself so that the app can provide you with suggestions to impress your loved one with products displayed and optionally available in the app

No. 3 To access the app's product range, you have to upload your personal products that you no longer want to a showroom in the app and wait until users find themselves in it based on their search and become interested in your products.

No. 4 If you have received an inquiry from a prospective customer or an offer to exchange or purchase your listed product, the conversation and the transaction will take place, ultimately

No. 5 You will receive points for the products you sell or exchange from your showroom. With these collected points you can unlock some options of the bringitall product range and its categories

No. 6 If you have completed some transactions, you will receive points for them, collect them and exchange them to get the opportunity to view the product range of the bringitall app

No. 7 If you have looked at the product range and found the right product for you, you can now, if your points balance is sufficient, select a product and send it to the address of your loved ones

No. 8 The product range of the bringitall app has different categories that consist of drama, comedy, action, romance, etc. Browse through these individual categories for your product and exchange it with your collected points for a

No. 9 If your loved one now gets a product delivered to her home from the bringitall app, she will hopefully enjoy it and remember that someone had thought of her

No. 486 *Insidious*

No. 1 At the beginning of the game you build a village with houses and buildings, the special thing is that you equip the interior with the real rooms of the users, which means that the users of this game, who participate in real time, try to recreate their rooms and equip them as they are in real reality

No. 2 After the village has been built and the interior furnishings have been completed, other users of this game can now enter and examine these houses and the furnished rooms in 3D with their character and absorb some creative ideas

No. 3 The aim is to break into the houses and rooms of the other players in the game, who represent the villain, and steal certain things. In turn, they can also take on the role of the villain and steal from the village, whose houses and rooms have been personally furnished.

No. 4 It is a round-based strategy game, after each round it is a different player's turn, the game is timed and a target must be achieved, for example, choosing a house from the village and stealing a required product or thing from the room and then finally placing it in your room

No. 5 You are given a set of products that you must collect or steal from the village

No. 6 Try it during the day or at night, the weather adversities are facing you in real time, pay attention to the optimal time to break into the houses when no one is in the house or out

No. 7 Once you have stolen the required products from the houses or buildings, you only need to place them in their place in your house or building. You will receive points for this. Collect enough points to secure special items in the game that make stealing even easier.

No. 8 If you have survived a round, check in your home whether all things are in their correct place. If some things or products are missing, you can now slip into the role of the burglar and try to visit the other village during the day or at night to get your things and the specified products from your burglar list.

No. 9 The game switches from one mood to another, the goal is to get the given product pallets or to steal them from the other village

No. 10 For the theft and positioning of the stolen products, you receive points, you must reach a predetermined score within a certain time frame to get to the next level

No. 11 The villages are generated by Google Maps true to the original and the corresponding houses and buildings are available true to the original

No. 12 Each player has the opportunity to protect his house with alarm systems and barriers from the next robbery of the opposing player, they set up blockades and traps for their safety

No. 13 The goal is to equip their houses and their rooms with the products and things of the other village in order to get more creativity in their game

No. 487 Stackcash

No. 1 They use a face carousel, where they have verified themselves with their own face and logged in with their personal Paypal account, to select people who could provide them with money

No. 2 Try to randomly spin a face on the world carousel and decide it for yourself

No. 3 Once you have selected the face, you must be able to answer certain questions from the person in order to make a deal with him, which means that you make a deal with him for a loan, which is done via Paypal, you borrow money from him in the amount of approx. In this example, 300 euros, but you have to pay it back within a month, on top of which you will be charged interest of 3% by the person you selected on the world face carousel if you cannot pay the money back within the next 30 days. No. 4 This way, people in the world can exchange information and borrow money by chance, and earn something with the borrowed money at a personal interest rate, everything is based on honest deals and contact.

No. 5 The app is based on honest members who want to help other people in difficult situations and can help with their credit for a certain period of time

No. 6 The app may only be used 3 times a month and may not exceed a limit of 1300 euros

No. 7 Amounts of money are individually loanable to this amount with honest skin, with the faces carousel from the certain, randomly selected person

No. 488 Zoolu

No. 1 This app is a combination of images and a zoom function that has it all

No. 2 You select an image from the database and zoom it in 3 different steps, soft, medium, hard touch

No. 3 If you have zoomed the image with soft touch, you will see soft touch vector points after the image appears. Rotate these to deform and redesign the part of the image that has been selected. You can assign a color to each soft vector point that is displayed and deform it, which means that you can adjust the directions of the vector points and distort them in all possible areas and directions.

No. 4 Once you have done that, you can save the image section that was zoomed in and now continue to use the zoom medium. This time, you will be shown colors and coordinates for the vector points, which you can distort and set in all directions, be it left, right, up, down, diagonally, vertically.

No. 5 In the hard touch, vector points with color spectra, coordinates and now numbers from 0 to infinity appear, insert the numbers next to the coordinates and press the zoolu button, you will now see an image combination through an AI-supported system that corresponds to your ideas or not

No. 6 Use the functions described here to transform your own favorite pictures into new creations and be more creative than ever on the go with the zoolu photo app

No. 489 Leka

No. 1 You can invent the following items yourself in this app, the app provides you with a construction kit with which you can creatively design and create furniture together

No. 2 Try to use the modular system for amateurs for now and start by following the tutorials that you can view at any time

No. 3 In the kit system you will receive comic-like articles and kits on the topic of the categories, be it comedy, drama, action, romance, sci-fi, etc.

No. 4 Select a category and get the content for the amateur construction kit system, which you can use for free as a beginner

No. 5 Assemble your first piece of furniture in design and craft mode using the modular system

No. 6 After integrating video and text and learning by doing processes, they are fit enough to start creating the first piece of furniture

No. 7 You use your creative brain according to a step-by-step system to create a unique piece of furniture

No. 8 Let's take a chair, for example, you use the comic-like modular system to form the feet, then the seat and the backrest, you can rotate, distort and design these pieces smoothly with vector points, then add their color and surface and the material the chair should be made of

No. 9 Finally, you can create unique shapes using the vector point distortion technique by touching and dragging and dropping the material to rotate, twist, bend, curve, distort, cut, etc.

No. 10 If you have created your first chair as described above and designed it according to your wishes using the design modulator, you can now put it up for sale in the app at any price and of course order it to your home at a fixed price based on the costs.

No. 11 Exchange your creatively created furniture with other users of the app and learn new creative ideas. In addition, use the ego tutorial principle to create a video of how you created your piece of furniture and share it with other users in the app.

No. 12 Make an effort and take inspiration from available image portals, such as Pinterest, and be creative

No. 13 In live real-time mode, up to 4 creative users can simultaneously work on the piece of furniture using the comic-like modular system and at the same time create the piece of furniture step by step.

No. 490 Babajunga

You must try to guide a character named Babajunga through a jungle. You must mostly try to maneuver him through passages by taking a vine and letting it slither over the crocodile pool. The Babajunga is also in a labyrinth. You must maneuver him out of the labyrinth and at the same time destroy enemies who are trying to reduce your life bar. The labyrinth is constantly changing its shape, so it is important to get to checkpoints and from there to move on to the goal, namely the exit. Collect items to improve and optimize your skills. You can and must leave the labyrinth within a certain time, otherwise it will collapse. You must collect points that ensure that the labyrinth continues to exist in the same form. You will find these on the way to the exit or by fighting the approaching enemies. The goal is ultimately to find your way out of the labyrinth within a certain time and to get away from there and to the next level. Collect letters to solve the puzzle of the gate to the next level at the end of the exit; find the letters in the labyrinth to solve the exit at the end.

No. 491 Starphonecup

No. 1 You must try to develop a smartphone that can derive the following functions from the camera

No. 2 The functions include the following things, you can now digitize products and things with the camera, this means that the camera photographs a product and digitally integrates it into your showroom, for example you photograph an object, in this case a chair, this is then digitized and saved in an emoji or comic graphic

No. 3 The photographed objects are then visible in your showroom with this new graphic, now you can integrate these things into your room or showroom, this means you record your room in a 3D view with the second camera and can now drag and drop your objects from the database into the recording and position them and equip your room with these products

No. 4 Once you have done that, you can now attach price tags to it and set a time clock

No. 5 Now upload this room into your app and make it available to other users of this app

No. 6 Now users can inspect their room and look at the items and also auction them within a certain time period if they want to put these items up for sale

No. 7 Ultimately, you can make private things available to other users of the app and have them buy them

No. 8 If you have sold a product through an auction deal, you will receive the price you paid for it credited via Paypal and then transferred to your bank account

No. 9 The third camera function is designed to record temperatures and display objects and their temperatures in a scheme provided by the RGB color spectrum

No. 10 You can upload these products and items directly to the plugin, hot or not, and decide whether you like them or not, decide based on the color spectrum how much you like about products No. 11 Swap the items with other items from the app users and get new products that you might like in your room

No. 12 Implement drag and drop to room function and redesign your living area in a new way with the items and products of the members of this app.

No. 492 Niggaofthecentury

No. 1 You control an (see app) Afropimp in 2D - bird's perspective, in 3D third person perspective and in the best ego shooter manner in the switch, you change to the appropriate situation, the game perspective

No. 2 As with GTA, you have to complete individual missions to get money, the quests you have to complete are different to the level section, given to you as a task

No. 3 The aim is to end the gang war in the hood where you come from. This happens when you have first made a name for yourself in the hood. This happens when you first choose a gangstar gang and lock yourself in there, and there you try to manipulate the gang's inner circle. You complete orders for the gang and rise to gang boss. No. 4 Once you have completed the orders in the best GTA manner and have earned respect in the gang you chose at the beginning, you must now try to prove yourself further and rise to gang boss in order to gain more power in the game.

No. 5 If you have become the Gangstar Boss of your chosen gang, you must now convince the other gangs to join without

No. 6 Organize missions and business and push deals to gain peace with other gang members

No. 7 If you have managed to make peace and create a new connection between the gang members and the other gang members, you will of course gain more power and can now switch the game to a construction strategy game, you can now build houses and create an infrastructure

No. 8 As in the game Pizza Mafia, try to expand your real estate and its businesses, trade and bribe the police and other people to become more criminal

No. 9 You must always maintain your criminal scale, otherwise you may be downgraded from other sides of the city by other gang members and gangs

No. 10 Slowly build up your corrupt empire and control your GANG members in the city in the best GTA manner to complete valuable orders, switch the game to ego or bird's eye perspective and have an overview of your own borders and areas that you have created and stolen

No. 11 You must try to build an empire that extends beyond the federal states and is ultimately spread across the entire country in order to maintain a community between the areas you have founded

No. 12 Be careful and keep your corrupt economy running, with import and export business and good deals, your corruption scale will remain constantly at a high level

No. 13 Ultimately, the empire must spread across the entire country and they must manage to earn a lot of money and invest it in new construction projects in order to improve their infrastructure and keep it running constantly in order to become the nigga of the century at the end of the game

No. 493 Sortur

No. 1 You have a disorganized structure of folders and files collection on your computer or smartphone

No. 2 The File Manager Plus includes a cleanup function that puts all your files together in the order you want

No. 3 You just need to tell the wizard how you would like your data to be organized

No. 4 Consider how you want your data to be displayed, for example alphabetically by file extension and time period or any other type of sorting

No. 5 The file manager follows your voice command and sorts your data according to your specified criteria

No. 6 So try to think carefully about the structure in your head and then formulate it to the assistant

No. 7 There is also a special magic button in the file manager plus that renames the folders and files with a clean structure and then sorts them for you

No. 8 If you have successfully structured your data and adjusted it to your requirements in order and cleanliness, you can now switch better through the files and work faster with the folders and files

No. 494 Thedood

No. 1 You have to control the dood and try to convince him to continue with his career in Hollywood

No. 2 You get a camera and equip the dood with it, its job is to encode screenshots of films, that means that it takes the screenshots, no matter which film, but matching the category

No. 3 If you have selected a category with the dood, for example in this case, comedy, please sit in front of the film and screen unique moments with the camera function of the dood from the app

No. 4 Choose a film from the category, comedy and at the right moment and randomly select the screens that you might like

No. 5 If you have recorded several movies and their screens, all you have to do is click on the dood button and see what happens

No. 6 The app puts together a suitable story with underline text from the screens. Like a director, the app uses AI technology and uses it to summarize the screens in a suitable form to form a story. In addition, you get a synchronous text for the story that has been created, which is derived from the images and fits the theme of the image.

No. 7 You create a script of screens for a director who could derive a completely new film from it

No. 8 The Dood technology provides you with extraordinary personalities that come from the database of synchronized speakers and from texts from the Internet. It implements texts from film strips from the Internet and adds them to your screens to develop a wonderful story.

No. 9 Ultimately, you get a story filtered out of your own screens that you have recorded and can then optimize and exchange them with other dood users and at the end, through the combination of optimization, you get a complete script for a new film

No. 495 Brennsapur

No. 1 In this car racing game you have to leave the following tasks for your fellow player, you have to leave the original recreated Google Maps routes from your area on the track with a drift caused by your car, this means that you drive the original mapp route of your city or village area and try to leave drifts on the track, these are saved on the track and have to be copied by your fellow player.

No. 2 In the drifts left on the track, vector points are shown that you must collect in order to recreate the special drift. Each vector point left has a special meaning for the drift. The colored vector points show you how to handle the clutch, gas and brake. Follow the vector points, which consist of 4 buttons and colors that can be seen on the controller, in the right order to get the perfect simulated drift.

No. 3 Taxes and press the wrong one, so you will receive less value and points credited to your credit account.

No. 4 You are driving in live mode and your opponent is behind you, so try to make a complicated drift to prevent the opponent from getting more points than you when you drive around his area and try to copy his drift.

No. 5 In addition, the game is played against the clock, follow the time points that give you more time on the track by collecting them as you drive on and off. Switch the area of your location and battle with your fellow players from your area using the drift vector point methods that are controlled with the 4 buttons on your controller.

No. 496 WoistmeinAuto

No. 1 in this game is the goal to get as many cars as possible, which in this case happens when you have to steal them and then put them in the display case at home as gadgets and figures

No. 2 Try to win against another player in a car racing game in arcade mode, then hide the car to steal it later

No. 3 Use your radar to find the hidden car and steal it for yourself, make sure your fellow players don't stop you, be clever and don't let them stop you from carrying out your theft. No. 4 Once you have completed the route and managed to get to the car, you must now try to break it open and bring it back to your headquarters.

No. 5 You will of course be tried to stop by the police and your fellow players, be a fox and take another route to the main headquarters and drive carefully with your professional car speed rhythm to the main headquarters

No. 6 Once you have arrived at the main headquarters, your car will be digitized and saved as a car figure in your personal app. You will then receive this figure or gadget and can have it sent to your home free of charge and put it in your display case.

No. 7 Exchange your personal car figures with your friends and scan the QR code to bring the car back into the game with the app or to implement it and use it in battle against other users of the game in the arcade mode

No. 497 AdlerundTriebwerk

No. 1 This is a new discotheque or so-called club for visitors who can find their fun there

No. 2 The special thing about the club is that the roof automatically adapts to the weather and opens when the temperature is good and remains closed when the weather is bad

No. 3 In addition, old engines are installed in the club, which serve as wind generators and play the music, the special thing is that you can rent the engines to play your own playlist from their music library

No. 4 At the top and in the middle of the club hangs a large eagle figure that projects desired and suitable images onto a screen projected around the club, which means that the visitors to this club can project their own images, matching their playlists, onto the screens around the club through the eagle's eye

No. 5 There are 6 different colors that the eagle can project and reflect on the dance floors. The dance floors are large displays that you dance on. They have sensors with touch technology, which means that when people dance on them to a beat, they are registered and the pressure is transmitted to the engines. In turn, the sound becomes bassier or the pitch becomes higher, softer, or lower due to the dance that is transmitted to the engines.

No. 6 The drinks can be put together in advance in the in-house app and sent to the bartender via a QR code when they are in the club, so he knows immediately what the customer wants and serves you the specially designed drinks list for you

No. 7 In the in-house app you can take part in competitions to win a table and VIP seat with the associated free drinks, you register and are randomly selected each week through a face carousel

No. 498 Kanpao

You select an overview from various areas and categories, for example, comedy, action, romance, sci-fi, drama, music, crafts, sport, then you are given a character at random, you then use this character in a new type of beat 'em up game against an opponent randomly selected from the internet. If the random selection has been made, you are given a character from the various categories and areas mentioned above, with which you compete against another player in beat 'em up mode. So you have no idea which character you are playing, no matter how creative and combative you are, because the opponent doesn't know at random what kind of character he has to play against you. Since you don't know how to make so-called moves with the character, it is a good idea to look at the display board during the game and read how they work, use these moves and the fight will be easier for you. Please note, and this is the most important thing about the game, to win the fight, hit the illuminated vector points on the opponent's body to receive different points, as the game must end with a KO or a predetermined score, in addition, the game is timed and the clock is individually changed, sometimes it runs faster, sometimes slower, sometimes in normal mode.

No. 499 Kasib

No. 1 in this building strategy game you have to play a real estate shark, which means that you try to negotiate a deal with other players using corrupt business dealings in order to get new properties

No. 2 You start with a small amount of money and have to get more money through clever business deals, which means that you buy up dilapidated buildings and renovate them and make them shine again

No. 3 Through renovations and good investments and good deals, they create an option for high quality and high rents, which then bring them an increase in money

No. 4 Make the most of your rental costs and build the buildings, need areas to attract people so that they choose to live there

No. 5 Pay attention to other players who are integrated into the game live and in real time and play simultaneously with you

No. 6 Negotiate deals about who should live where and who should move into your new renovated apartments

No. 7 Try to build need areas, such as shops and wellness buildings, so that tenants feel comfortable in their area, attract other people to their area to build new buildings for them

No. 8 You have a level indicator that shows you how comfortable people are and how their needs are being met, as well as a construction and money scale to monitor your infrastructure

No. 9 After the money increases, build and construct new sites and buildings for new residents that you have attracted to the city

No. 10 to invest in a certain time and deals with other players will be offered to you when you reach a new status

No. 11 Be a smart businessman and build new and individual buildings with the program's designer mode or invite the residents to build them themselves

No. 12 In the modular system, you develop targeted buildings, houses and apartments for the future of the new residents. No. 13 Become the figurehead of the construction

industry and make a name for yourself in order to conduct business and deals with the big players in the construction industry, and ultimately become Kasib

No. 500 Billtheplant

No. 1 You have to try to control a character called BillytheButcher, his task is to collect plants in this 2D jump'n run and to collect them correctly according to the order that is displayed on a scoreboard

No. 2 You have to find the plants that are being searched for on the display board one after the other and link them together, which means that when you do the run and jump onto earth stones, either on top of them or from below, these plants will appear and can then be picked up

No. 3 To get a weapon, you must follow the order of collection

No. 4 In addition, you have to find the right name of the plant on the way to the end of the level, which means that you have to collect letters on the way and while jumping and assign them to the plant that you have picked up in order to unlock a weapon with which you can destroy the enemy opponents that are coming towards you with the unlocked plant-like weapon.

No. 5 The game is timed, every opponent you destroy while running and jumping gives you individual points that vary and are credited to your time account

No. 6 Try to fire at the enemy troops and opponents while running and jumping, using your unlocked plant-like weapon and make them harmless in order to get more time points, this is important because time is constantly running against you, so it decreases with each running second No. 7 For each opponent you eliminate, you get 1 second plus transferred to your time account

No. 8 So try to hit and destroy several enemies in a combo to get a time bonus

No. 9 The special thing about this game is that the next level switches to 3D mode and must be played in 3D

No. 10 As in the game, spyro the dragon in 3D, you must now play and complete the level in 3D, you must do the same as in the 2D level and play through the original landscape from your region provided by Google Maps in 3D and master it in the required time

No. 11 You also have to complete quests and challenges in the 3D world and reach them within the required time in order to get to the next level, which is now a 2D jump and run game again.

No. 12 The ultimate goal is to plan and plant the plants you have collected in your garden. These plants have the task of protecting your village from intruders and approaching enemy troops.

No. 13 While completing a level, switch to construction mode and place these around your village to protect it

No. 501 Zoophant

No. 1 You have to control an elephant and use its trunk to bring down planes from the sky. There are enemies in the planes that you have to suck up so that the trunk meter stays constantly charged. This means that you can only use the trunk multiple times if you have reached enough points charged on the scale.

No. 2 At the beginning of the game, the meter is charged and stable and active, waste your function of aiming the trunk at the flying enemies, not to miss or miss

No. 3 You can also use colored vector points to bring the planes to a standstill or freeze them so that they remain in the air for a short time

No. 4 The enemy planes leave behind letters after they are shot down, which they must collect in the correct order and suck them up with their trunk

No. 5 The letters form a sentence that must be followed and arranged in the correct order. The aim is to suck up a given sentence with the trunk.

No. 6 Also try to jump with the Elephant on floors that are in the level and get higher into the air to gain an advantage over the enemy

No. 7 If you have managed to get into the air and reached a certain height, you can use your ears for a short time to float in this high position, you can control the elephant vertically, diagonally, left, right and from bottom to top in the high position.

No. 8 The aim is to suck up the enemy aircraft and their opponents in order to charge the trunk scale, because only a completely charged scale makes them use the trunk in different lengths

No. 9 Ultimately, the goal of the game is to reintroduce the animals in captivity, which you will receive after the game has ended, into your zoo in order to build a park that you must protect from enemy troops, each animal is placed in a location and is given skills to fight the incoming troops

No. 10 If you have managed to free all or at least half of the animals after completing the level, you must place them with their own and special abilities in the places where you think the onslaught of enemies can be stopped and eliminated

No. 11 In the best Plants Vs. Zombies manner, try to protect your zoo and not let any enemies into your zoo, because every enemy who manages to penetrate your zoo will move his weapons and try to slowly or deliberately destroy your zoo that was built before the game

No. 12 The game switches from the 2D jump and run to a self and defense game, after each level you have completed, you have to use your freed animals strategically and hope that you can protect your zoo as much as possible

No. 13 If the zoo is taken over before you have completed the levels with the elephants, the game is lost, so try to master as many levels with the elephants as possible, free as many animals to protect your zoo and then use them to protect the zoo

No. 502 Gimmlek

No. 1 You have to try to control a character called Gimmlek, he is a Labrador and has to be led through different directions and paths of the labyrinth, the special thing is that you provide the dog with a path that he follows and runs down to get to the next door, behind the door there is a new path and a new direction that leads to the next door

No. 2 Try to set the path for the Labrador from your playing style (labyrinth shown previously) - bird's perspective and lead him to the next door, on the way to the door, enemies appear that the Labrador must stop or defeat with his skills

No. 3 You control the Labrador using the path you have set individually beforehand and guide him via voice control along the path, which consists of vector points, to the next door in the labyrinth

No. 4 The aim is to set the correct path in the labyrinth and to bring the Labrador along this path to the exit door, because when the time runs out, the possible exits disappear.

In this case, doors, and they must again remember the path of the labyrinth and its doors in a flash in order to place the path to one of these doors

No. 5 In addition, when the Labrador walks along the set path, they collect letters that could bring you luck, namely, if you have collected numerous letters, you can use them to unlock several possibilities and directions of the labyrinth or to open blocked paths that are blocked by walls

No. 6 Try to guide the Labrador through your path to a door in time. When you pass this door, you will end up in a new section of the labyrinth and from there you must set new paths and guide the Labrador along the path you set before after briefly seeing the labyrinth by using voice commands.

No. 7 The new section of the labyrinth contains, again, new paths and directions to doors that are newly set, so be spontaneous in setting your path

No. 8 The game is of course timed, try to reach the door to the next exit in the given time, otherwise you will have to start the level again

No. 9 Finally, you have to perceive by sound which door could lead to the next section, because the doors make noises in the vicinity, in this case a call of the Labrador's name, so gimmlek is called, so decide and listen carefully when this sound is called out near the correct door in the maze

No. 10 Once you have completed a section, the next section will be shown for a short time along with the possible door exits. Quickly remember the possible way there and use the path for the Labrador that leads to the right point and is close to the doors.

No. 11 Once you have chosen and remembered the possible path, set the path and control the Labrador dog through voice commands along this path to the possible exit door. During this time, you can collect letters and have to avoid enemy opponents or destroy them with the Labrador by opening their mouths at the right time to eat these opponents.

No. 12 Pay attention to the time and to the wrong doors that attract you with the wrong noises, prevent the enemies from catching you, like with pacmen, and eat them with your mouth in time and at the right time

No. 13 Try to get to new sections and new labyrinth paths with their doors, use your collected letters and open special paths for free, try to remember the path that was shown to you before and choose the right door to the new section of the labyrinth and find the goal at the end of the game, your dog bowl and your master

No. 503 Labyrotia

No. 1 In this game, several labyrinths rotate, moving on top of each other and under each other or next to each other, your goal is to jump from one labyrinth to the next in order to gain the advantage of getting further to the goal, namely the exit of the level

No. 2 In this 3D jump and run it is important to keep an overview and to leave the labyrinths at the right time, as they rotate and change their shapes individually to the axis pivot point

No. 3 You must try to find the optimal timing and leave the first labyrinth and hop or jump into the next one, as mentioned above

No. 4 While they are running through the labyrinth, they have to watch out for enemies, who can eat them at the right time if they open their mouths shortly before the encounter, these enemies then fall in and disappear, if they do not hit them at the right moment, they get deductions from their life bar

No. 5 Go through the first labyrinth and look for the necessary letters in the paths to activate the super jump into the next labyrinth. Once you have found the required letters, you can try to jump into the nearest labyrinth and collect more letters there to get to the next labyrinth.

No. 6 The labyrinths that are in the immediate vicinity of your labyrinth rotate and are not easy to jump over, so you have to wait for the right touch and moment to dare the super jump into the next labyrinth

No. 7 You must ultimately try to get out of the last labyrinth, but to do this you must first leave the other labyrinths and get to the last one to finish the level. Of course, time is also running, so try to reach the last labyrinth within the given time and from there find the exit to the outside.

No. 504 Valentinotch

No. 1 You must try to catch the following things with your smartphone, you digitize your love or loved ones in the game valentinotch with your smartphone camera in a comic-like graphic

No. 2 Once you have digitized the person you love, you now have to do the following with them. The game works by trying to link falling hearts with music notes at night. This means that you touch the hearts in the air as they fall and add a music note to them and place 6 different music instrumental vector points around them. This means that each vector point is assigned a musical instrument, be it guitar, flute, piano, bass, violin, etc.

No. 3 While you touch the heart in the air, you select the music note and put the appropriate musical vector point instrumentals in the middle of the heart and around the heart, try to create a suitable line with hearts falling from above, this means that immediately after your first heart touch, it stops, wait for a new heart, touch this, put a music note in it and integrate 6 musical vector points around the heart and link this heart with a new one

No. 4 If you have connected about 13 hearts in this example and integrated their musical vector point instrumentals, you can now tap on the instrumentals and give the musical note a rhythm, then give the other hearts the rhythm you have created and thus get started with the other hearts

No. 5 Now you have connected all 13 hearts, given them a music note and arranged the musical instruments around the heart, then tap with soft, medium, hard touch on the notes and slowly pull the instrumental into the heart and be amazed at what kind of sound can be created, touch the other hearts after the connection and give them the instrumental rhythm that you have chosen in the music note

No. 6 Play it back and be amazed by a new unique sound that you can send to your loved one if you managed to complete it and create a beat from it.

No. 505 Cwalkhomie

No. 1 You are trying to control a character that you have designed yourself, before the game starts, it is a privilege to create the cwalk-homie

No. 2 Once you have created your character, the game begins. You must complete the following tasks in original recreated and displayed Google Maps that are generated for the game.

No. 3 Choose a route from the Google Maps map and try to complete it in the real world in a required time. The app remembers your step sequence and your speed and transfers this to your digital character, whose goal is to complete the digital version of the route.

No. 4 He uses the step speed and the step sequence that was collected in the real world to walk the route in the digital area or route, for this they use the 4 buttons on the controller, with these they control the sequence of the walk and change the speed of the cwalkhomie

No. 5 On the route generated by the app there are vector points that are on your way and are intended to be collected in order to increase your step sequence and speed

No. 6 You walk the route and collect new players through addition, subtraction, multiplication and division processes, who then follow you to master the route, because there are hordes of enemy opponents on the route that you have to destroy along the way with your individual collected arsenal of weapons.

No. 7 Pay attention to your level step indicator and choose the procedures of mathematics to put a good troop on the way to reach the goal

No. 8 Once you have completed the route and destroyed the enemy troops on the way to the target, a new area from your Google Maps map will open on the radar, which you can conquer

No. 9 You have to conquer several areas in order to then build a security castle in the areas, this castle will then serve as protection in case new troops from other directions try to attack you

No. 10 Proceed in percentage terms and conquer territory by territory, in your map constructed by Google Maps

No. 11 Pay attention to your step counter, charge it in the real world and digitize it into the game to complete more distances

No. 12 Make an effort and take your time to walk the routes with your steps and destroy the enemy that could appear from any direction at any time

No. 13 The game is not timed, but based on the length of the route that must be completed, plus the construction of the castle in your conquered areas, place your flag on the Google Maps map and conquer areas and terrain, piece by piece with your self-created troops, which you gather along the way, using the mathematical procedures that are available as points, place your castle in your areas and have them set up a base

No. 506 Sleepingmillionaires

No. 1 You have to try to drive a taxi through the original locations recreated by Google Maps in an environment with the corresponding streets and try to wake up certain people with the sound of your engine at the houses where these people are sleeping and transport them to the right places in the game with crazy speed and drift technology

No. 2 Try to find the sleeping millionaires on your radar and drive to certain places and locations to first wake them up from their deep sleep with the sound of the engine and then transport them to your certain drop-off locations. If you have found a sleeping millionaire on the radar and have driven past his house with the engine sound within a certain time, your task is now to drive him to his drop-off location within a required time, which is shown on the display board.

No. 3 Use the crazy and drift speed to build up enough speed through the towns and get out of the town. Once you have left the town, follow the route display on the radar and follow the speed mode so that the passengers, namely the sleeping millionaires, slowly wake up while driving.

No. 4 Once you have reached the drop-off point, you will receive points for this. Now it is time for the next step, to pick up another sleeping millionaire and bring him to the destination, of course within the required time. On the route there are speed items in the form of vector points that you must collect in order to achieve a higher speed.

No. 5 While transporting the sleeping millionaires to their destination, they must watch out for the police and barriers and passages that prevent them from bringing the people to their destination in the required time

No. 6 The special thing is that the millionaires also have to be picked up when they have finished their job at the destination, mostly they are stock traders who work under stress and have to be picked up quickly from their workplace to rest at home, to get strength in their sleep rhythm so that they can make better decisions in trading stocks

No. 7 So always be on your guard when the alarm bells on your taxi start flashing, for every millionaire you drive there and pick up, you get money, with this money you can pimp up your car, i.e. the taxi, to get to other places, to transport new people

No. 7 points are awarded for the correct adherence to the time and money for transporting the sleeping millionaires from place A to place Z, depending on where they have to be delivered

No. 8 If you have mastered a town and persuaded the sleeping millionaires to do their job perfectly, for example to generate a large profit on the stock market, new areas and regions will be unlocked on the radar, which you can then drive to reach and wake up new people or transport them to the right places.

No. 507 Pukat

No. 1 You have to try to control a puk on two sides of the playing field, the game is played with up to 4 players at the same time, which means that two puks can be played simultaneously

No. 2 On each side of the playing field you will find a goal where the puk has to be played into, you press the puk with your hand and it flies in the direction you had aimed

No. 3 The puck is available in many shapes, rectangle, circle, square, triangle, it changes its shape during the game and is individually switched

No. 4 Try to play the puck with your hand on the path of the shown and colored, glowing vector points to get points, because if the puck runs along this path, you will be credited with points if it is then placed in the goal

No. 5 The goal is to maintain a certain score, as every hit by the opponent deducts points from your account, so try to act quickly and play the puck with its individual shape along the indicated path and finally turn it into the goal in order to credit the points for yourself

No. 6 The game is timed, try to achieve the required score and achieve it in the given time, there are also power items on the playing field that can make the puck faster, slower, stronger, weaker, invisible, change shape, transform

No. 7 Aim at the opponent's goal along the path to score points by hitting the goal. Make sure that the opponent does not score a goal for you, otherwise you will lose points. So use the other pucks that are still in play to protect the opponent's shot on goal. No. 8 In this multiplayer mode, 4 hands play simultaneously with 2 pucks together to reach the high score that is required in a given time.

No. 9 The playing field is constantly redesigned and changes its shape during the game, as well as the puck individually at random times

No. 10 If you have won the game and reached the required high score, you will be shown 2 new opponents from the random carousel who will play with you to get the new high score, you will become the puck master and rise to the top of the high score list.

No. 11 Become the master of the game and get the game in conventional form, sent to your home for free and get it as a gift for free

No. 508 ShowOperator

No. 1 You need to watch several videos from the categories of Tiktok, the program asks for a short message or Feedback on the video, in this case, certain questions that you should and must ask the video

No. 2 The app gives you ready-made bubbles to formulate questions and ask them about your selected videos

No. 3 The app now saves the video with the questions asked and embeds it in a late night show, which means that selected people can register for the Showoperator Show, either by email or by phone

No. 4 Now the videos are shown briefly to the selected guests who have been invited to the show and the guests must now ask questions about them. The show master, i.e. the operator, records these questions and tries to answer them. If the questions asked by the guests fit the video, the operator must now answer them. There are 3 operators and 3 guests who work together.

No. 5 The first guest has the opportunity to choose an operator and hope that he or she correctly answers the questions asked about the video, which are compared to those that were previously embedded. Each question that is answered about the video releases a certain number of dollars depending on the focus.

No. 6 The guest selects a category from the app and tries to create the same question that was previously included in the scheme by the app.

No. 7 Finally, the chosen operator must answer the question and if the answer is correct, the guest will be credited with the amount of dollars that comes from the chosen category and question

No. 8 You have about 85 minutes per show to win dollars and then invest them in the next show if you become the winner of the show

No. 509 Critterurn

No. 1 You try to control a critter through the world generated by Google Maps, the routes you roll are created according to your wishes from your or another region

No. 2 You roll your critter through the track and try to roll over people and monsters, for every person or monster you roll over, you get points

No. 3 At the beginning your critter is very small, by picking up colored vector points your critter grows into a larger being, you can also pick up other critters and thus transform into a large critter ball

No. 4 The colored vector points are items, they transform your critter into one with a different color, each color has its own special properties, that means for example, if you collect the green vector point, then your critter will be equipped with a special ability, it can split, if you take the red color, it can roll faster, if you take the blue color, it can jump higher, if you take the yellow color, it can shoot arrows etc...

No. 5 Try to complete the original routes from Google Maps in a certain time or to master them

No. 6 There are no barriers on the sides of the track, they just appear, so be careful not to fall down

No. 7 You must try to roll over the people and monsters that appear during your run to get points, you must reach a certain set of points and complete the course in the given time to get to the next course level

No. 8 You have a specific scoreboard that shows which people and monsters you have to roll over or not. If you roll over several people in a row, it is counted as a combo and you get an additional point credited to your account.

No. 9 Ultimately, you have to conquer the routes from your region, step by step, in order to occupy the percentage of areas on the map

No. 10 If you have completed a route in the given time and enough required points, you will be provided with a new route in your region, generated by Google Maps

No. 11 Play in multiplayer mode against other Critterrun users and be faster and collect more points than your fellow players

No. 12 Make an effort and take on the most important routes and achieve territorial gains and put your stamp on the map in percentage terms, high score including time runs

No. 13 Exchange your self-designed critter with other inspirations, with other users and play with the exchanged critters, the tracks ultimately mirrored.

No. 510 StarskygoHutch

No. 1 Starsky is a man who goes on a criminal hunt with his colleague Hutch, the two colleagues try to arrest criminals in simultaneous mode and in the controlled character switch, this happens when both go on tour through the USA, with vehicles of all kinds

No. 2 First you choose the standard vehicle to find the criminals in the game field, they are scattered around the world map, for example you start in the state of Texas, there you try to catch the criminals with your vehicle, this happens when you drive to the exact positions on the radar and look for the criminals, they are visible on the radar for a short period of time No. 3 You must try to remember the radar recording and plan or memorize the positions, this happens quickly and individually No. 4

The state of Texas and its areas must be driven through first and the search for the criminals must begin, the fact is that you are not alone in hunting criminals, other players

from the Internet who register in this multiplayer game try to do the same as you

No. 5 You have a certain amount of time to find criminals and bring them to your own headquarters. For each criminal or several criminals found, you get money and time points. Make sure that other criminal hunters do not stop you or prevent you from snatching the criminals from under your nose.

No. 6 The other criminal hunters are equipped with modern and individual weapon systems and use them against them

No. 7 Try to avoid them and clear your chosen area of criminals and then bring them to the headquarters, every criminal you capture brings you a certain amount of money or time to your account

No. 8 Since their radar only lasts for a short time and only gives them a short opportunity to remember the positions where the criminals are currently located, they have little time to remember this, they store these positions in their brains and try to find them in their area before the other criminal hunters invade their area to steal the criminals from them and then bring them to their headquarters

No. 9 You must therefore protect your area from the other hunters and force them out of your area. This happens when you shoot at the other players, hunters, with your weapon systems or try to force them away from collecting or capturing their prey, namely the criminals. No. 10 For example, if you have completely cleared your area of criminal hunters and collected your criminals by capturing them and bringing them to your headquarters, you will be credited with the area. Be careful that your headquarters is not attacked by other hunters and opened to the criminals, otherwise you will have to complete the Shema again as described.

No. 11 Your area will only be safe if you equip the headquarters with security functions, this is done by buying security devices, you can view these and purchase them with the money you have received for hunting criminals. No. 12 Set up barriers and blockades in front of and in the headquarters and protect your criminals from other criminal hunters who can come to you at any time to free or steal your criminals. No. 13 If you have banished all hunters and protected your headquarters and found all criminals in your area and placed them in your headquarters, then in this case the area is in

Texas, all cleared and safe. No. 14 Now you can try to advance into other areas and steal or free your criminals from the hunters there and finally find them, collect them and bring them back to your headquarters. For every criminal there is, as mentioned, money and time.

No. 15 The game also runs for a limited time, the more criminals you find and collect, the more time you get credited to your account, you use this to equip your headquarters with devices and improve them in order to ensure better protection against the other hunters No. 16 Finally, push into further areas and conquer the towns of the other hunters, as an additional option you can use your criminals in

special mode against the other hunters to raid their headquarters, to free the other criminals, then take over the headquarters, and then use it for the rest of the game, after taking over the other hunter's headquarters you still have to catch the criminals who have escaped and integrate them into this headquarters No. 17 Conquer towns and areas bit by bit until you have freed the entire state of hunters and captured all the criminals, other states in the state will be unlocked in your vicinity and you must then ultimately be cleared and conquered with this described principle No. 18 In multiplayer mode, you can join forces with other hunters from other areas and push the areas away from other hunters in order to ultimately eliminate them, to take over the entire state including all federal states, and to win the game as the winner in the turn-based game.

No. 511 Doyouwantacookie

No. 1 In this poker game, there is no information on the value of the chip on the back of the chips, but information in terms of the number of eyes, which means that when you have to use the chip, you have to throw it on the table to challenge whether the amount on the side that fell from the chip and its number of eyes will be doubled, tripled or quadrupled

No. 2 The challenge to this chip is given by the dealer, each participant in Texas, no limit holdem, has the opportunity to get 3 chips with their number of eyes in an individual amount to the value of the chip

No. 3 Let's assume that it is now my turn and I want to bet a chip amount, it can happen that the dealer calls the challenge and I now have to throw a chip with an individual value that I received previously onto the table, if the chip falls on the side of the number, it can happen that I have to increase my chip amount by three times the value of the chip without wanting to.

No. 4 If the chip falls on the standard value side, I only bet the amount I thought of, each player has 3 of these chips, in order to make this challenge, which is called by the dealer, otherwise he has to pay a penalty to the dealer

No. 5 For example, if you have a chip worth \$50,000 and the challenge is announced, and the chip is thrown and lands on the number multiplied by four, I have to bet \$200,000 with my hand without looking at my hand, but it can also be that the standard value of the chip, i.e. the normal side of the chip, is turned over, so I only have to pay the chip worth \$50,000, of course without looking at the hand I was dealt beforehand.

No. 6 So every player has to take part in at least 3 challenges and does not know beforehand how high and by chance the value of the chip will be

No. 7 If, for example, 5 people are playing, 15 challenges will be played in total to keep the opponents in suspense and make the game more interesting. It can be assumed before the game that the number of challenges will increase by agreement. Depending on the agreement with the participants, this can vary.

No. 8 In addition, you can also randomly switch to the mode where the previous player calls the challenge and the next player then has to take part in this challenge without knowing how much the chip is worth and by what number of points his bet must ultimately be played and multiplied without looking at the cards.

No. 512 Foodgang

You scan the nutritional table of your product while you shop, the app sorts out the bad ingredients and suggests you buy a suitable product that compensates for these bad ingredients, it guides you digitally through the store and shows you where and which product you should buy to compensate for the separate ingredients with healthy and optimized ingredients from the suggested products. The app guides you through the store and shows you the products that are coordinated and go better together and are healthier than the ones you have always bought before. You also have the option of digitally looking into the store and seeing which offers are currently being suggested, which are currently listed separately. The suggested products displayed by the app can be linked to a dish and you will be suggested a meal for your day of the week and the calorie counter will give you a healthy way to optimize your well-being. You enter your personal data such as weight, age, eye color, height, taste, etc. and the app finds suitable and healthy products for your individual weekday that you define, which are coordinated with each other and do not cost too much.

No. 513 Scatfish

No. 1 You must try to choose a cat from different breeds, consider the skills of the cat that you need for this game

No. 2 Select the size of the aquarium and the difficulty level of the game before you start the game

No. 3 You must try to catch or chop up the floating and swimming fish with your cat's paw through openings that appear randomly on the front glass of the aquarium

No. 3 If you chop up a medium-sized fish, the fish will leave a circle with vector points. The vector points contain numbers that you must calculate with in order to solve the result on the scoreboard. If you solve the result using the numbers left by the fish to calculate the vector points using the addition, subtraction, multiplication and division methods, the fish will disappear and you will receive points for it. If you do not solve the result, the fish will reassemble and swim away and no points will be credited to your account. No. 4 The aim is to catch all the fish in the aquarium and solve the correct math problems in order to get a certain score.

No. 5 Use your cat's paw through the individual openings of the aquarium, touch the paw and pull it long, short or medium length on the fish to catch or chop them up

No. 6 The game is timed, meet the required score in the given time to move on to the next level

No. 7 If you don't catch the fish, they will become vicious after a while, they can then fire colored and glowing vector points at your cat from their mouths, pay attention to your life bar and don't let the vector points hit you too often, otherwise the life bar will run out and you will lose a cat's life

No. 8 In the next level, a new aquarium will be played and the types of fish will compete against them differently and have a higher level of difficulty than in the previous level.

No. 9 The aquarium shapes are individual and change level to level, the background of the aquarium is generated from Google Maps and photos to create the right ambience and mood
net masked

No. 10 In multiplayer mode you play with another randomly generated cat user, this will help you to simplify the game and complete it faster.

No. 514 Spaceboogie

No. 1 You control a spaceship in R-Type style through a background graphic modification generated by Google Maps from your environment

No. 2 Try to fly to several fields with items with the spaceship in order to double, tenfold or multiply the spaceship individually depending on the mathematical symbols, you have to do this because the enemy troops are in the upper hand and are heading towards you.

No. 3 In addition, you must use vector points to calculate these items and get the correct result on the scoreboard, which is what is being sought, when you use the mathematical functions such as adding, subtracting, multiplying, dividing, and using them in conjunction with the desired result and contracting the numbers or touching them together to get the correct result

No. 4 Fly to the item fields if they appear to be prepared against your enemy troops who are coming directly at you with a large force

No. 5 Collect additional time items in which seconds are hidden to build up your time credit account, because the game runs on time and this melts into the negative if you cannot stop the opponents, every opponent that is not hit also takes life energy from your life bar, make sure to always keep this completely up, if it sinks and runs out, your spaceship will slow down and have loads of inhibitions that are necessary to stop the enemy troops that are coming at you in large numbers.

men

No. 6 Try to displace the enemy troops using the math items and calculate the desired result on the display board. You will receive points for this, which you can use to update your spaceship in the level pause up and to equip it with new functions.

No. 7 Finally, you have to fly through the level and destroy all the enemy troops and even eliminate them

No. 8 In the next level, the difficulty level can change individually in the game, depending on how you fly forward, stay cautious and act carefully with your weapon arsenal and use the mathematical items to increase your weapon power

No. 9 Once you have mastered a new level, you can look forward to a new environment from your town generated by Google Maps and use it as a background, this brings atmosphere into the game and brings more excitement to the overall action of the game

No. 10 Exchange your personal collected and unlocked spaceships in the app, in a showroom and order them as figures to your home when you have completed the game.

No. 11 Digitize your collected spaceships back from home into the digital game and play this game now in reverse with a higher level of difficulty, use the multiplayer function to complete the game more easily and play together with friends

No. 515 Rabethedolly

No. 1 You have to try to control a raven to prepare it to survey the sheep pen and then take them out one by one, this works by following the radar and getting an overview

No. 2 If you have got an overview and spied on the enclosure and have not been spotted by the farmer who keeps the sheep in the enclosure, you can rely on getting a sheep next time

No. 3 If you are above the sheep enclosure, you must aim a path at a sheep and follow this path from your dive, which is switched to vector points as a target objective, in order to then grab a sheep

No. 4 If you have directed the path to a sheep and have been able to capture it, try to touch the connection of the vector points to follow the path exactly. Once you have reached the ground, you must place the letter of the sheep, which is shown above the sheep's head, with the correct vector points in order to pull the sheep up.

No. 5 The letters have a certain number of vector points that must be touched in the correct order to lift the sheep from the ground into the air and ultimately use it along the return path to fly away and bring the sheep to their headquarters

No. 6 Try to steal one sheep after the other by freeing them from the pen, watch out for the farmer who is tending the sheep, he can hit them with his gun at any time to divert them from their path, so make sure that the farmer does not hit a vector point of the target path with his gun, otherwise you will end up in the pen yourself and the game will be lost and ended

No. 7 In the first levels you have to try to save a certain number of sheep in a certain time, this happens when you steal the sheep from the air to the ground and bring them to the headquarters

No. 8 For each sheep you save you get points, collect as many points as necessary to open the next level

No. 9 In the new level there are more sheep and more farmers waiting for them in the enclosure, there are also different types of sheep, these of course also have different colors and have a different difficulty principle to tear them

No. 10 In the new levels, you also have to inspect several enclosures and be careful not to free the wrong sheep, but you also have to make sure that the farmer doesn't shoot your target path to the sheep with his gun, otherwise you end up in the enclosure and are taken prisoner by the farmers, to free them you have to sneak in with another raven to free the main raven, this becomes apparent when you play together in multiplayer and take turns to free the sheep.

No. 516 OriginalDenkstar

No. 1 Try to remember something using bubble words, to do this, remember the words that appear in the app and are displayed in a brain

No. 2 Then try to create a meaningful connection to the words, that means that you link the words The car has tires together, for example, that would have been a statement in this case No. 3 Once you have done that, ask a question about the statement, which you then speak into the linked statement compilation by voice

No. 4 Now you will be shown a suitable video or picture that answers the request or question

No. 5 Now save the video in a brain half where a blank field is visible, the video is now marked with a colored vector point

No. 6 If you now touch a colored vector point, you will be shown the video that answered your question

No. 7 Now put together suitable words again and link these bubbles to a statement that you like or that perhaps makes you think

No. 8 Follow the principle just mentioned to place a new colored vector point in the brain, which will then answer and show you your question using a video

No. 9 Try to create as many colored vector points as possible and place them in the blank fields of the brain

No. 10 If you have completely filled the brain with the colored vector dots and used up all the free spaces, you can submit your brain to the late night show, the original Denkenstar for television

No. 11 In the late night show, your brain will be selected by luck after the submission, and then several different people from the audience will be sought and selected who want to take part in this quiz show

No. 12 The brain is shown on the touch display with its colored vector points, the selected people from the audience must now choose a color and then, when it is their turn, they are shown the video of what is behind the colored vector points

No. 13 Now the chosen person from the audience has to ask the right question about the video. For the right answer, he is credited with a certain amount of money depending on the level of difficulty. For every wrong answer, he has to choose the next player. If you have already earned an amount as credit and give an incorrect answer, this amount will be deducted from you again depending on the amount of money. The aim in this round of questions is to solve all the colored vector points of the brain and ask the correct questions about the videos. May the better questioner win this game and win the day.

, the above

No. 517 Mr. Poppin

No. 1 You must try to control a character called Mr. Poppin, this character tries to develop a piece of music by linking building blocks, the development works as follows

No. 2 Mr. Poppin tries to create a beat on a grid of rectangular buttons, he does this by touching the button sensors with soft, medium, hard touch, he touches the first button with a soft state using finger pressure, so 6 vector points appear in a circle around the first button, in these vector points there are digital instruments, such as piano, guitar, double bass, flute, violin, piano

No. 3 You then have to drag and drop your selected instruments into the button using soft, medium, hard touch. Once you have created a sequence, the button saves the sequence in its mind in different levels.

No. 4 Now select the 2nd button, as just described for the first button, this time select your 9 vector points including your selected instruments and save this in the button

No. 5 Now select the 3 button, this time with 12 vector points and its instrumentals and its print sequence, save them in the thought of the button, this divides your print sequence into levels

No. 6 Then select the 4 button and so on until you realize how many buttons you need to create your sound, which you can of course listen to after saving it in the button

No. 7 The trick is that the app now connects the buttons and their levels with each other and compares them and asks for your pitch. The integrated algorithm combines the levels that have been saved in the buttons and integrates suitable transitions for you to choose from. Choose the transitions you like or let the algorithm insert them automatically.

No. 8 Now you have to choose a suitable text to sing from the library and sing it, the app decides which layers with the generated transitions could fit the text passages and adds them as a sub-track over the sung text

No. 9 Now play the constructed song and refine your levels using letter analysis, which consists of vector points, by placing a letter in the levels and stretching and elongating it in different directions. By changing the levels in this way, the app guarantees you a fine tuning of the pitches, including the transitions and the instrument sounds that were added previously.

No. 10 After fine-tuning the letter analysis, you can now listen to your song optimized and compare whether you or the app's algorithm has done a good job

No. 11 Exchange your sound buttons with other users of the program and integrate other users' buttons into your composed piece of music

No. 518 Papparaptherapper

No. 1 You have to become the Papparaptherapper in this game or at least try to become one

No. 2 Try to sing the song with your microphone, as a karaoke function, in the right pitch, and use the virtual sound gun to put the words into the text blank fields on the display while you sing. This works when you aim the virtual sound gun at the text blank fields and fire a shot. Each hit is registered and you get points for the sentence sung at the right karaoke time and the hit on the text blank field.

No. 3 For the correctness of the sung pitches of the song to be sung, there are additional points that will be credited to your credit account

No. 4 Once you have sung the song completely and finished the karaoke function, you must now aim the virtual sound gun at the individual letters of the song and its colored, illuminated vector points. If you have achieved enough hits, you will receive bonus points.

No. 5 The letters rotate like a target and change as they rotate, sometimes they get bigger and sometimes smaller, make sure you aim your virtual sound gun correctly and target the vector points precisely

No. 6 Try to sing the song completely and then hit the vector points of the individual letters of the song text

No. 7 Finally, you can play the game with two people, one uses the microphone to sing and the other player uses the virtual sound gun, it may be that they have to take turns to do this, even while singing the game can stop and the other player has to hit the colored light-up vector points to continue

No. 8 Play in a team and try to make each other aware at the right time which player has to take over what

No. 9 Battle in multiplayer mode against other 2 opponents from the Internet and become a Papparaphtherapper

No. 10 In addition, in freestyle mode you can compose your own text using bubble words and set this as a goal for your opponent to achieve. In multiplayer mode, your opponent can also set you their own compositions of texts as a task.

No. 11 The game runs on time, collect enough points to unlock new songs, finally sing them with the mi-croalf microphone and hit the letters and their vector points with the Sound Virtual Gun

No. 12 In the bonus levels you have to fill in the missing words of the song with the correct words in the blank fields with soft, medium, hard touch in time to complete the song

No. 13 Exchange your sung songs in the music database with other users from the Internet and upload your sung song to YouTube or use your self-created freestyle song and, with luck, get many likes

No. 519 Runthehead

No. 1 You have to try to draw a box over a face that will be seen at random. The face with its big head spits vector points at you. You have to catch these with a net in the correct order (see scoreboard) and fill it in with mathematical numbers while you catch it in the air. To do this, you have to place the symbols for multiplication, addition, subtraction and division next to the face using a soft, medium or hard touch.

No. 2 Try to send the vector points back to the faces that randomly appear from boxes with the mathematical numbers, the faces receive the return, around their head and with the calculation symbols that you place next to the face, the opponent must now calculate the mathematical problem that is sought on the scoreboard

No. 3 If he doesn't manage it, you can pull a box over his head and thus deactivate him, watch out for the other faces that aim the empty vector points at you in alternating mode, be quick with the catch net and the implementation of the individual mathematical numbers that are integrated into the vector points and aim them back at the face or around the head of the face

No. 4 If the face manages to achieve the correct calculation, its head grows steadily and becomes larger and larger. Be careful that the head or your opponent does not calculate all the tasks correctly, otherwise you cannot pull a box over his head. The goal is to make the opponent's head so big that it bursts and then puts his tasks back on the display, which you then have to solve with the calculation symbols that are provided to you using touch and drag and drop.

No. 5 So give your opponent difficult tasks and hope that he cannot solve them correctly. New faces keep appearing, randomly selected from the Internet. You have to defeat these players until you can't go any further.

No. 6 Finally, train your memory and reaction skills with mathematical tasks and their calculations

No. 520 Colortwist

No. 1 You have to move a gangster in rotation to eliminate enemy troops, this means that you walk with him through Google Maps authentic locations, while you do this you can refine your gangsters with multipliers and form a troop by adding mathematical numbers, they have to use their rotation and turn methods to try to color other enemies that are walking towards them with vector points, this means that you have to shoot a selected group with color to color them, you have to aim the same colored vector points at the same color patterns of the enemies

No. 2 If you have colored the required enemy troops with the individual required color, you must now open a color portal and pull these colored enemies into it, this happens when you lay a vector path on the track or path that corresponds to the color of the enemies

No. 3 If you have laid the path and led the enemy troops along the path into the color portal, these enemies will disappear from your path and land in a capture color the flag game in a mini-game, later on

No. 4 Try to liberate the towns and surroundings from the enemy troops, for each liberated area you will receive a flag, which you then define as a conquest mark for your area

No. 5 Watch out for new enemy troops in new areas and environments that you have to conquer and color. Once you have sent the enemy troops through the portal, the game now switches to the offensive. Now you control the troops that have entered against other players in the game and try to conquer the other players' areas by overrunning the area with your team and destroying the opposing players' troops bit by bit, capturing their main headquarters and stealing their flag, and occupying the area with your troops. No. 6 Switch back to normal mode and wait for new attacks on your conquered bases and main headquarters that you had built, or continue the game and enter new areas after conquering the one nearby and try, as described at the beginning, to color the enemy troops and pull them into your portal through the vector point path.

No. 7 The game also runs on time, there are weapons and items to be acquired along the way and routes, conquer the unlocked areas in your area within the required time and place your flag there as the headquarters

No. 8 Conquer a whole state and ultimately the whole city, this is the final goal of the game

No. 521 Faithofgeiz

No. 1 in this game the ghostofmars tries to do the following to the richest people, no matter what the reasons and areas of the world's industries, his requirements and his job are to steal the money from these extremely rich people and give it back to the poorest. No. 2 He tries to get the money using various options of his skills, either he steals it from the banks of this world or brings them to ruin by manipulating the business branches, either through stock trading or by infiltrating the offices and branches where the extremely rich are located and do their business. No. 3 You have to integrate yourself as a spy, for example, in the company headquarters and from there on, manipulate them and try to control the internal processes of the business in such a way that you become the manager and then have the power to ultimately ruin the name of the company.

No. 4 Introduce yourself to selected and well-known companies, decipher the company code and erect a monument to the company, namely the derivation of corruption and the manipulation of trade in the business branches

No. 5 As in Mission Impossible, try to change and optimize your personalities in the best action manner, find the lousy business people and expose them so that everyone knows about your intrigues, spread the word and destroy the company through the people who stand behind you and support you, namely to uncover the downfall of the evil business people

No. 6 In this turn-based strategic action game in 3rd person perspective, you control the agent ghostofmars into the various groups of the industry branches and secretly build an agent office, called Rimba, here the Rimbatrans-lator.com is founded, which can decipher the language of the economic sharks in order to find out how the business of these rip-off artists works

No. 7 After your training, send your agents to the headquarters of various economic sectors and spy on the company philosophy at the highest level and decipher the connection between the economic sharks and their rip-offs by decoding the language of the economy with the rimbtranslator program and making it public

No. 8 Then build the improved empire of the economy with the people and improve the infrastructure around the world

No. 9 Ultimately, you have to control your agents simultaneously all over the world and play in deja vu mode, use your accumulated skills and become the king of the economy, this is timed and you have a whole year of real game time for it.

No. 522 Pengpon

No. 1 You have to trigger a bang and this works when you try to break up planets that fall on you with your harpoon, you also have to, when you break up the planets, then throw them into a basketball basket, if you first catch the broken up remaining planet pieces with touch in your basket and store them

No. 2 The basketball hoop appears in the middle of the playing field while you are crushing the other planets and you then have to hurl your stored balls or planet pieces into it with a catapult and place them in it. No. 3 You now have to try to trigger a pengpon, which means that while

you are crushing the other planets that are falling down on you, you also try to turn the crushed so-called balls, pieces of the planets, into the basketball hoop with your catapult. So you shoot with the harpoon at the bottom of the screen floor of the playing field and then run to the catapult in order to finally turn the warehouse of crushed planets that you have caught with touch and collected in the warehouse into the basketball. No. 4 If you hit all the crushed planets in the warehouse into the basketball hoop and do not let any planets smash to the ground, you will destroy all the falling planets in the air and win the level and move on to the new level with other planet constellations.

No. 5 In the next level you have to match the falling letters with the names of the planets using drag and drop, break up the planets and put the remaining ones into the basketball No. 6 The scoreboard shows you which planet letters have to be matched

to the planets with the perfect names first No. 7 The game also runs on time and hit rate, try to keep it and reach it in the required time and hit rate No. 8 Try to activate the

background graphics from your city generated by Google Maps as a mood during the game when you have collected enough points as hit rate in the game to achieve a nice game flow

No. 523 Ufomoon

No. 1 In this game you try to control UFOs and protect the moon from alien enemies

No. 2 The UFOs are controlled in the turn-based strategy game around the moon

No. 3 You must first create these UFOs on the moon, for which you are given a certain amount of time. No. 4 If the alien troops

attack, you are given time within a certain radius to position your UFO on their radar in order to hold your position and use your arsenal of weapons. No.

5 The aliens shoot at their UFOs with colored, glowing vector points, try to avoid them by

building barriers between the aliens and the UFOs beforehand.

No. 6 If the vector points still get through the barriers, they can try to stop them with their anti-aircraft system, they simultaneously shoot a letter at the colored vector points of the aliens in order to absorb the vector points

No. 7 If you have managed to absorb the vector points or a part, this letter will remain at the position where it absorbed the vector points

No. 8 If some colored vector points come through the barriers and hit one of your UFOs, they color their UFOs in a certain color, do not allow your entire UFO to be colored, otherwise it will go into the hands of the alien opponent

No. 9 Finally, you must try to color the alien ships and enemy troops with the letters you have submitted, from the position where they stopped, also by shooting at colored vector points

No. 10 If, for example, you have colored a ship but have not managed to color it completely, then it is the opponent's turn to color their UFOs to a certain extent. Of course, he will try to color your UFO 100 percent in order to then take possession of it. Prevent this by repositioning your UFOs each round.

No. 11 Ultimately, they must color all the enemy ships and troops 100 percent in their own color in order to gain the upper hand in the game and win the game by coloring all other alien ships and troops

No. 12 Be careful and take the most important routes and position your UFOs strategically and wisely in a good radius to the alien ships and troops, either near or far away

No. 13 The game is timed, each round has a certain time in which you can change positions and release the fire, they constantly build new UFOs to withstand the onslaught of enemy alien ships and troops

No. 524 Mindtotouch

No. 1 You log in to the app and receive a blank, animated graphic, as a brain to choose from, select your personal size, now you can start

No. 2 Speak to the bubble words, via voice message, that are suggested to you to start a topic, open your thoughts and your personal opinion to the bubble words and choose the appropriate categories from the bubble words

No. 3 If you have said some voice messages to the bubble words, the brain starts to think and work, the brain has a lot of free spaces and blank fields in the animated graphic

No. 4 After speaking to the bubble words, opinions now appear, touch these into the blank fields and free spaces in the animated brain, with drag and drop you insert the opinions created by the app into the free spaces in the brain

No. 5 Now start the brain by pressing a button and when you have completely filled the brain with the opposing opinions, question marks will be shown on the filled areas of the brain. Touch them with soft to get an easy question, medium to get a medium question and hard to get a difficult question about the opposing opinions collected by the program.

No. 6 Your goal is now to answer these questions and store the answers to the questions in the brain's database. Ask your best friend Google if you get stuck or search in an encyclopedia or ask the answer program Rimba, which can filter out the answers to your questions from the social video apps.

No. 7 Once you have had your questions answered and saved, you can now order the app as a board game to your home and play it with your friends

No. 8 Exchange your brain with other users of the program and learn from their thoughts and become smarter with your own confidence in understanding the other questions catalog

No. 525 Ghostofmars

No. 1 You must try to find and collect the spirits of the animals that lived on the planet Mars, controlled by an icebear

No. 2 Try to find these ghosts with the icebear character and a special radar and free them from their captivity in order to bring them back to planet Earth and all the animals

No. 3 With your special ghost radar, which shows you approximately the location generated by Google Maps, you can make the search easier

No. 4 The tracks lead to foreign areas and places, try to fill the radar to get to the right place

No. 5 On the way of the search, enemy troops appear on the planet, they are alien monsters that you have to stop on their way to finding the ghosts, with your icebear

No. 6 Try to disable these aliens with your character by influencing them with your voice and then using your paw technique to take them apart, in addition, the arsenal of weapons that you carry in your backpack offers you the necessary weapon power against the enemy monsters

No. 7 If you find a ghost, you must record it in your urn, this happens when you use letters as a karaoke function and say the sentence from your book to the ghost via microphone to charm him and keep him in check

No. 8 Once you have found the required ghosts and put the enemy alien troops out of action, you must now bring these ghosts that are in their urn back to the spaceship and feed them into the ghost machine to store them there.

No. 9 Also set up alarm systems and barriers around your spaceship to protect yourself from the nightly attacks of enemy troops

No. 10 If you have survived the attacks and no ghosts have been taken from you, then continue your search with the radar as a path companion

No. 11 Collect letters, namely the names of the spirits on the land and place of Mars, in order to assign these names to the spirits

No. 12 Be quick and easy on the go, your step counter must be constantly charged by walking in the real world in order to move forward and not stop

No. 13 Finally, travel back to Earth and bring the lost spirits back to the animals, then build a nature-based station with them and ultimately live in peace and community with the animals

No. 526 Freakball

No. 1 The level is divided into different shapes in circles, triangles, rectangles, squares, at each corner of the shapes there are colored flipper arms in different colors

No. 2 Try to control a freakball through these shapes with the flipper arms by hitting the ball in the directions and aiming to hit the vector points of the letters in the correct order and color combination

No. 3 For each hit you will receive individual and different points in time that you need and require in order to be able to play the game at all. Load your time credit account by hitting the colored vector points of the letters precisely.

No. 4 The letters rotate around their own axis in the shapes of the level and are distributed differently, always positioned differently for each level and distributed differently in the shapes of the level No. 5 Keep the time running and free

the letters from the colored vector points to then touch them together to generate the word you are looking for on the scoreboard, for which you will receive points credited to your account

No. 6 Control the freakball in the levels with the corresponding flipper arms, use the correct color of the flipper arm to color the ball in the right color and steer it in the right direction to the letter

No. 7 Collect points to get new backgrounds from Google Maps from your towns in a comic graphic to make the game more attractive, play in multiplayer with up to 4 people at the same time and control the flipper arms with the other players to hit the different vector points of the letters

No. 8 Collect items in the game while the freakball is moving to give it special abilities, faster, stronger, bigger, smaller, etc. These are special abilities to accept the special changes of the vector points and eliminate them

No. 527 Bankruptcy Vulture

In this app you have to save all the products that were bought in a shop before the price increase; the app compares the prices from the previous days of the week, from the past, present and future. The app has a needs scale with vector points to match your taste to your wallet and compare them correctly. An animated vulture in the form of a cartoon graphic automatically contacts you through the app and gives you suggestions for your future purchases and designing your home with the products you have bought that the app recommends to you to suit your wallet. The Broke Vulture warns you against making the wrong purchases and compares your well-being, needs and interests with the products from various areas of the product world that are offered in shops near you; it gives you the opportunity to choose and master tips for buying new products and selling old products in the future.

In addition, as a scanning device and function, it is always ready to find you the cheapest offer in real time when you scan a product in your store and provides you with an alternative, be it in the store near you or on the Internet as an option in the app. It gives you suggestions as to which products are offered at low prices and could harmonize in the future. Based on the ratings of your own vector point scale need schemes, the appropriate offers from the bankruptcy vulture will be shown and displayed schematically in the future. Have fun more more

No. 528 Booogaboga

No. 1 You have to control a character called boogaboga and try to collect all the types of fruit in this jump and run that are in urns in order to get points for it. With these points you can then unlock a new level, which is true to the original, in a comic-like graphic generated by Google Maps, and try to play through it. No. 2 Try to jump on the urns that are in the level and possibly shoot at them if you have collected the items for your weapon arsenal in the level.

No. 3 It is important that you control a changeable character who uses his skills to exchange masks that he activates in the game, leading to new special skills and appearances, this means that in certain passages in the game you have to activate a mask in order to create certain barriers in the game, for example, one mask gives him a faster speed, the other a stronger body, the other a better jump, the other a whirlwind, the other a larger or smaller body.

No. 4 At the beginning you have up to 6 masks that can and must change your character in order to activate certain properties, to ensure passages and barriers and the collection of the types of fruit that you need, in total there are 13 masks with different properties and special skills that lead to your individual character being equipped for the special situations.

No. 5 Try to destroy as many urns with the different types of fruit as possible in the level using your special skills in order to get to the fruit you are looking for, because without this important fruit, you will not get any points and will not be able to reach and unlock the new level at the end of the 3D Jump and Run level.

No. 6 Try to complete the level within the given time and use different vehicles to get through the level faster and better

No. 7 Ultimately, you have to pay attention to your pedometer, which you charge by running real kilometers in the real world in order to give the character in this game power, strength, to be able to control him at all. The steps are digitized in the game by the appropriate app and can then be used as run energy in the main jump and run game. If this runs out, the game stops and can only be played later when you have enough steps available and charged up again.

No. 8 Jump, jump and run through creative passages and paths in the level and collect the necessary types of fruit to gain access to the new level or to unlock it, use your masks skillfully and transform your character with the special skills to successfully master and complete the passages in the game that await you

No. 9 Ultimately, you have to master all 130 levels, which are based on Google Maps and faithfully correspond to the landscapes of your chosen region, and find the remaining transformation masks to complete the bonus levels. Find the masks and play them in co-op mode with another player to play through the game in reverse.

No. 529 Thefroghouse

No. 1 In this short massive multiplayer game you try to simultaneously control frogs in a house and with them collect different shapes of colored vector points and suck them up with your tongue

No. 2 Hitting the vector points is not easy because the opponents who generally generate these vector points are randomly selected smartphone users who shake their smartphones in real time to play and thereby distribute these vector points in the frogs' house

No. 3 They have to suck up the generated vector points with their tongues, and to do this the controlled frogs turn into stars that other randomly selected people on the Internet have to click on with their smartphone using soft, medium, hard touch and then pull out of the display in order to clear the frogs' villa.

No. 4 If the frogs' house is finally cleared of the colored vector points and stars, the best players will receive a voucher for the villa to spend a weekend there with their loved ones

No. 530 Beermouth

No. 1 You have to try to bring bottles of beer from different and different manufacturers as high as possible in a given distance, which means that in this jump high game you have to transport at least 33 beers to the highest level and level of the level design by means of flipper arms that are docked on the sides of the level

No. 2 On the way up, you have to avoid different types of vector points and keep control of the bottles of beer so that you can bring them to the highest level. When you reach the highest point, a throat and a face open, which accepts the bottles of beer and opens its mouth for consumption.

No. 3 The face (selfie) must then be tapped with soft, medium, hard, touch to open the mouth or throat, in order to open the beers which have then reached the correct height in the air, also by touching the beer mat and finally pushed into the mouth using drag and drop to get points. No. 4 Use the flipper arms positioned on the sides and in the level to transport the bottles of beer, one by one, up to the

highest point and directly into the mouth of your face. Once you have transported all the different types of beer offered by 33 manufacturers, you will receive a QR code to redeem a full case of your favorite beer in your nearest drinks market, free of charge.

No. 5 The game is timed and based on a certain high score. If you manage to reach the required points within the given time, you will receive the QR code described above for free to redeem your favorite beer.

No. 6 Try to avoid the flying vector points and transport the different types of beer upwards to the target, namely into the mouth of your own selfie picture. If a vector point hits a beer, it shatters and becomes unusable for further play. You start the game with a low level of difficulty, which means with a maximum of 130 beers that are made available to you in order to transport at least 33 of them into the mouth of your face at the highest level.

No. 7 Also collect the names and letters of the beer manufacturers while flipping the beers in the air to get more points and ultimately get closer to the given score

No. 8 The background graphics for this high jump game are created by you, either from your own room photos or from an original, Google Maps generated landscape or town

No. 531 Talkinggreed

No. 1 You have to become the king of the mini games in this late night show, which means that you try to bring the game Mario Party into the show in real life performance, at the same time the participants, who were selected from random generators after registering for this late night show, have to submit questions to the live TV viewers while they have to imitate the mini games from Mario Party in the late night show

No. 2 The show is linked and connected live with TV viewers, the participants of these mini games have to ask random TV viewers questions, who in turn have to answer them correctly in order to unlock the next mini games, which are taken as a reference from the game Mario Party

No. 3 The participants of the mini games must try to get into the next mini game by getting points after imitating the audience and still digitally performing the game they have just played

No. 4 The aim is to interact with TV and audience viewers, which will be implemented in the broadcast

No. 5 The mini games for the respective broadcast are determined by voting by post and selected in secret if the consent of those who want to take part can be guaranteed

No. 6 In each show, a maximum of 13 mini games of the super hit from Nintendo, Mario Party, will be imitated and performed by the participants

No. 7 Finally, the TV viewers, who are broadcast live on the show, have to answer questions from the participants in the show in real time in order to unlock the next mini games for entertainment, talk to the TV viewers via microalf buds head phones and receive the answers to your questions, which are then in the carousel at the end of the mini games and, if they are correct, pay out an individual amount of money to the participants

No. 8 During the live broadcast, the audience can participate and join the mini games by choosing and agreeing to a team when they are selected by the moderators. No. 9 So, in the live broadcast, the participants can be swapped for the audience or certain people selected by the moderator can be implemented.

No. 10 There are 4 teams consisting of 3 participants who have registered as described above, they compete in the Mario Party games, then compete against each other and interact live with the TV viewers and can also be replaced by the selected audience members in real time if necessary

No. 532 Alfmacdu

No. 1 in this app, for a restaurant, select a category, for example, comedy, action, romance, sci-fi, drama, music, etc. There are of course more to choose from, once you have selected the category, the app will use its imagination and creativity to suggest a dish that you can refine and optimise to suit your wishes, this will be shown on the smartphone display and presented with the 2D and 3D view and demonstrated according to the principle of production

No. 2 Try to incorporate your ideas for the creation by understanding the scheme of the app, the creation can be digitally refined and optimized by you personally in any view using emoji ingredients, let your creative diversity run free and enter your optimizations when creating the dish to see in the 2D and 3D view what the final product will look like

No. 3 Use the ingredients world map of the app to see which ingredients are suitable for you and drag and drop them into your digital creation or use soft, medium, hard touch

No. 4 Once you have linked and adapted your creation with the one presented by the app, you can now integrate it into your database and save it for later use and later use it to finally order it in the alfmacdu restaurant and have it made for you or you can lend a hand and create your creation and the app's suggestion yourself with the help of the staff

No. 5 Once you have done that and have your creation data, you can order it and have it sent to your home, enjoy yourself and try the dishes you have created with the help of the app

No. 6 Exchange your ideas for creating food with other users of the app, make a deal with the user and create your jointly developed dish in live mode with your new partner in real time and with the help of the app's categories and the ingredients world map, which you can of course save in your personal food database at any time

No. 7 Finally, you invite your friends to the alfmacdu restaurant and send your saved food creation or playlist of the creation via NFC to the employee or waiter there and wait for your order. Of course, you can also sit at a surface table in the alfmacdu restaurant and put your food together live and use the emojis to put together the ingredients from the world map and finally place the order and, upon request, search for the ingredients in real time in front of the kitchen according to the tutorial created by the app and lend a hand yourself.

No. 533 Turnmeintocrow

No. 1 In this short mini game you control a crow that tries to catch apples using the functions drag and drop and soft, medium, hard touch. You have to catch the flying apples that are in different sizes and colors with the crow try to

and then shape these apples into a certain shape, be it a circle, triangle, rectangle, square

No. 2 These shapes appear when they have collected the given apples on the display board in their individual colors and sizes in the air. The collection works by pulling the crow onto the apples with its finger and trying to place them in its raven mouth with soft, medium, hard, touch.

No. 3 Small apples must be clicked with soft, medium with medium, and large apples with hard touch with your index finger, then drag and drop these apples, which are given according to the scoreboard, into the raven's mouth

No. 4 Once you have stuffed the mouth, you must place or set the collected apples in a shape that appears, in this example in a circle. In this circle there are color-coded blank fields. Use its mouth to guide the crow near the blank field and let the correct colored apple from its raven mouth into the colored field. The whole thing is made more difficult by the rotation of the shapes, which rotate on their own axis and sometimes disappear. Remember the position of the colored blank fields and drag and drop the apples from your raven mouth into the required ones.

No. 5 This is all played out against the clock, for each coloured, correct and placed apple in a blank field, you get one second credited to your time account, make sure that you have enough apples in your raven's mouth, because time is running out for you, you also get points for each apple caught and a bonus point added to your score for each apple placed

No. 6 The aim is to catch all the apples with their different colors and sizes in the air or on the display in the raven's mouth and place them in the different shapes that appear in order to gain time and points

No. 7 If you have correctly positioned the apples in the blank fields with the correct color, for example 3 yellow ones next to each other, 4 red ones at the same height or 2 diagonally and 3 one below the other, you will get a combo, these apples are then linked in a row and correctly placed color combination and then dissolve on their own, see candy crush

No. 8 If you have placed the complete shape with the apples and the color combination in a row, the shape will dissolve and you will receive a combo point bonus

No. 9 The background graphics are provided from Google Maps generated landscapes, from their own environment and interact with the apples that are in the air, sometimes the background swallows the apples and then spits out several in different colors and sizes or whirls the apples individually in different directions, there are many ways that the background uses to make it difficult for them to catch the apples

No. 10 If you meet the required time limit, solve all the shapes and reach the required score to move on to the next level, No. 11 In multiplayer mode, up to 3 Internet users can

simultaneously hunt for the apples with their own ravens and achieve the required goals in real time.

No. 534 Beasibe

In short, the app is about you trying to choose a passage from a film or music piece in this social media app after selecting a category from the film and music industry, be it comedy, action, romance, music, drama or any other that comes to mind, and then choosing a passage from a film or piece of music and emulating it. This means that you choose a film or music passage, in this case a funny one, from the app's integrated film and music database and then try to recreate it. You are nevertheless offered several options of different texts to choose from, which you then use with your own representation of the selected film and music passage. Study the original film or music passage you have chosen from your selected category and cover it with the app's suggested texts and sound effects. Record your individual view and cover the film passage with your own style, and also ask bubble questions for the users to make it more interesting. Start a quiz for the people using the app, with your form and your perspective on the scene you re-enacted, the previously selected original film or music passage. Share your covers with other users of the app and get new inspiration from other cover videos.

No. 535 TheOnez

No. 1 You have to try to control a character who can travel through the future, he has the task and goal of tearing through time portals in order to master various quests and challenges

No. 2 They are located in a main headquarters or base, where they then gain access to other worlds through these portals, for example they have access to Mars, the Moon, Jupiter, Venus and the other planets of the solar system

No. 3 By accessing the time portals you have the opportunity to travel to these planets, on each planet there are exciting quests and challenges waiting for you, which you must then complete

No. 4 You must try to eliminate enemy troops on every planet you can visit in order to get to the specific energy modules that you must search for and find

No. 5 These energy modules are very important for the further course of the game, they are needed to equip your spaceship with them, the energy modules are necessary so that you can put the spaceship back into operation in order to be able to travel through galaxies

No. 6 Each planet in the solar system that you want to visit has different conditions and looks different in terms of structure and landscape, you have to move through different directions and paths and eliminate light, medium and heavy enemy troops

No. 7 Exciting adventures await you, which you will experience in order to find the energy modules

No. 8 in the best 3D first person shooter style you start searching for the energy modules, for this you have a radar that shows you approximately where these energy modules are located

No. 9 These energy modules are usually scattered on the respective planet or are located in base stations that are protected by the aliens

No. 10 With their weapon systems to be found on the way, they are well equipped and have the necessary power to reach and conquer the enemy and their base stations

No. 11 The game is timed and you must reach check points to save the game to a certain point, from which point you can start again if you are killed by the aliens

No. 12 To get an energy module you must first find it and then unlock it, this happens when you find the correct vector points and letters in the game, collect them and then transfer them to the energy module

No. 13 In this game you also have to make sure that other players in the game do not find your colored vector points and letters first or steal them from you

No. 14 On the radar you can also see where these colored vector points and letters are located, make sure not only to eliminate the aliens, but also the other players in the game who are trying to take away their colored vector points and letters

No. 15 In this 3D first-person massive multiplayer game, you also have the opportunity to take away the colored vector points and letters from other players. To do this, you simply have to eliminate these players with their found weapon systems.

No. 16 If you have managed to activate the energy module you have found with the found or fought for colored vector points and letters, you only have to bring it back to your headquarters by visiting the portal at the right time, which will bring you back to the headquarters.

No. 17 You have a certain amount of time to reach the portal, as it closes again after a certain amount of time, so be quick in your search for the energy modules and do not let yourself be caught or stopped by other players in order to avoid getting involved in fights

No. 18 Find the required energy modules on the various planets and bring them back safely to your headquarters to equip your spaceship with them. No. 19 You have to switch between the planets, because the energy modules have to be collected in a special form and order that is determined and important for activation, this means that you need, for example, 3 energy modules from Mars, then 4 energy modules from the moon, then 3 energy modules again from Mars, then 4 energy modules again from Mars and from the other remaining planets in your solar system.

No. 20 Follow the order of collecting the modules and constantly charge your energy bar with the energy modules you find to ensure that your spaceship is ready for your next adventure in the alien galaxies

No. 536 Bayonplant

No. 1 You must try to penetrate the aliens' territory with a small, individual, self-designed character group, the area is a bay and far away from their base

No. 2 You must fight your way through the existing area and steal the weather energy module from the aliens, the weather energy module is used to control the weather and must be returned to their headquarters and installed in their machines

No. 3 You must lead this module through battles with the appropriate weapon systems, with the aliens, to put them out of action in order to get to the energy module

No. 4 Once you have reached the bay and pushed back the enemy troops in this turn-based and timed game, all you have to do is steal the energy module and remove it from the alien machines and deactivate it

No. 5 On the way to the energy module, you must collect important colored vector points and their letters in order to use them to deactivate the energy module or to unlock it from the alien machine.

No. 6 Each round in the game you have about 30 seconds to move and destroy the alien enemy troops, each of your characters has an individual arsenal of weapons that he carries with him, on the way to the main headquarters of the aliens, there are still many weapons items to collect in the area, pick them up in order to keep the individual alien enemies at bay or to destroy them.

No. 7 Once you and your team have reached the main headquarters, you must now activate the collected colored vector points with their letters on the machine in order to get to the weather energy module

No. 8 Finally, bring it back to your station and install it in your weather machine and activate it. After activation, you can now control the weather for a short time and use it to water your garden, where plants are located, with the rain and make them grow with the sun.

No. 9 These plants are important because they provide protection and are intended as barriers when the alien enemy troops invade them to try to remove their energy weather modules

No. 10 Every plant that is fully grown and well positioned has special defensive properties that you need to repel the alien enemies if they suddenly invade your home during the day or night

No. 11 Try to get the special weather energy modules as much as possible in this turn-based strategy game to turn on the weather specifically for you and activate it for planting your plants that you collected on the way home from the alien headquarters

No. 12 Make an effort and pick up the plants, take them back to your headquarters and activate them with the growth and weather function of thriving, through the stolen weather energy modules and then use them to protect your headquarters

No. 13 Make sure that the aliens don't steal your plants and use your weather energy modules to equip their own headquarters, protect your area and its headquarters with your characters in switch mode, which is designed for 30 seconds per round, and defeat the enemy alien troops with your plants and simultaneously with your characters, which you can use in real time per round if they are not completely destroyed. Use different vehicles in the game to get to the alien bay faster, these are hidden, use the radar for this, which you have to unlock beforehand, and defeat the bay of the enemy alien troops

No. 537 Droptecat

No. 1 You have to do the following with a cat that you can create yourself in design mode, the tasks for the game are as follows

No. 2 Try to catch, process, link and use various objects with the cat you have created yourself using drag and drop and its cat paw

No. 3 You have to use drag and drop to put a letter together with its colored vector points, then you have to put mathematical numbers into the vector points so that the given result on the scoreboard can be solved correctly mathematically and using the subtraction, addition, multiplication, division procedures by another player who then pulls these numbers together to get the result.

No. 4 You have to touch the flying and moving letters in the air with soft, medium, hard touch to display the colored blank fields of the vector points, then drag and drop mathematical numbers and the symbols needed for calculations from your cat box into the vector points

No. 5 Then the player of this game has to use his finger to calculate these numbers, on the one hand the result, which the scoreboard will calculate from the numbers they have placed, which are in the vector points, using drag and drop to the correct number.

No. 6 You must touch all the letters one after the other and in the correct order and feed their vector points with the numbers from your cat box to generate a calculation for your fellow player

No. 7 You play simultaneously and in real time with your fellow players, which means that you only receive points, which are counted in stars, when you set the task and it is calculated correctly directly by the other player

No. 8 You switch your sides during the game and have to add touches and exchange the calculation functions with each other to get more fun and motivation in the game

No. 9 Ultimately, you have to reach a given number of stars within a certain time to get to the new level. The levels are graphics from Google Maps that work in the background and try to change the game in real time.

No. 10 You also have to collect flying items in order to use destructive objects in the air that come too close to your letter as weapons systems and to move the enemy objects out of the way and destroy them with the collected items

No. 538 Alfcometogether

No. 1 You must try to maintain a character named Alf, the alien in your digital room, this is done as follows

No. 2 You have to digitize your own room with the Alf camera, where you spend most of the day, this is done when you record your room with the Alf app and the special camera that the app has

No. 3 Once you have digitized your room, you can choose between 3 recording options, either 3D recording, 2D recording or 100% faithful recording in a comic-like style

No. 4 If you have chosen one of the recordings, you can now start the game, your room is now digitized and Alf suddenly appears and tries to ask you questions in your digitized room, either about the products you own or general questions about your everyday life

No. 5 Alf appears every day in your digital room on your smartphone and places individual bubble questions in different places in the room, which you then have to answer via voice message or text. If you can answer the questions within a certain time, Alf will enjoy it and tell you a story to keep you in the mood.

No. 6 If you do not answer the questions in a timely manner or if you formulate them incorrectly, Alf will fill your room with cat-like objects, which means that he will throw cats at you until the smartphone screen is completely full. Your task is to wipe these cats away from the screen to the edges of the smartphone with your finger and clear the screen of them.

No. 7 Once you have completely cleared the display of cats, Alf will slowly calm down and ask you exciting questions from your digitalized room the next day to prepare you for his own show

No. 8 After a certain duration of the game, about 300 days, they are ready to be drawn by him to take part in his own late night quiz show, they go through the face carousel and with a little luck they will then be drawn to take part in his show

No. 9 If you are lucky, you will be invited to his late night quiz show, Alf come to get her, where the answers collected from the users in the app will be integrated into the quiz show. If you want to keep up with the other 3 participants, you have to ask the right questions about the answers in order to receive Alf Dollars.

No. 10 The show is timed and Alf hosts the show, the winner with the most correct questions receives a certain amount of Alf dollars for each question category chosen, so the winner has to answer as many questions as possible correctly in a certain time to the answers of the users from the app in order to receive the most Alf dollars

No. 11 With these Alf Dollars, you can now continue playing in the next show or have them paid out to purchase Alf-like products for your digital room. You can view these in the app's online shop and integrate them into your digital room.

No. 12 The highlight is, when you have equipped your room with it, positionally correct and integrated into the interior design, the Alf lottery is waiting for you, this is always held at Christmas, here the best digital room is randomly selected by independent viewers and as the winner receives all the products in real life, delivered to your home

No. 13 Now children from all over the world can check out the great Alf products and their digitalized Alf room by registering personally, after careful review of the registrations, and visit you at Christmas to pick up a great Alf product from you and have it given to them as a gift

No. 539 Workthatmouse

No. 1 You have to try to control a mouse that has to collect various items as an update for its special abilities in order to better stop the hordes of enemy opponents

No. 2 You control the mouse in a bird's eye view 3D view mode and in the game you have to collect and find letters, vector points and different cheese pieces, the letters are important to open the closed rooms with the correct names that are put together, the vector points that are colored serve as ammunition in different forms for your weapon system, the cheese pieces are time points to keep the game going

No. 3 Control your mouse from the towns and areas generated by Google Maps, from your surroundings, which are faithfully recreated and transferred into the game

No. 4 Run around your area with the mouse and try to suck up or trample all enemy opponents, which may be monsters, gummy bears, insects, or destroy them with your collected ammunition and weapon items

No. 5 The whole thing is timed, you have to collect enough cheese pieces to top up your time credit account, which you need to kill the correct number of enemies in the given time

No. 6 Collect the letters needed to choose a word that is required for a suitable door to open into another area, and you must also select the door with the correct word to use the door as a portal to another room

No. 7 Collect weapon items in the game and the corresponding colored vector points as ammunition to generate your mouse with special equipment

No. 8 If you have eliminated all enemy opponents in the specified number and kept to the time and have entered another room through a new portal, the game continues until you have cleared all rooms of enemy troops. Once you have done that, you can start the new level generated by Google Maps with a new environment.

No. 9 Finally, you have to clear all the levels from Google Maps, which were generated faithfully to the original, in your area and vicinity, from the aggressive, hostile enemies, and respect the time and the number of pieces

No. 10 Play in multiplayer mode with up to 3 mice simultaneously and in real time and use them to attack the opposing monsters and other creatures in the original, faithful and recreated locations and environments generated by Google Maps near your village or town

No. 11 Use conquest flags to show that you have cleared the area and place it on your map on your state or county

No. 12 Make an effort and take the time to find and destroy all enemy troops, for each enemy destroyed you will receive points with which you can unlock new items for the game to be able to use them later in the game

No. 13 Switch the player mice in the game to keep the game exciting and attractive and to get a new game flow

No. 540 Doitidose

No. 1 In this app you have to try to push a coin tin as high as possible with flipper arms, on the way up you have to avoid certain objects that can block or destroy your coin tin, which you have created yourself, in the air

No. 2 After you have brought the coin can on the way from the left or right, lower middle or upper side, with the flipper arms, the coin can floats in the air, try to collect coins with it while it floats and flies, when you are near the coins, touch the small ones with soft, the middle ones with medium, the large ones with hard touch and drag and drop them into the opening of the coin can

No. 3 Your goal is to catch enough coins while floating to unlock new flipper arms while flying, up with the coin can

No. 4 Without the coins picked up, you cannot unlock the flipper arms that are located on the sides and in the middle of the display, these are used to jump the coin can or to shoot up

No. 5 If you miss the coins and don't unlock any new flipper arms, it will become increasingly difficult to keep the coin can in the air or to let it float

No. 6 Try to collect and reach the required amount and number of coins, for this you will receive time points for each section, credited to your time account, the game also runs accordingly on time, if you do not make it to the checkpoint, you have to start again from the last one

No. 7 You also have to avoid falling letters and vector points. If you hit them, you will lose the contents of the can, namely your coins, which you then have to collect again in order to get or unlock new pinball arms in the game in real time.

No. 8 If you have mastered a certain and predetermined height of the route and height, which is made up of authentic Google Maps generated backgrounds of landscapes and areas, the game saves this checkpoint, from there you can continue again if you fail to get to the top with the coin box or if it falls down or is destroyed by the letters or vector points.

No. 9 Finally, you have to reach a certain height and put the collected contents of the can, at the very top of the bridge, into a coin machine to unlock the next level

No. 10 To reach each level, there is a specific requirement that you must fulfill, you must give the required number of coins above to reach the next level

No. 11 The background of the game interacts with them and can offer advantages and disadvantages, it interacts with the flippers and the coins or the letters and vector points that are in the air or floating

No. 12 In multiplayer mode, try to transport several cans to the top of the goal with several games and put the collected contents of the coins into the coin machine to ultimately get points, crack the high score and become the can master

No. 541 Stickwithme

No. 1 You try to build different pens in different colors and shapes on top of each other and thus reach a required height at the final destination

No. 2 Try to set struts to the side, left and right, so that the pins get a static, you are at risk from falling vector points that fall colored onto the colored pins and could fall from any side of the display

No. 3 Therefore, touch the vector points with your finger and move them out of the edge of the display when you click on the vector points with soft, medium, hard touch and drag and drop them out of the display to prevent the colored pens from being hit with the same colored vector points.

No. 4 Place pins on top of each other and protect the statics with struts on the sides of the set pins, as anchors place letters with vector points between the pins

No. 5 Drag the vector points of the letters onto the pins to use them as anchors so that they do not remain unstable and do not fall down immediately

No. 6 The game is timed and has a predetermined height that must be reached in order to reach the next level. Be careful and careful when placing the pins on top of each other. These are available in individual colors and sizes. The anchors with the letters must match the color of the pins with the various vector points in order to activate and improve the statics.

sern

No. 7 Or touch the enemy colored flying vector points into the blank fields of the letter vector points to activate and unlock them later in harder levels so that you can use them as anchors

No. 8 In multiplayer mode, you play with several people simultaneously in real time and try to place one pin per person. Each player can take turns and after each placement, it is their turn again. The number of players is limited to 6 people at the same time.

No. 9 Build up the required height with the pins and use the acting background of the game to get advantages or disadvantages in the game with the interacted background.
men

No. 10 Once you have reached the required height and the number of pins, you can now start the height climb again in the new level with your individual design.

No. 542 Beeniehana

No. 1 You have to try to control a bee and try to capture several different bees that are in its vicinity and combine them into a swarm

No. 2 You then assemble this swarm when you use the bees with drag and drop and soft, for small, for medium, for large, hard touch

No. 3 You need the bee swarm to remove the opposing insects from the playing field by using the swarm to control the insects, use the mathematical calculation symbols to add, multiply, divide or subtract the swarm in sequence when you reach a checkpoint goal with an individual number

No. 4 The enemy troops are on their way to you, you must also defend your hive by collecting letters with vector points on the way to the main headquarters of the hive and thus strengthening and expanding the network of the hive. No. 5 On the way to the hive, try to overrun the enemy insects and destroy them with your swarm by picking up the bill symbols on the way to the hive and increasing or decreasing your swarm more quickly.

No. 6 At the end of the path, you must send the approximate number of your bees to the hive so that the calculation of the free spaces in the hive works out. If you have transferred too many bees to the hive, these will remain and you must then take a new path and allocate the new hive with the remaining bees so that they are perfect and no bees are left over. Find space in the hive. Watch out for the insects that want to reduce their number from the collected swarm at any time. Watch out for the calculation symbols in order to get the correct number of spaces in the hive.

No. 7 Defend your hive and go from now on with a new path to a new place, hive that is not yet filled with bees, watch out for the enemy insects and destroy and annihilate them on your way there

No. 8 Use the collected letters with their vector points to expand and consolidate your found beehive at the end, insert honeycombs into the vector points and create new space for your remaining bees that are left over along the way

No. 543 Jellypream

No. 1 You buy a Haribo candy pack of your choice in the supermarket, for example, then scan the QR code of this individual pack with the jellpream app

No. 2 After scanning the QR code, the game starts automatically, it is about the original gummy bears from their packaging, after the Tetris game has to be played, they try to dissolve all the gummy bears and play the game like Tetris, only this time as a symbol of the gummy bears

No. 3 You have to match the different gummy bears with their color and size, to each other, vertically, diagonally, linearly to the appropriate color and size, see the game Tetris

No. 4 The falling gummy bears change their size and color individually while falling. Before they land on the ground, guide them in time to the other matching gummy bears and switch them in the air to the appropriate position and colors and arrange them in the correct position next to or below each other.

No. 5 Once you have dissolved all the gummy bears, you will be credited with points. Collect a certain number of points to receive a voucher for an individual Haribo pack with special gummy bears.

No. 6 Buy yourself another pack of Haribo in the shop, but this time a different pack of Haribo and try to play through it as described above after scanning the app, but this time with different gummy bears than before, as there are many different types of Haribo, the jellpream game will never get boring

No. 544 Gogogadeto

No. 1 You have to try to control a character who has a rotor on his hat for flying, you have to run with him and build up speed in order to then take off into the air, which means that you have to land with him on a certain position in the world generated by Google Maps from your surroundings, on a certain place

No. 2 Run a route and take off into the air, hover as far as possible to the specific target and land on the vector points, finally, if you have managed to do it and have landed on a specific vector point, you will be credited with points for it, the goal is to fly to a target at an unknown location and land on it, which you then mark with color to mark your territory

No. 3 In multiplayer mode you have to reach certain targets from the air and color the landed place with your colors, then it goes into the open world, try to reach your specific areas and color them in order to determine your territory.

No. 4 In the air you collect some individual items for your protection, namely an arsenal of weapons that you will need when other players try to take over your territory or try to shoot you down from the air

No. 5 In this massively multiplayer online game, the goal is to fly over the most areas and color them with your color at the destination to mark that it is your area

No. 6 Try to color the landscapes and towns so that they get a higher percentage value than your opponents, protect your territory and eliminate the enemy opponents and fly to the foreign territories of the other players and color them with your own color and put up a flag to show that it is now your territory

No. 7 Try to fly to individual locations that are not yet colored and ultimately land on the colored vector points as a target to get points. With these points you can buy additional items and integrate them into the game.

No. 8 Create your own character in design mode and fly in unknown ways, to places and landscapes that you have never been to before, watch out for enemy troops and destroy them in simultaneous real-time play with your own assembled arsenal of weapons

No. 9 Also collect important letters in the game and use them to name your areas on the open world map in order to verify them and mark them personally

No. 545 Brainblitz

Use the brainBlitz to color-code important passages on the Internet according to importance, then send the vectorbots which try to collect the important information from Internet sites all over the world according to the colors. The vectorbots then look at which colors they can find and divide them into categories. These categories then ask the appropriate and individual questions about the collected information in order to filter out the correct answers from the text passages.

Select a vector color from the color spectrum of the circle, in RGB color scheme, and you will find the internet pages that are then listed where you can find important information about the question you asked by voice. Then click on the brainBlitz app and the app will show you the most important information found about your personal question, which was categorized by color by the vectorbots and verified with other topics from internet pages. You will now receive a list of the information you are looking for, displayed using the color spectrum you searched for and entered. Select your color and on the internet page, the question that you previously asked by voice will now be displayed under the appropriate colored article. Put your individual questions under the appropriate article and have them answered by users from the internet via live chat. Save the answers in the database and stay informed if you don't know what you want to know.

No. 546 Madisonbay

No. 1 You must try to equip a building or a house in such a way that there is enough interest in it, which means that you create this digital house in design mode and equip it with interesting products

No. 2 If you have put together your personal house in design mode and put interesting products in it, you can now have this building inspected by guests in this tycoon game. The simulation guests who visit this house first get free entry and can let off steam in the house and inspect the products in 3D mode. The highlight is that the products come from the eBay catalog and the guests are participants from the real world who have registered for it.

No. 3 You must search for the products on eBay beforehand and place them in the right places in the house in design mode and give them a price that will be verified by eBay

No. 4 If you have invited some participants and taken them into your house, you can view it from the outside and examine it from the inside in 3D mode. If you are interested in the products on offer, you can click on them and you will be redirected to eBay. The products will either be sold as a fixed purchase or auction. You decide for yourself which option you want to use as a guest.

No. 5 If you have opened your personal house products sale and have attracted enough participants, you will receive points for it and you can use these points to expand your property as a tycoon and make it available to other builders. As participants, they can build a new house next to you using the same principle and equip it with products on the outside and on yours and use it to create a flea market in the sense of sales and purchases.

No. 6 The goal is to build a village and position houses in the immediate vicinity and equip them with digital products, then make them available via eBay and collect points to build other facilities and become a tycoon of the game

No. 547 Makelovemore

No. 1 You have to try to complete a route of your choice from Google Maps on foot. On the route there are digital hearts available at certain places that you can point to with your smartphone if the radar shows them. Collect these individually hidden hearts and integrate these collected hearts into your dating app. This means that you have to search different routes in order to catch a certain number of hearts with your digital catch net. No. 2 If you have collected enough hearts and integrated them into your dating app, you can now use the face carousel to try to distribute these hearts to individual people that you liked at first sight in order to impress them.

No. 3 Some faces need several hearts as an invitation to talk to the stranger, so go out and collect these hidden hearts with your smartphone, which are either hidden by the app on Google Maps or positioned by the singles in your area on Google Maps

No. 4 In addition, they must have covered a certain distance of kilometers and collected certain hearts in order to unlock an individual face that they like on the face carousel for a conversation

No. 5 If you have activated a face for conversation, you can now have a conversation with your face via voice or text messages. After a successful conversation, invite her to capture the special hearts hidden by Google together with your smartphone in the real world by walking together on a route selected by Google.

No. 6 If you have both been hunting and have both found the required number of special Google hearts, you will receive a gift from Google in the form of a voucher for a romantic meal in a restaurant, free of charge and near the hearts you have collected.

No. 7 Fall in love either while searching and hunting for the hearts hidden in Google Maps, while walking or during the romantic meal and stay together as a happy couple for eternity

No. 10 If you have managed to reach the goal, you only have to slide through the gate and reach the end of the track with the required number of points that has been set

No. 11 In multiplayer mode, you slide down the mountain together with other users from the Internet and slide on the lightning ice track,

No. 12 Try to be among the top 3 out of 10 players to get into the points rankings, try to deceive your opponents from the track with collected items and transport them from the ice track to finally get into the points rankings

No. 549 Electrodog

No. 1 You have to try to control a character called Electrodog, whose task is to free your best friends, the Cat Gang, with a special arsenal of weapons, which you have to collect at the beginning of the game.

No. 2 With your Electro Radar Detector you must first collect your items in this game world in order to improve and activate your weapon arsenal

No. 3 You must use your electrodog to dig up the items indicated on the radar from the ground in order to use them afterwards

No. 4 Once you have found your items and optimized your arsenal of weapons for your fight, you must now set out to find the main headquarters of the enemy dogs

No. 5 You climb mountains, difficult passages, barriers with your electrodog and have to use your 2nd radar to orient yourself. If you are near the main headquarters of the enemy vectordogs, the 2nd radar will give you an alarm.

No. 6 It is best to spy on the town first to make the enemy vectordogs visible on the radar. Once you have spied on the town and got a position on how you want to attack, then save the route with vector point paths on your radar.

No. 7 Finally, they attack either early, noon or night and try to challenge the opposing dogs, with their back-mounted electro weapon systems they have to incapacitate the opponents, which means that they first have to bark at them so that they can become aware of them

No. 8 First bark at the opponents in single combat to attract their attention, then try to disarm the opponent who is shooting you with colored vector points, this is done by using your various electro weapons to absorb the colored vector points of the opponent in the air and while they are being shot at, with the correct color of your weapon.

ren

No. 9 If you have absorbed all the ammunition, i.e. the vector points of the opponent, and have not let yourself be hit too often, because every hit from the opponent takes energy from your life bar, then it is time to attack the opponent in close combat, then go into close combat and try to defeat the opponent with your close combat weapons.

No. 10 You can also, if your weapon allows it, destroy him from afar with your electro weapon systems, pay attention to your own ammunition stock, this drops rapidly if you fire too many electro shocks at the opponent, through the absorption of the opponent's vector points, your ammunition display still grows

No. 11 If you have spied on and eliminated some enemies, you will receive time points credited to your time account, which you will need to free the cat gang from the main headquarters of the enemy vectordogs

No. 12 If you have earned the required time points, you can now attack the headquarters and try to free as many cats as possible, fight with your special skills and weapon systems against the enemy in their headquarters, free the cats from captivity and receive a special point for each cat saved

No. 13 After the liberation, protect the cats on their way home to your own headquarters and fight against other enemies that appear, try to bring as many cats as possible home safe and sound

No. 14 If you have freed the cats and destroyed all enemies in the first enemy headquarters, you will receive points for this, which you can then use to expand and optimize your own headquarters or to expand with it.

No. 15 Try to build a powerful headquarters of your own and attack all enemy headquarters and free all cats that are in captivity. With the points collected by freeing the cats, you can expand your headquarters and equip it with powerful weapons in order to avoid and hold out against an attack that usually happens from the opponents.

No. 16 In multiplayer mode, 2 sides fight each other in the game, the electrodogs against the evil vectordogs, the aim is to free the most cats from the main headquarters in a certain time and bring them to their own, in the ego or 3rd person perspective, they have to free a required number of cats in a certain time and guide them home and color the enemy area with their own color to mark their new territory

No. 550 Catdoad

No. 1 You choose a specific and favorite head from a category of superstars, which you then order and put on your body slot at home

No. 2 For example, if you have chosen a head, in this example Taylor Swift, and placed it on your body slot at home, your figure will now begin to communicate with you

No. 3 You connect the figure to your smartphone and use the associated app catdoad to select your configuration for your weekday

No. 4 Let's assume that it is Friday, you select the day of the week and a conversation category that is available in the app that suits your head. Once you have selected a conversation category, the figure starts talking to you about the topic. The figure is a bluetooth box and gives you the beginning of the conversation with funny questions from the app database.

No. 5 You answer the individual questions and receive an answer from your personalized character, in this example Taylor Swift with original voice, via sound

No. 6 You can also think of your own questions and ask the figure, this figure is linked to the Google and Bing ki system and answers all your questions via sound playback with the voice of your favorite star that you have acquired, through the Bluetooth sound function from the head of your figure

No. 7 The purpose of catdoad is that you now have a conversation partner who can talk to you individually at home and answer your questions, exchange information with the character on a daily basis and save it in your weekly lists as a note and play these conversations to your friends

No. 8 Take your Superstar figure head to your friends and exchange it for another one, or order the original face and head adapter of your favorite Superstar to communicate with the real voices of the Superstars

No. 9 Since the figure asks them individual questions and they can answer them, they can now, if they have answered a high percentage of correct questions, call this superstar figure via Instagram function by voice or phone call or leave them a message. If they are lucky, they will get a real spoken answer to their message from the superstar figure on their message on the appropriate weekly topic that they have addressed. They will now become new friends through the superstar figures and will share more messages with each other in the future.

No. 10 Exchange your Superstar recordings with other users from the app in the online shop and enjoy having spoken to a Superstar in person, or through the Superstar figure

No. 11 In short, it is a figure Bluetooth box with what's app or insta voice function

No. 551 Electrorobot

No. 1 You must try to control a character called electrorobot, whose task is to reach foreign planets with a spaceship and free colored people from the hands of evil aliens, search through the galaxies with your spaceship and use the radar to search for planets where colored people might be. No. 2 Try to free the people from the captivity of the evil aliens, but first you must destroy other enemy spaceships with your spaceship in order to be able to land on the planet with your spaceship.

No. 3 You must use your weapon systems from the spaceship to fire on the enemy spaceships and to circumvent or destroy them in order to find a perfect landing spot on the planet. The planets are guarded by alien spaceships, which you must destroy first in order to then find a landing spot.

No. 4 If you have found a planet on the radar with colored people and destroyed the enemy spaceships on this planet, you can go to the planet to land

No. 5 Find a perfect landing place that is not guarded by the aliens and land your spaceship on the planet

No. 6 Now try in the 3rd person or ego perspective to guide your electrorobot through the landscapes and towns. areas of this planet using your radar and try to eliminate the enemy positions of the aliens, use your radar to search for the corresponding main headquarters of the aliens and check there whether there are colored people there that you can save

No. 7 You only have a certain amount of time to free the people, as the approach of new enemy supply ships is approaching

No. 8 Also collect energy modules for your spaceship in order to put your spaceship back into operation later if you have not found the colored people to leave the planet with the spaceship again

No. 9 If you have found some main headquarters where there are colored people, you must now free them and eliminate and destroy the enemy alien troops that are holding them captive. Time is running out, so don't stay on the same planet for too long and search the other galaxies for the colored people. Some planets are easier to design and some are programmed to be very difficult. No. 10 So search intuitively for the required colored people and bring them back to their spaceship. If you have freed them in the required time, of course, escort them to the spaceship and fly them to a new destination in the galaxy after they have been freed to free the required colored people.

No. 11 Once they have flown through the galaxies and found the specific colored people, they bring them back to their home planet in order to build a base with them and create an infrastructure to achieve several possibilities in order to develop new spaceships with a longer running time and range.

No. 552 Family Stone

No. 1 You have to put certain stones together and dissolve them, like in the game Tetris. For dissolving the stones, you get these individually designed stones to build a house with. You build this house from the dissolved stones that have been put together at Familystone.

No. 2 The aim is to build a village with the stones that have been collected and dissolved. For example, if you have built a house after the first level of the Tetris game, you must build more houses in the second and subsequent levels after completing the Tetris level.

No. 3 Once you have built the houses, you must protect them with gun towers, because the program torpedoes your houses with other stones, if a house collapses, then you have to use the principle of Tetris to collect the stones and rebuild it.

No. 4 You have the opportunity to get bonus points through combos in the Tetris game and to buy new gun towers and catapults with the bonus points after completing the level

No. 5 The goal is to completely destroy the program's village and continue to expand, you can also challenge opponents from the Internet and play against these players in split screen, may the better strategist win and the better construction tycoon conquer the game

No. 553 Krassomat

With this slot machine you can try to win big, which means that all you have to do with this one-armed bandit is to spin it by swinging your arm on the display and you will get 3 pictures and 3 question marks from 3 different categories. Speak the answers through the microphone and spin the one-armed bandit again. You will now see 3 letters on the display. Vector points are shown in the letters. These rotate on their own axis and, if you are lucky, the same symbols will appear in the vector points as in the other 2 letters on the display. For example, if you find 2 suns, 1 urn and 1 diamond in the vector points in the first letter, 4 suns, 3 urns and 2 diamonds in the vector points in the second letter, and 1 sun, 2 urns and 5 diamonds in the third letter. Depending on how many vector points the letters consist of, the same symbols will link together and give you an individual win depending on the draw and the spin you have set. So you have to try to give answers and then hope that there are the same symbols in the vector points of the letters so that they link up and give you an individual win.

Answer the questions that are asked to you at random and after answering correctly, you will receive the letters with their vector point symbols, if you are lucky and you can use and link several symbols, you will win your bet, added or multiplied by the amount of money you bet, through the different links of the same symbolism of the symbols displayed.

No. 554 Shemekiss

No. 1 in this dating app you have to register and as a woman you have to complete the following tasks to get to know someone in a different way

No. 2 You receive a map that is true to Google Maps and hide digital hearts or individual flowers on this map in your area and surroundings. No. 3 The aim is to hide the digital hearts for a contact so that

they have to collect them in real life with their smartphone and the app in order to get in touch with them.

No. 4 In the free version you only have a small number of hearts that you can distribute on the map, so you ask your contact, if he wants to contact you, to first collect these hearts for you in the real world to show that there is real interest

No. 5 At every place where the man finds a heart, he must take a kiss photo and send it to his contact as confirmation, the woman, the contact checks whether the hearts have been collected and then sees the photo of her contact

No. 6 If the man has found the certain number of hearts and taken the kiss photos, the woman then decides, ultimately, whether she actually wants to have a conversation with him in the app, since she has received confirmation that the man had done this for her and had collected the hearts for her. In addition to hearts, the woman can also hide digital flowers in her living environment on the Google Maps map and ask the man to collect them so that contact can be made by phone as well as text.

No. 7 Ultimately, the free version can only offer a few hearts and no flowers to hide, the pro version offers a lot of several different hearts and flowers that can be digitally hidden for the contact men in the Google Maps map

No. 8 The man must therefore constantly be on the lookout for the hearts or flowers and keep moving in order to then get in touch with the woman after finding these hidden individual hearts and flowers

No. 9 In addition, the man sees on the app that the woman, when he has found the hidden hearts and flowers that she had hidden on the map, has an activation for conversation and connection to this woman, collected hearts and kiss photos from the location activate the message function, collected individual flowers with the smartphone activate the telephone function

No. 10 You can also start the game as a man and hide hearts and flowers for the women on the Google Maps map in their area or surroundings, so the woman can go on a search and also find the individual hearts and flowers in the real world in order to get in touch with the man.

No. 11 Before the game starts, a radar shows which faces are singles in your area, then by clicking on the faces of the women, the above mentioned dating connection game starts for the men

No. 555 Phonecallmoney

No. 1 You register on this site and commit yourself as a lender to show yourself here on a faces carousel

No. 2 users of this app are people who are in financial need and can no longer get a loan from the bank

No. 3 Turn the face carousel and select the face that can be randomly generated, click on the random face and now a phone number will appear that you can call

No. 4 Call the number and ask the person to lend you money, this is done through online transfer with the phonecall-money app, which works similarly to Paypal

No. 5 After the conversation, you will receive your desired amount via online transfer through the phonecallmoney app, with the catch that you have to return the money within 33 days, otherwise you will receive an interest rate of 13 percent on your borrowed money, if you return the money on time, then you will not be charged any further fees

No. 6 For the borrowed money, the face of the random carousel, there is a commission of 1.3 percent on the amount that has been borrowed

No. 7 For example, you as a lender will receive approximately 1.30 euros for a loan of 100 euros to the person who needs the money

No. 8 As a borrower, you must enter your personal data into the app and register and log in with your ID card.
gene

No. 9 Ultimately, you will be making the deal during the phone call, so be friendly and kind or tell the person the reason for your loan of money

No. 10 Once you have completed the deal, you as the lender will not only receive a 1.3 percent bonus on the amount of money borrowed, but also points, called Dots, for your purchases in their stores that are involved in this project

No. 11 Collect points (Dots) and go to the store and exchange them for products of your choice and pay your reduced bill with your collected bonus amount, which results from the collected points

No. 556 Bigfishmouth

No. 1 You must try to use the flipper arms to steer the fish in different directions or lips to catch the balls on the display that come from all directions of the display, the balls have different sizes and colors, use the correct flipper arm color to bring the fish to a required color, the balls must be caught in the color of the fish

No. 2 Try to pick up or suck up several small balls with the fish's mouth. The more small balls you pick up, the bigger its mouth will grow, so it can then catch the medium and large balls. Use the combos and finally make the balls disappear from the smartphone screen with the fish.

No. 3 You must also catch the positive points in the balls to charge your timer, if you absorb negative points in the balls, the running time of the game is reduced, the game is timed and you must catch all the balls in the given time and catch them with your individual mouth and clear the display No. 4 The background graphics interact with the game, which means that they can give you an advantage or a disadvantage, pay attention to the balls that can possibly be changed from the background or duplicated or minimized

No. 5 Also use the fish mouth to collect the required letters in the correct order on the display to get additional points. With these points you can buy a new fish in the next level and use its special abilities, for example, a net for catching the balls, a line from the mouth for quick catching or a laser beam from the mouth to destroy the balls.

No. 6 Clear the display of balls and enter a newly formed individual level. The shapes of the level are different in each subsequent level. Play in the.

Multiplayer mode with up to 3 fish at the same time and catch or destroy the balls that are in the shape of the level

No. 557 Takemoustone

No. 1 In this game you have to try to capture balls, which means that you have to touch the balls that appear individually on the display with your finger and drag and drop them into a cannon to recharge them

No. 2 In the upper display section you try to do this, in the lower display section you now try to hit the vector points of certain letters with the cannon that has been loaded with the balls, that means that you try to hit the rotating letters and their vector points in the flying position

No. 3 For example, if you hit the letter A, which consists of 6 vector points, with the balls from the cannon, it will be activated and can be dragged with your finger from the display to the side shown, the side of the display will show you which letter you should put where

No. 4 Try to follow the order of the letters to be removed in order to get the points you need to buy new cannons with more content or to exchange them for points, as the game is timed, try to pull all the specific letters - in this case word sequences - from the display with the letters up, left, right and down within the required time

No. 5 In multiplayer mode, you control up to 3 cannons and 3 fingers from different users and have to form several different word sequences that ultimately make sense

No. 558 Checkmyrims

No. 1 In this car racing game you as a driver have to choose animals as characters, you have to try to get into the top 6 of 18 drivers with the race karts in this fun racer to get into the points ranks

No. 2 Choose your favorite animal and your kart racer, in the default setting the standard kart is the only one that can be selected, each of these animals also has special characteristics, such as its own arsenal of weapons, which can be supported by the inclusion of individual weapon items if you collect them on the moving track

No. 3 The route must be driven in a certain time, otherwise you may be disqualified, and you must also qualify for the event before setting off on the route, which is generated using authentic comic landscapes and regions from the best cities and villages in the world. No. 4 You must try to collect letters of your favorite animal, which you previously selected as a character, on the route in order to unlock the special weapon properties for your animal while driving.

No. 5 If you have unlocked your special ability, for example, the elephant, it can use its trunk to throw the opponents off the track or can run them over like a steamroller for a short time. Each of these animals has its 3 different special abilities that can be used while driving, after collecting the name letters.

No. 6 While driving, try to get your opponents off the track or stop them with the special skills and the items you have collected, which can individually improve your journey and make it stronger

No. 7 Ultimately, you have to qualify and then complete the course in the given time and come in the top 6 of the 18 places, the weather also plays a role individually and can make the course an advantage or a disadvantage. No. 8 There are always numerous new courses with difficult passages and barriers waiting to be driven on, be careful not to stray from the track and not to deviate from the route or fall sideways, drive your karts in the air, on water, on land and elsewhere, suitable for the route and options that are dependent on the route.

No. 9 Stay in the top 6 and collect points in the preset 24 routes that you have to complete, for each corresponding place in the top 6 there are individual points, collect the most points as the best and become the checkmyrims master

No. 10 The tracks are faithfully recreated from the best locations in the world and offer shortcuts, track sections and shortcuts, depending on which engine difficulty level you had set

No. 11 It is important to get power ups while driving to make it easier to overcome the track and the opponents, plus their special abilities, individually depending on the animal character

No. 12 Try to complete the course quickly and get into the points position in order to later reach the podium and receive trophies, which in turn serve to unlock new courses and characters

No. 13 Up to 18 different animal characters can play the game online and drive on the tracks and duel against each other. At the end, the first person to win in the online version, depending on how many tracks they have won and in what time period, will receive a voucher code for an Auto Kart Race figure of their choice, which you can create yourself from scratch and design it.

No. 14 If you have won an animal kart figure, it will be sent to your home and you will receive this animal kart racer in your digital garage. Collect several racers and exchange them with other users from the game in real life or digitally.

No. 559 Gotothepow

No. 1 You must try to get to the pow, the pow is the highest level in the levels that lie ahead of you

No. 2 Try to climb stairs with your player, which means that you have to tap a certain letter and its vector points on each step in order to jump or advance to the next one

No. 3 Individual letters are distributed on each level, follow the scoreboard and tap the correct letter and its vector points in the correct order that are placed

No. 4 This means that you try to hit the correct letter, if you hit it, vector points will appear on the letter, these must be pressed in the correct order so that the player gets the jumping power to jump to the next level

No. 5 The letters on the next and subsequent levels rearrange themselves individually and distribute themselves in a jerky manner to throw you off track

No. 6 If you don't hit the right letter, you fall back a level and so on, so pay attention to the scoreboard and the correct order of the vector points

No. 7 Sometimes even the vector points have to be pressed in the correct order with soft, medium, hard touch so that the player can jump to the next level

No. 8 The vector points also vary their size, to get them out of control, look closely, because the color also changes constantly in the more difficult levels, which also has to be taken into account

No. 9 Climb step by step and get points for each step you climb, for quickly touching the letters and their vector points

No. 10 Climb to the highest point, namely the Pow, the game is also timed, so try to climb the stairs and steps quickly and cleanly, if you don't manage it in the given time, the game is considered failed No. 11 In multiplayer mode, you compete in the split screen against a random internet user chosen from the face carousel, at a given time rhythm, become the Pow master and defeat all other players in the rankings

No. 560 Goingcrazy

No. 1 You must try to register here in this game, for this you must register with your Slef and your nickname, this will then be transferred to a radar, this radar will then show other users on the radar in your vicinity, depending on the radius you have set the limit.

No. 2 Tap on a face and challenge the user you have selected to a going crazy duel. It works like this: the Google Maps map selects a route from your town that you have to walk in a certain amount of time. While you walk the route, you have to collect and catch certain objects, the so-called Dectordots, with your smartphone. To do this, you use the camera on your smartphone. The Dectordots are small creatures that resemble the alien critter.

No. 3 You have to walk the required route in a certain time and catch certain Dectordots that have been hidden on the route on Google Maps. Your smartphone will automatically give off a signal tone when a Dectordot is on the route or nearby. Try to catch the Dectordot with your smartphone while you walk the route. This works when you are near the Dectordot. It will appear and you will throw a digital catching net through your smartphone at it and ultimately catch it.

No. 4 If you have run the certain distance in the required time and captured Dectordots, your opponent on the radar must now do the same. If the opponent you have challenged to a duel does not manage to run the distance in time, you will be credited with the goingcrazy points for the win. However, if he has run his distance just as successfully and captured the certain Dectordots, the real duel can begin. You challenge him or he challenges you to a duel of the Dectordots. This means that the captured digital beings now compete against each other in a duel. This means that you control the Dectordot from left to right, as in the game - blobby volley for example, and let him hurl the ball back and forth with his head over the net. Those who have earned the most points in this duel will be credited with the win at the end. This means that you will receive the goingcra-zy points, which will be credited to your account.

No. 5 The more duels you win successfully, the higher you will climb in the rankings, try to reach the first 3 places in the month to receive great prizes from the app, for example, new running shoes or other walking materials that you could use for running future routes No. 6 Try to challenge the users and opponents on your radar and defeat them, drive to other towns and duel with other users from their area, you will ultimately become the king of the goingcra-zy game

No. 561 Scoredeath

No. 1 You have to shake your smartphone in the given directions that are shown on the display. By shaking, you generate different colored vector points from the corners of the smartphone display depending on the direction. This means that if you shake the phone to the left, yellow vector points are generated from the side corners, to the right, blue vector points, up, green vector points and down, red vector points.

No. 2 After shaking the smartphone in the specified directions, colored vector points appear from the corners of the display, which are distributed individually on the display. Your task is now to detach this display from the vector points and make the vector points disappear. This works by creating a colored vector path to each other using touch. If you have pulled several points of the same color together, this creates the colored vector point path. On the display board you will be randomly shown a sequence that you must follow. This means, for example, that you have to bring 4 points together, then 8 vector points, then 3, then 10 and so on. If you solve the specified sequence on the display board, you will receive points for it.

No. 3 Try to merge the colored vector points on the display board that are displayed with the same color, the display board changes after each solved scheme, recreate the colored vector path and use it to resolve the vector points on the smartphone display

No. 4 It may also be that you have to bring together different colored vector points, the display board constantly changes its pattern that you have to follow, the goal is ultimately to remove the entire display from the vector points and to free it, until you are shown new arrow directions again after freeing the display in order to generate new colored vector points, this time in different sizes.

No. 5 The game is timed. If you do not manage to catch the colored and different vector points within the given time, pull them together to form a vector path and thus resolve them accordingly, the game is considered as not mastered.

No. 6 Dissolve the smartphone display of the colored and different vector points to see new arrow directions on the display and then shake and move the smartphone in these directions

No. 7 Collect points through the solutions and become the high score player and battle with other users from the Internet in a duel to become the king of scoredeath, climb the rankings with your collected points and ultimately climb onto the podium. As the winner of the rankings, you will receive a glowing Bluetooth box based on colored vector points and can use it to freshen up your game at home in your room

No. 562 Stacking Chips

No. 1 You must try to use your stack of chips that you have in front of you, following white

No. 2 On the back of the chips there are different faces, each of these faces has a special meaning, when it is your turn a face is shown and you have one, then you have to use it whether you want to or not

No. 3 If you throw the chip into the middle of the poker table, if the chip falls on the face side, you must now look at the individual scoreboard to see how much you have to multiply your bet by the amount of the chip

No. 4 If the chip falls on the normal side, the standard amount of the chip remains and your ante or bet does not multiply to a higher amount

No. 5 This is how the round of no limit Texas Holdem works, and the game becomes interesting and unpredictable for the players who have chosen this variant of the game

No. 563 ConfettiSplash

No. 1 You must try to create a congettisplash, which works when you use a machete to chop up flying, colored, small, medium and large leaves that are flying around on the display, individually in the air

No. 2 Use the machete with your finger and pull over the different leaves, by pulling the leaves fall into confettis, small leaves must be chopped with a soft touch, so gently pull from left to right, from above and below, vertically or diagonally, medium leaves are chopped with a medium touch and large ones with a hard touch

No. 3 Pay attention to the display board to see which color of the leaves has to be chosen first to be chopped up. If you do not pay attention to the color order, it will happen that many more leaves fall from the air, i.e. from the top of the display, than before.

No. 4 After cutting up the pieces, place a vector path on the correct colored confettis and pull them together to form lines. Once you have reached the required lengths that were specified on the display board and pulled them together to form a ball of wool using drag and drop, a confetti splash occurs. This means that the confettis dissolve completely and the display is cleared.

No. 5 Try to achieve a confetti splash to get a higher score, you get minimal points for cutting up the individual leaves, medium points by joining them together to form a path or line and large points if you combine them into a ball of wool

No. 6 Try to get several confetti splashes in a row to get combo bonus points. If you have managed 3 confetti splashes in a row, the first level is considered passed. In the following levels, you must have a larger number of confetti splashes to pass the levels. It is important to remove the entire display from the leaves in a required time to free it.

No. 7 You can also eliminate individual leaves to complete the level, but this proves to be tedious and difficult and is very time consuming

No. 8 Battle with the best confetti splash players and climb steadily up the rankings with your score. At the end of the month, if you are among the top 3 people, you will receive an individual credit for a gift that you can give to your friends or other people.

No. 564 *Walkingline*

No. 1 You have to try to control a running player over a running line, this happens when you first let him run over the line, the line changes its running form while the player continues to walk or run on it

No. 2 The shape of the line curves, stays straight, or deforms in different directions, which means that it either changes the height, angle or depth, try to slow down or accelerate your player by tapping the line alternately with soft, medium and hard touches

No. 3 Barriers appear while walking or running that you have to overcome with a jump or passages where you have to slow down or accelerate your player on the running line with soft, medium, hard touch

No. 4 Collect the required letters and their vector points on the continuous line with the walking or running player in order to activate his weapon system to destroy enemies that appear around the line

No. 5 Accelerate your player on the line, with the soft, medium, hard touch pressure on the line to avoid the opponents, with the pressure on the line, just in front of the player, causes the player to walk or run either faster or slower

No. 6 Try to shoot the opponents with your unlocked weapon system and thus eliminate them, jump over barriers and adjust the speed for the continuous line with soft, medium, hard touch, with soft touch you slow him down, with medium touch he accelerates and with hard touch the player is generated from the walking state to the running state

No. 7 The game is timed, try to stop the person walking or To get the running player over the time and bring him to the finish, you also collect necessary time items on the running line to charge your time account

No. 8 In multiplayer mode, battle against 3 other opponents who, according to the game principle above, try to get to the goal faster than you. You can also try to push your opponents off the line or slow them down with your weapon systems. Pay attention to your speed and the optimal gear or buy on the continuous line that is the one with the player who is walking or running on it.

No. 565 Intellisport

No. 1 You must try to train your memory in a sport, in this case basketball. It works like this: when your player is about to throw, mathematical problems appear above his big head. If he solves these, then the player can complete the throw. If he calculates the mathematical problem that appears incorrectly, then the player cannot complete the throw.

No. 2 Try to calculate the result on the scoreboard by pulling together the calculation symbols that appear above the head.

No. 3 Collect the normal points of the game, as usual, as you know from playing basketball, calculate the tasks correctly, so you get special skills for your player, unlocked for a short moment, for example, faster running, better passing skills, improved shot accuracy, improved stability, better dunk ability, and individual special shots

No. 4 Also collect letters on the field, these must correspond to your player name in order to unlock even more individual special abilities for a short moment

No. 5 This principle is also applicable to other ball sports such as football, tennis, baseball, handball, etc.

No. 6 Try to calculate the tasks that appear partially and randomly above the player's big head using addition, subtraction, division and multiplication methods. In addition to the unlocked special abilities, there are special points if you have solved several tasks in the game in a row. These are then added to the normal points account and extrapolated. No. 7 Ultimately, you can use the mathematical tasks that appear randomly to your advantage or disadvantage in the game. So

try to solve these individual calculations quickly and carefully in order to gain an advantage, i.e. extra points and unlocked special abilities that could help you enormously in the game.

No. 566 Whoisout

No. 1 In this game show, a sloth moderates the action, this is a show that works as follows

No. 2 Try to get the sloth moving by answering questions from the YouTube categories correctly. There are 3 candidates taking part in the show, and they have to answer questions that the sloth asks from the YouTube categories.

No. 3 The sloth selects an individual video from YouTube and the candidates have to answer the specific question from the video shown

No. 4 A candidate is selected by the moderator - sloth and must answer this question within a certain time

No. 5 If the candidate answers this question, the sloth starts moving and tries to pull itself up the tree. The tree has a certain checkpoint that can be reached by the candidates by answering questions correctly.

No. 6 The aim is for the candidates, the moderator, the sloth in this case, to reach the checkpoint. There are easy, medium and difficult questions that the sloth asks the candidates. Depending on the level of difficulty of the questions, the sloth can pull itself up faster or slower accordingly.

No. 7 Once at the checkpoint, the candidates are given dollars to use and can choose their favorite category on YouTube by purchasing them

No. 8 Finally, a contestant must get the sloth to reach the highest point on the tree by answering questions correctly. No. 9 If he answers the question incorrectly, the sloth will

descend the tree, and the dollars left over from the purchase of the category will be kept by the contestant who managed to get the sloth to the top.

No. 567 Outiswho

No. 1 You have to try to transport an individual ball from a small circle, where there is a flipper arm, into a new individual circle. There are several small openings in this circle from which the ball can be transported out with the flipper arm.

No. 2 You must then try to assign the ball to the nearest individual circle, either a small, medium or large circle, which is located directly or far away from you

No. 3 points are awarded if you use the flipper arms to move the ball that is in the circle into a new individual circle within a certain time. For a small circle you get 3 points, for a medium circle 2 points, for a large circle only 1 point. You also get points for the distance, depending on how far away the next circle you want to fire is. No. 4 New circles keep appearing in your area, in which one or more flipper arms are located. The colored flipper arms color the ball and you then have to move the ball into the circle that has the same color. If you don't manage to hit the opening of the next or further away circle, you lose a life. The game starts at an easy level of difficulty, with 13 lives, then at a medium level with 8 and at a hard level with 3 lives.

No. 5 Each circle is given a certain amount of time, this is to ensure that they have to use the time to bring the ball into the individual circles, if the time runs out, then they automatically lose a life again

No. 6 The game can be played with up to 3 players and 3 different balls, simultaneously controlling the balls on the display and trying to get them into the openings of the different circles

No. 7 In the first levels you have to activate a small number of circles, or rather hit the ball into the circles. The further you play the game, the more circles in different shapes appear and the time limit for hitting them sinks further and further down and is reduced. You then only have a few seconds to get the ball into the opening of the nearest circle.

No. 8 Finally, you have to get the ball in the right color into all the correct colored circles to get to the new level

No. 568 Packinglips

No. 1 You have to try to catch individual flying hearts in certain sizes and colors with your lips, this means that you have to aim at a heart that is small, medium, large, for example, in order to catch it with the catching lip or you use your finger with the touch technology and pull your lips out of a packaging box and pull them onto the flying individual hearts

No. 2 You have to follow the scoreboard, which color and size of the heart has to be caught first, follow the order, otherwise more hearts will appear on the smartphone display, which will make it more difficult for you to catch

No. 3 You have to handle different lip colors and sizes from the packaging box, that means you have 4 boxes, in each box there is a color lip in it, in the 1, the yellow lips are kept, in the 2, blue lips, in the 3, green lips, in the 4th packaging box, red lips

No. 4 Depending on how you touch, you activate the size of the lips, with soft, small lips, with medium, medium lips, with hard touch, large lips, the hearts fly around the smartphone display with different colors and sizes

No. 5 For example, if you have caught a heart in the same color and size as the drawn lip from the packaging box, this heart will disappear from the display and you will be credited with one kiss point.

No. 6 You can also catch or collect 3 hearts at once with one lip, this happens when the hearts are in close proximity and you catch them in one go

No. 7 You swipe a path with your finger on the hearts and collect them all at once. For each heart you collect you get one kiss point. Collect as many kiss points as possible, which you can use in the future to animate your selfie photo. If you have passed the first level and received the possible number of kiss points, you must then take a selfie. The game animates your mouth with the collected kiss points, depending on how many you have collected, and animates your mouth, which is then incorporated into the next level as a background graphic. The background interacts with the game, which means that when you say kiss-kiss, it opens its mouth when you receive a signal from the microphone and tries to devour several hearts, no matter what color or size.

No. 8 You have three attempts to open your mouth with the command via microphone, kisskiss, and devour the individual and different hearts, it depends on how many kiss points you have collected, because the more kiss points you collect, the more kisskiss attempts you get unlocked for the new level

No. 9 The game is timed and you have to catch a required number of hearts with your lips and ultimately make them disappear from the smartphone screen
