

No. 569 TimeinSpace

No. 1 In this game you are on a spaceship and in a room with several other players (3). Your task is to find enough time to find items and use these items for the time machine to transport or beam yourself from one room of the spaceship to the next.

No. 2 You control your critter or another alien creature, which is available to choose from, through the first room, which is built like a comic-like labyrinth, and try to find time items in different shapes in this room

No. 3 In this labyrinth, which constantly changes its appearance, you have to eliminate enemy monsters that can get in your way. They use the principle of the bomberman game or the pacman game. You have to use your character to hit the monsters that want to stop you from exploring the corridors in the labyrinth, which changes in real time, or destroy them with your collected arsenal of weapons, or try not to get caught.

No. 4 The elementary time items have different modules, either 1sec., 2sec., 3sec. and so on, you have to collect a certain amount of time in order to activate the time machine you found at the end or in the middle of the labyrinth, depending on where it is, once you have found the required number of time items or obtained them from your enemy monsters, you only have to find the time machine, but this constantly changes its location and is not easy to find, as the labyrinth can constantly and individually change its shape.

No. 5 If you have nevertheless found the time machine and integrated the required time items into the machine, you can transport yourself to another room or beam yourself there.

No. 6 Make sure that your fellow players are near you and that you take them with you through the time machine, otherwise they will remain in the first room and gradually rot there

No. 7 If you have been switched or transported to another room by the time machine, you must now find the required time items there according to the same principle and leave the room as quickly as possible, as the entire game runs on a specific time set in reality, which means that you have 24 hours every day to reach certain rooms. If you do not manage it, you will be reset at the beginning of the room you passed, i.e. the checkpoint.

No. 8 Also collect time letters to decipher the corridors on the radar and the map to more quickly find the location of the time machine that you need to be transported and beamed into a new room

No. 9 The game runs in real time and if you enter the rooms too slowly, new ones will be generated, which will cause you to lose your orientation and disrupt the flow of the game

No. 10 It may be that your fellow players are trapped in other rooms and you have to free them, this happens if you have found several portals and have enough time items in stock

No. 11 Ultimately, they must act quickly and play the levels at a high speed so that new rooms do not emerge by being trapped, which costs time and motivation

No. 12 You need this time to find the right rooms and finally to beam or transport yourself from the spaceship to the next one

No. 13 If you manage to beam into the next spaceship, you will also get new players with whom you can play the game with new passages and barriers and enemy opponents

No. 570 Getyourhandonit

No. 1 You have to use your normal hands behind the camera of your smartphone - back camera, to touch objects in this regard, apples and different types of fruit, with soft, medium, hard touch, you have to touch the apples in this example and then drag them into a basket, collect as many as you can, either small, with soft touch, medium with medium, large with hard touch

No. 2 If you have caught some individual apples and dragged and dropped them into the basket, a basketball basket will open in the middle of the display. Now swipe from bottom to top to drop the apples onto the moving basketball basket, which tilts backwards, forwards and from left to right. Try to transform the previously caught individual apples and different shapes into the basketball basket or to hit them. No. 3 For each apple you hit, you will receive a point credited to your time account. The game is timed and you must transform a certain number of apples in the given time to get to the next level. Try to keep the stock of apples up at all times while the game switches back to the apples rising.

No. 4 In the next level, the background interacts with them and gives them advantages or disadvantages while they try to hit the apples into the basketball basket. For example, it can sink apples lying close to the basket into the basket with a comic hand touch or throw apples thrown past them back at them or it gives them disadvantages and blocks their view with objects or it rips the flying apples out of the air and devours them with the hand that is generated from the background.

No. 5 Transform all apples to keep your time account in the plus, for each apple thrown past in this example 1 second is deducted from your time account, in the next level you then have to touch or collect different types of fruit that differ in shape, size and color and put them in the basket using the drag and drop function, so that you get enough throws to keep your time account in the plus

No. 571 Jazzmad

No. 1 You have to try to use your phone's rear camera to try to drag and drop vocal notes from the display to a digital saxophone that is shown on the display, which means you point your camera at objects in the real world, you walk through a shopping center where different music is playing or in bars and restaurants where music is also playing

No. 2 You then point the phone with the rear camera, either into the open air or at an individual object, the app recognizes the piece of music and then shows singing notes on the display, these are visible in different colors and sizes, touch them and pull them into your digital saxophone using the drag and drop function. No.

3 Once you have dragged

the singing notes into the saxophone or

If you can capture it, the camera switches back and you now see on the display a level of the song that the app previously recognized, now try to assign the vocal notes of the level to the blank fields where the vocal notes belong, drag the collected vocal notes from the saxophone into the blank fields in good time, pay attention to the color and size of the blank fields and your collected vocal notes, which you now have to assign correctly, using soft, medium, hard touch, now insert your collected notes from the saxophone into the blank fields of the level and pay attention to the correct assignment at the right time

No. 4 If you have assigned the vocal notes to the level while the instrumental song is playing, you will now hear the voice of the added vocal notes, step by step you add the voices to the level and its blank fields using the vocal notes, if you have completed the song and added the individual vocal notes with soft, medium, hard touch via drag and drop, you will be awarded points for correctly assigning the vocal notes to the blank fields, collect enough points by adding the vocal notes and use these points to provide and now download your individual, selected pieces of music from the music library of new songs that you can search for and find through the app, if you have collected enough points you only pay with the points you have won and not with real money, as is usually the case

No. 572 Hustlegang

When it's your turn to place your bet, which you have to place in this round, you have to make sure that the time clock, which is running down and lasts 30 seconds, does not forget to select the correct circle that is randomly selected, which consists of 6 circles and is located on the time clock. You select one of the 6 colored circles in the RGB spectrum that is located on the time clock, but you do not know beforehand what is behind the buttons or colored circles, namely an individual bet amount that you have to place in order to be allowed to carry on playing. Tap one of the 6 colored circles and you will be shown a random amount that you have to place as your ante or bet in the round in no limit Texas Hold'em.

Once you have selected a colored circle, it turns over and shows you the amount that you and the other players in the round must bet in this game in order to continue playing. For example, 300 euros were shown and should be bet as an ante. If the timer runs out and you have not chosen a colored circle, you must sit out 3-5 rounds and pay a penalty amounting to 50 percent of the stake chosen by the other players using the process described here. If you have selected a colored circle from the 6 to be selected, the entire group sitting at the poker table must pay the same amount of money that is hidden behind this circle. However, if you choose a colored circle with a face or emoji hidden behind it, you must try to find this emoji or face from your stack. If you find it on the back of one of the chips you received previously, you will be given a joker turn, which means that you can define an ante or stake amount for yourself and this must be played in a maximum of 3 rounds at the poker table.

No. 573 Seeyoudeep

You must try to interpret and implement the time clock in the game differently. This means that when it is your turn, you can select a viewpoint on the time clock and use the time clock on the display to briefly see what type of individual card the player has in his hand. The time clock is only limited to a brief look, it depends on how many players are at the table in no limit Texas Holdem. The look is individual and only takes a short moment, either from a bird's eye or ego perspective. Quickly remember the one individual card in your fellow players' hand and give yourself an advantage or perhaps a disadvantage in the game. If you have now remembered one or more cards, when it is your turn in the next round, you can reduce or add to the amount the other player is to bet by 70 percent or a percentage value randomly displayed by the time clock. In this way, you can change the possibilities of the amount to be wagered and thus change the mood of the other player, either to the positive or negative influence, which affects the game and ultimately intensifies or defuses the game.

No. 574 Outdoor

No. 1 You have to try to open the right door on your smartphone, which consists of a certain grid, which means that several doors are shown on the display. You have to do the following beforehand: switch on the rear camera of your smartphone and wait. After a while, keys will appear that move individually on the display, sometimes small, medium, large and in different colors. Try to drag and drop these keys into a digital bunch, i.e. catch them.

No. 2 If you have the order that was searched for on the display board, i.e. the correct collection of keys, the camera switches back to the initial display, now try to assign the right key to the right door using drag and drop, this works if you pay attention to the color and size of the key hole, for example if you have put a matching key in a correct and corresponding door and this key fits in, then the door opens, behind this door a face randomly selected from the face carousel appears and asks you a question about a product which must be answered with the price, for example higher or lower, which means that you have to guess the exact price or possibly snuggle up close to the price. No. 3 If you have roughly guessed the price, then you can take part in the auction for this individual product, just like on eBay you take part in this auction and hope that by paying the correct amount of money you will win the auction.

No. 4 Behind every door there is an individual product from the media product world that has never been on the market before, so make sure you look at the grid carefully and pull the right key into the right door from your key ring, if you pick the wrong door you will see a sloth, this sloth can only be pulled 3 times, otherwise the game ends, the principle of the game mentioned above

No. 5 Therefore, answer the sloth's question correctly to be further integrated into the game on this game principle, if you answer the question incorrectly, you only have 2 attempts left to avoid catching another sloth

No. 575 Givemeeverything

No. 1 You have to try to position a bird in the right places, which means that you aim at individual objects in the real world with the rear camera of the smartphone, now the option appears to select a different bird from the bird library and bring it onto the individual object or drag and drop it or place it on top of it

No. 2 Now the bird tweets information about the product from its mouth, for example the price of the product or shows you a link to the website where you can purchase this product

No. 3 In addition, it connects to eBay and searches for this product, which is traded at a fixed price or at auction, or searches for the best price for you on the comparison portals on the Internet. Now you only have to tell the bird via microphone or by typing whether you want to buy this product and the product ends up with the link to the website in the basket where the offers are collected.

No. 4 So put your birds on the products in the real world and improve your individual wishes and purchasing options in the future. If a particular product has caught your eye, put the bird on the product you are looking at and find out more in detail, the information shown about it. You will receive a message from the app that you now have to drag your finger up, down, left, right and out of the corners to see the images that have been suggested to you. If an image suits you, the program will try to link it with yours and make a match out of it. If a match is made, you can exchange free voice messages with each other and use other voices from the database for the conversation to make the conversation more interesting.

No. 576 Lordinmyside

You register with 8 selfies, either face or body display, now you switch with your finger from top, bottom, left, right and the corresponding edges on the curvature of the corners of the smartphone, according to your swiping the app searches for suitable faces in your vicinity and area that could match you, it compares your facial features and the type of your photos and uses a love AI to calculate and probability whether they could match each other, if the left selfie does not match, the program checks the right, top, bottom and corners of the smartphone, depending on the touch, you swipe on the smartphone using soft, medium, hard touch and thus achieve a random swipe with suitable pictures of the person who is shown to you using this press function. So, with this new principle, swipe all 8 options of the pictures checked by the program of the person who was assigned to you from the display and send them to unsuspecting users in the app, who by chance may like them when they receive their message from the app. You will receive a message and can now examine this person. If the program has compared the pictures and photos, a match is made. Then you can now communicate with each other using voice messages and use other voices to make the conversation more attractive in the future.

No. 577 sewer rat

No. 1 You go to the site or use the app, in this case and example you open the app, a cute and cuddly comic-like sewer rat appears, touch the sewer rat and then say your download or upload wish to the sewer rat via voice message
No. 2 The sewer rat then shows you a labyrinth which you have to see through at a glance, use a successful vector path in the labyrinth to lead the sewer rat out of the shown labyrinth, if you have successfully led the sewer rat out of the seen labyrinth, you will receive your wish, namely what you previously wished for via voice, provided as a download link, of course free of charge and for free

No. 3 If you do not manage to lead the sewer rat successfully out of the labyrinth using the vector path, the sewer rat will ask him 3 individual questions about your wish, which you previously expressed. Download link, provided free of , If you answer them correctly, you will receive your charge.
No. 4 You can also give the sewer rat something. Namely your personal upload of your data, this is what the sewer rat does when you click on it and integrate or pull data of any kind from your folder into its mouth, see drag and drop function of Windows or iOS, the sewer rat saves your personally uploaded data on a cloud storage, which as described above is a labyrinth full of saved data with a scrolling category selection system, after the successful upload you receive a link to download this data or tell the sewer rat what you want, and the sewer rat searches through its data stock and lets you play the labyrinth pattern again or asks you questions about the desired download from the data stock of the individual uploaded data of the Internet user in order to finally get to the download link or make a new upload

No. 579 Frikadela

No. 1 in this app you show off your best meatballs, which means that you have a digital map to choose from to put together the main course, in this compilation of the main course you have to select the countries from the map by drag and drop in order to determine the type of meat for the meatball, you drag the country flag into your digital plate and thus decide the country from which the meat is provided

No. 2 For this purpose, they determine the spice varieties and the side dishes, which can be individually selected by the countries from the selection on the country map by drag and drop on the plate, together with the drink and the dessert

No. 3 After selecting the meatball, you decide what shape the meatballs should have and what design your side dish and dessert should have, this is shown on the display of the smartphone, either via 2D or 3D view

No. 4 Once you have put together your frikadela menu, you can now place an order. Your menu will either be delivered to your home or you can go to your nearest frika-dela store and order it live on site using your NFC-enabled smartphone. In some frikadela stores, you can even prepare your menu yourself and then eat it after putting it together.

No. 5 Exchange your ideas with other users of the app in the frikadela app and after the exchange, order the products along with the instructions for preparation to be delivered to your home

No. 580 Panicpoint

No. 1 In this game you have to try to find and catch the hidden points or panic points that have been hidden in your real environment and vicinity with your hand, which works like a pokeman ball from Pokémon go

No. 2 Using their radar and the digital map, they now search for the panic points in their vicinity and in their area

No. 3 In this example, panic points were hidden in a forest in the village of Katzenfurt. You now walk using your radar and follow the navigation system on your digital map. When you arrive near the panic point, the app or the smartphone reports this.

Your smartphone will send an alarm signal, you must now activate this panic point with your rear camera, which is automatically activated, with a movement of the smartphone, which happens from bottom to top, with a swing, your digital hand

No. 4 Once you have activated your digital hand, you will see various panic points in different shapes and colors on the display. Try to catch the required panic point with a wish or swing with the digital hand.

No. 5 If you have caught it, go to the next place and try to catch the next panic point. If you have caught several panic points and saved them in your digital basket, go to the supermarket near you and look at the products you want to buy to see if there is a panic point on the product. If, for example, you have found a pizza with a panic point on the packaging, scan this panic point and it will activate your captured panic point from the app.

No. 6 Now you will see an advert displayed, in this case a discount that has been granted to you on this product, in most cases you will get this product for free, you just have to show at the checkout that you have found the same panicpoint that was stickered on the product, or you show with the app the symbol in this case a laughing emoji for the product that you want to get for free, because this shows, because this indicates as a feature that you can get it for free because you found the same panicpoint that was shown on the packaging of the product

No. 7 So go for a walk more often in your free time and search for and capture the panic points with your smartphone in the real world in order to get free products in the future, in your local supermarket

No. 581 Kimjopow

Using the argument reality function, you have to use your smartphone of the future to catch insects that the app has hidden and implemented in your forest in the real world near you and surroundings. You go into your forest and call out the phrase kimjopow out loud. Your radar then shows you the insects in your vicinity. You use the phrase you call out to lure the insects out of their hiding place. Once you have lured an insect out, you call out szybko, szybko, szybko to it and then you throw your digital catching net at the insect that was shown to you on your smartphone display. Once you have caught some insects, you have to train them like Tamagotchis. After training, you can then let the insects you have caught and trained compete against each other in an arena with other users. Exchange and share your insects with other users. The focus is on training these insects. To do this, you buy a Tamagotchi module or a smartwatch and transfer your captured insect to the module on your system or smartphone. You nurture, care for and train it to an adult form and move enough kilometers a day, by walking or running, to accelerate the transformation and training functions of the insects. Then, when the training is complete, you transfer the trained insect from the Tamagotchi module back to your smartphone. In the arena, you can now find out whether the exercise of your personal training has borne fruit. This means that the better trained insect then had to win its duel against a less well trained insect. After winning, you receive the insect for free from your opponent on the Internet and can hide it in the forest for other users using the reality argument, and receive Kimjopow dollars for making this insect available. Use the Kimjopow dollars you received from your own individual online shop to buy your girlfriend a nice gift to make her happy.

No. 582 Herewego

You must try to find a checkpoint on a fellow player's digital running map and receive a task from this checkpoint, for example, running a route that has been set on the digital map, with the set kilometers.

If you have reached the checkpoint on a running route, for example, all you have to do is open the digital magic box with the rear camera of your smartphone, which you found using the radar. Swipe your digital hammer over the digital magic box that is displayed at the checkpoint. It will open and you will be given a new task or a new running route that you must cover. For example, if you have successfully completed 3 checkpoints, either on foot or by running, you will receive herewego points from the app. Try to collect as many herewego points as possible per month in order to be among the top 3 herewego players in the app's general rankings. If you reach a place among the top 3 players, you will receive a voucher card sent to your home for your supermarkets in your area and the surrounding area. With this voucher you can choose a product in any shop and use the voucher to pay for it. Choose your opponent from the internet carousel and set digital checkpoints for him to run through and hide the magic box and his new task nearby. The game is financed by advertising, and advertisements appear on the digital map that you have. These are minimally integrated and displayed as advertising banners in the app.

No. 583 MakingNuts

Sid, who we know from the film Ice Age, has hidden nuts on a digital map in your vicinity or surroundings that is very similar to the real one, on trees. Use your radar to search and try to find the tree. Once you have found this tree in the real world using your digital map (lossid), use the rear camera to point them at the tree. Digital nuts will now appear on the branches of this tree or on the tree, which you must shoot down with your digital sparrow slingshot. Try to get as many nuts down to the ground in a time limit. If you have some nuts lying on the ground, you must scan them with the front camera. According to the tradition of Chinese fortune cookies, each of these nuts contains a wonderful saying, for example, play with Sid and you will get fit, or a gift for a voucher that can be used individually in a Chinese restaurant. Now go hunting in your area or travel the world and get hold of the wonderful sayings and possibly vouchers for a candle light dinner in a Chinese restaurant in your area. Go to the restaurant with your caught sayings and its voucher and meet other singles from this game and invite a single from this game that you have not seen before to dinner, then introduce your sayings and with a bit of luck, you will fall in love through the sayings and remain a wonderful couple until the end of this world.

No. 584 Cashoverass

No. 1 If you are a human or an alien who has a lot of money and wants to give it to people who urgently need it, then you log on to this app with your selfie and transfer your individual amount of money into the app via Swip payment function (show width interface protocol) technology into a digital money pot, where the money is collected

No. 2 The selfie is then integrated into the face carousel, where other donors can be seen with their faces.

No. 3 Now the person who wants to get money for free because he doesn't have any or urgently needs it registers, this person must now enter his account details in the app and the financial situation he is in

No. 4 If this person has been verified by the app, after entering their ID and account details, including address and financial status, they can now, if randomly selected, participate in the faces carousel

No. 5 The person now spins the face carousel and a face is randomly selected, now a digital butt appears in the middle of the display, this must be set in motion by assigning the vector points to the letters that appear on the butt, using soft, medium, hard touch you must now place the colored vector points on the letter in the correct order and form the following letters together to form the sentence cashoverass, if you manage to assign the colored vector points to the letters correctly and complete the complete sentence, cashoverass, the butt starts to wobble and the smartphone starts to vibrate, you get an individual cash gift, which you roughly imagined, which is transferred to your account via the Swip payment function, if you do not manage to assign the vector points to the letters and the time runs out, while you complete the sentence cashoverass and the butt starts to wobble or not wobble, then you must Pay 0.89 cents to the app and the money you give goes into the money pot.

No. 585 Escape Plan

No. 1 You must try to capture your room correctly and easily with the camera of your smartphone, then, when you have digitized your room, exchange it with another user of this app, which means that the game now begins, you try to go from one room to the next digitized room of the user through portals, while you have to answer questions in the room where you are at the moment

No. 2 You will also be chased by a ghost who is trying to completely cover your screen with spider webs. In each room you have a certain amount of time to answer the questions. If you answer all 3 questions incorrectly, the ghost will appear and try to cover your screen with spider webs. If this happens, you have to use a spider that you control via drag and drop to collect vector points that move back and forth on the spider webs in order to clear the screen and get to the next portal. No. 3 If you don't manage it, you will lose your view and will no longer be able to leave the room through the portal because your view has been blocked. So answer at least 1 of the 3 questions that the user had stored in their room in order to then go through the portal to the other one. The more users use this app, the more rooms will be available in their individual design. If the ghost has completely covered your screen with the spider web, then all you have to do is a certain amount of time to clear this in order to escape to the next portal, if you do not manage it in the given time, then the game is lost No. 4 Travel through the portals and explore the individually designed rooms of the users and answer their questions as far as you can and make sure that the ghost does not catch up with you and plaster your display with the spider web

No. 586 Ripcurl

No. 1 In this game you have to try to use the principle of curling, instead of pushing the stones away, you have to follow a vector path with the curl and your broom and place the stone on the letters lying there and their colored vector points. You place a maximum of 3 letters on the end of the playing field, each of these letters consists of different colored vector points that should be hit with the colored stones or placed on the colored vector points.

No. 2 While you sweep the curl with the broom, in this case your finger on the smartphone display, you have to follow a vector path to activate the specific vector point. If you have done so, then this vector point of the letter lights up and can be placed with the colored stone. If you forget to activate the vector point beforehand and the stone still remains on the vector point, then you will not be credited with any points.

No. 3 You can play this game with up to 4 players at the same time, try to place your colored stones on the corresponding colored vector points of the letters in order to receive points for each correctly placed stone on the corresponding colored vector point, push other stones from the opponents out of the vector points and the center of the playing field and receive bonus points for doing so

No. 587 Withpowercomemoney

No. 1 You must try to fill a power meter with energy, this happens when you have run or walked enough kilometers in the real world, using a digital map

No. 2 The digital map, which is very similar to the real world, shows you checkpoints in your area or surroundings that are at different distances, in this case 3km per checkpoint, you have to walk or walk through several checkpoints in a row, in this example 3x each, to unlock a magic chest

No. 3 If you have reached the 3 checkpoints in the required time after the start, the magic chest will be unlocked at the last checkpoint. All you have to do is use your radar to find the magic chest with your smartphone and then try to open it with the rear camera of your smartphone. This happens when you activate this rear camera and zoom in on the object that is displayed on the radar.

No. 4 If you have found the magic chest and recorded it with your rear camera, a puzzle will now appear on the front display of the smartphone. Solve this individual memory puzzle and the magic chest will be opened. If you don't manage it, you have to go through the checkpoints 3 times and try again.

then they receive their pickled goods from the shopping cart, free of charge

No. 5 If the magic chest is opened, you will receive the points found in it, which will be credited to your account. In addition, you will charge the energy indicator with the kilometers you have run. This is important because at the end of the month, you must have charged this energy indicator to a certain percentage, in this example to 85%.

No. 6 Try to collect enough points in this game through massive movement to climb the points ranking and get into the top 3 at the end of the month. If you manage to get into the top 3, you will now have the opportunity to use a digital amount of money given by the app to purchase products and goods in your local supermarket within a specified and expiring time. For example, you receive 100 euros to shop, but you only have 5 minutes to choose the goods and put them in the shopping cart. If the time runs out and you don't manage to get to the checkout, you get nothing. If you do manage to get there in time, you will receive the goods you put in the shopping cart for free.

No. 588 Simileontheday

Sid, who you know from the film Ice Age, is hiding on a digital map in your vicinity or surroundings, which is very similar to the real map, on various walls smileys in different blank colors and shapes. Go on a search with your radar and try to locate the wall. Once you have found this wall or floor or individual object in the real world using your digital map (lossid), now use the rear camera of the smartphone and point it at the wall or floor or the individual object where the smiley is located.

Now appear on the wall or on an individual floor or Object digital smileys that you have to color with your digital brush, try to color as many smileys in a running time as possible

Do you have some smileys on the walls and floor?
Once you have painted the individual object with your digital brush, you must now use the front camera of your smartphone scan.

Now, after scanning the smileys, you can integrate them into your smartphone or implement them into your chupa chups box. The program will then save them in your box, which you can then order to your home in real form if you have invested enough kilometers in the search.

Now the app asks other users of this game to challenge them, they meet at a certain place in the city or village and take their chupa chups box and its contents to the place.

The other players bring their collected chupa chups from the digital world, which they had delivered to their homes, and play the traditional game from the 90s on the pitch and try to take their chupa chups chips from them in a duel.

If you win other Chupa Chups chips you can hide them as you wish on the real, digital map. You scan these chips and digitize them in your digital map and hide them, whereupon new users have to search for these chips and catch them with their digital hand in order to get their stack home at the end. You then challenge these new users to a battle in the real world and try to win back their Chupa Chups chips. Meet up for new duels with your chosen partner, who is randomly generated using the face carousel, and try to get new Chupa Chups chips from him in the duel. Scan these chips and digitize them in your map of the game to attract new users to the search and then, when you meet, to get their new Chupa Chups chips.

No. 589 Exitwonder

You must try to digitize your room in a form designed with comic graphics. Once you have done that, implement your watch list from eBay into the room. Products will now appear that you can position in certain places. Once you have done that, leave the room and go through the portal and admire another room belonging to another user of the app. If you like some of the products, you can now make a price suggestion for them by voice or a short message or take part in the auction of the item if you like it. Wander through the portals into other digitized rooms and look for desired items that you might like. If you have made a price suggestion for some items or products or have taken part in an auction, you will receive an individual message whether the price is right and when the auction will end in the last seconds. Leave the wonder room and look forward to the message from the other people who have displayed and offered these items for you in the future. The trick is that a digital character, a thief, can steal your digitized products in your room. The app will notify you when he is in your room. All you have to do is hit him with a sparrow slingshot and throw various types of fruit at him to scare him away. If you don't manage it, you have to update your watch list via eBay and reposition the new products using drag and drop. You get points for hitting the thief. Collect enough points to get him into bonus portals, namely into the thief's digitized room, examine the stolen goods and maybe you like a product that you then want to buy immediately or at an auction on eBay. You click on the article and are then automatically redirected to eBay or another provider who offers the products that the thief had put on display for you.

No. 590 Schenglong

Sid, who you know from the film Ice Age, is hiding on a digital map near you or in the surroundings, which is very similar to the real one, on the trees, DragonBallz. Go on a search with your radar and try to find the tree. Once you have found this tree in the real world using your digital map (lossid), use the rear camera and point it at the tree. Now digital DragonBallz will appear on the branches of this tree or on the tree, which you have to shoot down with your digital sparrow slingshot. Try to get as many DragonBallz down to the ground in a time limit. If you have some DragonBallz lying on the floor, you must now scan them with the front camera. According to the custom of the Japanese saga, the dragon Schenglong may be hidden in one of these DragonBallz. If the dragon Schenglong turns out to be one of the DragonBallz, then you are very lucky. You will now receive 3 vouchers. In this case, you will be redirected to eBay and receive a 30%, 50%, 85% voucher on certain items from various areas and categories.

You can also redeem these vouchers later with the app, which means that you log in through the app and are redirected to eBay through the Dragon Ball you found where Schenglong was and can then redeem the vouchers.

If you didn't scan Schenglong from the DragonBallz, you will get points from the other DragonBallz that you scanned. With the points you must try to climb up the points ranking and become one of the top 3 players of the month. The first 3 places at the end of each month receive 30% for 3rd place, 50% for 2nd place and 85% for 1st place in the form of vouchers for various items that are offered on eBay.

In some DragonBallz you will find

You don't get any points, so keep searching in your area or surroundings and try again on Sid the Sloth's map to get the DragonBallz from the trees.

Find what you're looking for and save real money on your next purchase on eBay. You can also exchange the kilometers you've run in the game for DragonBallz and hide them yourself on Sid the Sloth's map for other users of the app. If your DragonBallz are also found and scanned, you may receive bonus points for your overall points ranking if the users in the DragonBallz can answer the hidden questions from you, which consist of different categories.

If you answer the questions incorrectly, you will not receive any bonus points for your points ranking. So hope that the users can find the DragonBallz and answer the hidden questions.

No. 591 Searchpearls

Sid, who you know from the film Ice Age, is hiding on a digital map in your vicinity or surroundings, which is very similar to the real map, on different streets, sound notes in different colors and shapes. Go on a search with your radar and try to locate the sound notes. Once you have found these sound notes on the streets in the real world using your digital map (lossid), use the rear camera on your smartphone and stretch them out on the street floor. Sound notes in different shapes and colors will now appear, which you have to catch with your digital guitar or the automatically selected sound instrument. Try to catch as many sound notes as possible in a running time with the different instruments.

Once you have picked up some sound notes on the streets and the road surface, you must now scan them with the front camera of your smartphone.

Now, after scanning the sound notes, you can integrate them into your smartphone or implement them into your note box. The app will then save them in your box, which you can then unlock at home once you have clocked up enough kilometers on the road. Once you have arrived home and have filled your note box for a certain period of time in the month, you can now have it interact with your television at home, which means that you can connect the smartphone to the television or implement it into your note box.

Link, if you have managed to do this, a sound level will now appear on the television. Now, like with Guitar Hero, try to feed the blank fields of the sound notes that are displayed on the television with the notes you have collected from your box. This works if you use swipe and soft for small notes, medium touch for middle notes and hard touch for large notes. You swipe the selected note from your note box on your smartphone, which you see as a blank field on the television, with a pull from bottom to the television into the empty blank field. If the note from your note box matches the blank field, you will receive pearls as so-called success points, items credited to your account. Try to complete the entire song that the app has selected for you on the television, which is displayed as a sound level, and collect enough pearls. You can exchange the pearls you receive on platforms such as yt music, Apple music, Spotify, deezer. With the pearls you collect, you will receive a voucher for a specific premium access and its specific period of time. Alternatively, you can use the pearls on youjizz.

, You can now use them to exchange them for music vouchers

com to receive certain sexual seduction orgasms from the actors and their new videos, but registration with the pearls on youjizz.com is only possible from the age of 21. So, keep moving and collect enough sound notes in the real streets of this world with your smartphone in order to complete the sound level and the selected song with your smartphone on your television with your collected notes, such as in guitar hero. In addition, you can try to feed the sound level with your own collected notes in the battle swipe of the notes at home on your television with your friend who has also collected notes, and complete the sound level. The person who has received more pearl points comes out of this game as the winner, or you can choose an internet user randomly generated from the face carousel as an opponent.

No. 592 Yougotveryhot

As a single woman, you must try to hide several hot pictures in different places on the digital map, which is very similar to the real one from your surroundings and area, using your smartphone. In order to see the contact details and face of the user, you must use your radar to search for these pictures. The user, in this case a single man, follows the radar and the sat nav on the map. The person, the single man, must walk at least a required distance in order to activate the key to open the digital chest or picture book. The woman who has hidden her hot pictures has set a predetermined distance on the map, which the single man must walk in order to get to the secret digital chest or picture book.

Picture book with the hot pictures. The people on this dating site only know each other by name and cannot talk or communicate with each other, as the dating site only shows singles with their names in their area. To get in touch with them, you have to complete the task mentioned above, as a single man you have to search for the hidden pictures that are hidden on the digital map. If the man finds these hidden hot pictures that are in a digital chest or picture book, he can now contact the woman by voice or text message.

He has to activate his rear camera at the location where the hot pictures were found and open the chest or the picture book with his activated key, which he has unlocked by running kilometers. Now the man can see the hot pictures of the single woman and can therefore communicate with her from this point on via voice and short messages. The woman receives a signal that the chest or the picture book opens.

The picture book of hot pictures has been found and now knows that the man has made an effort to find it, this creates trust for the first communication between these two single personalities. Conversely, the man can also set the above-mentioned task for the single women and hide his hot pictures on the digital map and set a required kilometer route that must be walked in order to activate the key for the chest or picture book of hot pictures. You receive special points for the solved task, the more hidden places you find, the more yougotveryhot points you get, with these points you can redeem these points for real flowers, restaurant vouchers in the specially developed online shop and use these to make your close contact from this dating app happy.

No. 593 *Thegreatpeace*

No. 1 You will be invited to a stadium of the future in Bielsko Biala, each participant who was lucky enough to be invited to the stadium will sit down, according to his decision, on a seat he has chosen himself

No. 2 In the middle of the stadium or on the edge there is a giant smartphone, over which hangs, as usual, a large scoreboard

No. 3 Participants must register with a selfie before they are allowed to enter the stadium for free

No. 4 Now, when the participants have found their individual place and the stadium is quiet, the giant smartphone activates a face carousel, on this face carousel the faces of the participants can be seen

No. 5 If a face is randomly selected, this person must answer a question from the most diverse categories on this planet via microphone on the display board, which is very large and easy to read. If this person, who was randomly selected from the face carousel, has answered the question correctly, they can now go down to the stadium floor. This floor or area is a huge touch display based on the pattern of the roulette game. No. 6 The person must now make their way to the middle of the stadium, down to the area and throw a ball onto the huge smartphone display, which now shows a roulette pattern on the display. If the person in this example hits the number 13 on the smartphone display, they must position themselves on the exact number on the stadium touch display, which also imitates a roulette table.

No. 7 Additional participants will be randomly generated who have answered questions correctly and then hit the number on the smartphone roulette display with their ball and, after hitting it, positioned themselves on the stadium display on the form of the roulette scheme

No. 8 If there are approximately 8 to 13 people standing on the stadium touch roulette display, the stadium spectators can now transmit a digital and individual amount of money to the smartphones of the people standing who have been selected, based on what is shown on the stadium touch display by the scoreboard.

No. 9 Now all the stadium spectators call out the word herewego, and the giant smartphone display swings its roulette ball on the digital display, a number is generated on which a person is standing, this person receives the amount bet that was previously transmitted by the spectators from Google, if the ball does not hit a possible number that one of the participants is standing on, the stadium spectators must pay a certain amount of money, which was previously negotiated together, to the giant smartphone via Swip or Paypal, the money goes into the stadium operator's coffers and a small part goes to Google, who collects it for donations and charitable purposes.

No. 10 Now travel to several stadiums that try to make you happy in this world according to this principle and become a part of one of the most powerful game shows of this century. The great Peace powered by bielsko biala feat. Ladislav lufuishowski

No. 594 Gusuphosdown

No. 1 In this poker variant, you have to implement your voice-controlled mascot with what's app function at the table, which means that you dock the mascot to the USB slot of the table at your personal seat.

No. 2 In this no limit Texas Holdem variant, your mascot is selected as a random player from the internet who has logged on to the app in order to communicate with the mascot via live stream. This means that when it is the real poker player's turn and he throws his joker chip into the middle of the table, he activates his individual mascot, which connects with the app user. The mascot lies on the USB slot and has a camera under its feet. This camera sees the real poker player's cards and transmits this hand to the app user, who is connected to the mascot, via live stream video.

No. 3 Now the selected Internet user can communicate with the mascots by voice control, which means that he transmits the bet to the mascot through his voice, this mascot then calls out the bet by voice distortion and then the real poker player places this bet
must

No. 4 This is how the real poker player plays with the connected internet user through the mascot, the poker round, to the end, other real poker players also have a mascot and can activate this as a joker, 3x in the game in the evening or day, if they bet the joker chip when it is their turn

No. 5 The game will now become more fun and unpredictable, because the Internet users who control the mascot are not poker professionals, they play with the consent of the money balance or the player.

Bankroll together with the Poker Pro and will become secret stars on YouTube in a new show, possibly in the future with the help of the poker pro

No. 6 Registration to play with the mascot costs 13 euros per month, Internet users are selected, but through a random face carousel, so the probability is very low or high depending on how many users have registered for the game gusuphosdown that day, the registration price varies from day to day, sometimes it even costs only 0.99 cents, Sid and Ladislav wish you much success and fun in the new poker duel

No. 595 AlienReaction

Using the argument reality function, you have to capture aliens that have been hidden and implemented by the app in the real world near you and in your forest or residential area with your smartphone of the future. You walk in your forest or through your residential area and shout the phrase "alien ball". Your radar then shows you the aliens in your vicinity. By shouting the phrase you lure the aliens out of their hiding place. Once you have lured an alien out of the digital environment, you shout "sneeze, sneeze, sneeze" to him and then you throw your digital alien catching net at the alien, which is what was shown to you on the smartphone display. Once you have caught some aliens, you have to train them like Tamagotchis. After training, you can now let the aliens you have captured and trained compete against each other in an arena with other users. Exchange and share your aliens with other users in the app. The focus is on training these captured aliens. To do this, buy a tama-gotchi module or a smartwatch and transfer your captured alien to the module of your system or device.

Smartphone, nurture, care for and train it to an adult form and move enough kilometers a day, by walking or running, to accelerate the transformation and the training functions of the aliens, then, when the training is complete, transfer the trained alien from the Tamagotchi module back to your smartphone. In the arena you can now find out whether the exercise of your personal training has borne fruit, which means that the better trained alien, in this case, had to win his duel against a not so well trained alien, after winning you receive the alien character from your opponent from the Internet for free and can hide it for other users in the forest and its residential area, again using the reality argument, and receive alien dollars for making this alien available.

Use the snow dollars you receive from your own individual online shop to buy special abilities and skills for your alien characters to make them more resistant to others in the duel arena. Meet up at events to compete against other players of this game and try to let your trained aliens compete against others in a duel. Dueling works when you stand opposite each other in the real world with your smartphone. This means that you activate the duel on the app using the NFC function of your smartphone. You will now see your opponent's alien at the top of your smartphone display and your alien at the bottom of the display or in an arena where both of them take turns, one at a time, to exercise their special fighting skills against each other. Once you have defeated your opponent with your trained alien, all you have to do is swipe your finger at your opponent's smartphone to aim your alien catching net in order to capture the opponent's injured alien.

Now you can use the captured alien to your advantage, you can either train him further, keep him in your collection or release him back into the wild, by releasing him you receive Alien Dollars, which you should use as described above to acquire new alien characters, if you have enough Alien Dollars, or to buy special skills for your captured aliens that you have in stock, for the further training of your aliens.

A special function of the app offers the following service: if you have caught a special and rare alien in the wild with your smartphone using the navigation function and the radar, scan it with your smartphone. You now have the option of ordering this alien figure from the makers of the app to be delivered to your home as a figure. Once you have done that, you will receive it delivered to your home free of charge after providing your address. You can now add it to your inventory by scanning the QR code on the underside of the figure into your digital inventory with your smartphone. This only works if you can locate unusual and rare aliens in the wild and capture them with your smartphone. Exchange your figures with other users in the app and expand your inventory of your unusual alien characters. Go to the Alien reaction events and exchange your rare figures with other players there too in order to make your inventory of alien figures more unusual. Some figures are purely plush or plastic characters designed to be displayed, available in special colors and shapes, some, which are rather rare, have a Bluetooth box and can say short voice playbacks back and also play your favorite music via smartphone.

You can talk to them and even repeat stored words by voice for show. So keep moving and go hunting for the digital aliens in your area, village or town.

No. 596 SnowballReaction

No. 1 You have to select on a digital map, places that are displayed near and in your surroundings by the radar

No. 2 Try to follow and collect the vector points, which also serve as snow balls for the rest of the game, on the digital map. Once you have found the place, your smartphone will sound an alarm. A loud noise and the smartphone's vibration alarm will let you know that there is a digital snowman nearby.

No. 3 Point your smartphone or tilt it in different directions to make the snowman appear on your display

No. 4 Once you have captured the snowman on your smartphone display, use the digital snow balls that you have collected on the way to the snowman and fire it up with swipes of your finger, try to destabilize the snowman and then finally catch him with your digital snow catching net

No. 5 If you have not managed to catch the snowman, he will flee again to another place on the digital map. Follow him until you finally catch him.

No. 6 Try to find and catch the other and different snowmen that are hidden in a different place every month through the app, you will receive points for each snowman caught, individual points for particularly unique snowmen that were not as easy to find as the standard snowmen

No. 7 Try to collect as many points as possible in a month to climb up the rankings. If you manage to get into the top 3 in the rankings at the end of the month, you will receive individual and special snow balls which are needed to fight the extraordinary snowmen on the digital map, destabilize them and ultimately capture them. No. 8 If, for example, you have won several trophies through the rankings, you can exchange them for products in the specially developed online shop, either winter hats or winter boots or winter jackets for the next cold winter.

No. 8 So keep moving and go hunting for the snowmen in your area or surroundings, may the better hunter win.

No. 597 Xetrix+

No. 1 You have to select on a digital map, places that are displayed near and in your surroundings by the radar

No. 2 Try to follow and collect the colored path vector points, which also serve as letters with their own vector points for the rest of the game, on the digital map by actually running kilometers. Once you have located the place, your smartphone will now sound an alarm. A loud noise and the smartphone's vibration alarm will let you know that you are near a digital Xetrix+ duel.

No. 3 Point your smartphone or tilt it in different directions to make the xtetrix+ game appear on your display

No. 4 If you have recorded the Xetrix+ game on your smartphone display, you use the digital letters and their vector points that you have automatically collected along the way using the route guidance of the kilometers run on the digital map and using colored route vector points. The Xetrix+ game then starts automatically on the smartphone display. No. 5 If you have managed to start the game, the collected Xetrix+ will then fall down on you from the top of the smartphone display in a number that was generated by the kilometers run.

You now have to control the letters from above using your smartphone display, using the same principle as Tetris. Now try to connect the vector points of the letters to each other with the same color. You turn the letters in different directions and wait for the same color of a vector point to connect with one. If a vector point connects with one of the same color, it dissolves the two letters.

No. 6 Now try to collect more points than your opponent who, in real time, tries to solve all the letters he has collected himself

No. 7 The letters fall down to the display at different speeds and rotate around their own axis, so try to rotate in the right direction so that the colored vector point of the letter hits that of the other letters. If this happens, the letters dissolve and you get points for it. If you don't manage it, the letters sit on top of each other or next to each other until they completely block the smartphone display. If this situation happens, then if the display is blocked with the letters, you lose the duel, which was announced in real time with the opponent.

No. 8 If your opponent manages to score fewer points than you, you win the game and get special winning points. Try to duel, often in real time, to get the winning points. These points are important, with them you climb up the rankings. If you are in the top 3 of the month, you get trophies as items. You can exchange these items for vouchers in the specially developed online shop, and thus enable you to bid on products at a reduced price.

No. 9 Stay active through the game and promote your health with it, become a Xetrix+ master

No. 598 Sinapego

No. 1 You have to select on a digital map, places that are displayed near and in your surroundings by the radar

No. 2 Try to follow and collect the vector points, which also serve as bananas or different types of fruit for the rest of the game, on the digital map. Once you have found the place, your smartphone will sound an alarm. A loud noise and the smartphone's vibration alarm will let you know that you are near a digital monkey (DonNigga). No. 3 Point your smartphone or tilt it in different directions to make the digital monkey appear on your display.

No. 4 If you have captured the monkey on your smartphone display, use the digital bananas or types of fruit that you have collected along the way through the kilometers you have run and fire at the digital monkey by swiping your finger, try to throw the collected bananas and types of fruit at the monkey, the monkey will then try to catch them, if he catches a large number of them, the monkey will start singing, you will now hear a newly released song or album and can download it for free through the digital monkey if you click on him. No. 5 If you have not managed to hit the monkey in such a way that he has caught the bananas and types of fruit, he will flee again to another place on the digital map, follow him until you finally catch him again with your smartphone. No. 6 Try to find the other and different monkeys that are hidden somewhere else every month through the app and hit them with the collected bananas and types of fruit, you will receive points for each one. monkey they managed to feed, individual points for particularly unique monkeys that were not as easy to find as the standard monkeys

No. 7 Try to collect as many points as possible in a month to climb up the rankings. If you manage to get into the top 3 in the points rankings at the end of the month, you will receive individual and special bananas and types of fruit that are needed to meet the extraordinary monkeys on the digital map, feed them with them and ultimately receive songs or albums for free. No. 8 If, for example, you have won several trophies through the points rankings, you can exchange them for other albums and songs with other users. No. 8 So keep moving and go hunting for the digital, singing monkeys in your area or surroundings, may the better hunter win.

No. 599 Igeleye

No. 1 You have to try to control a hedgehog through the display of the smartphone in such a way that you have to collect the appearing and glowing vector points in different colors and shapes, as well as sizes, with the nose of the hedgehog

No. 2 If you have picked up some individual vector points with the hedgehog's nose in the correct order that is searched for on the display board, these will now appear on the spikes. You must now touch these with your finger using soft, small, medium, middle, hard, large vector points and use the drag and drop function to pull them onto the eye under the display board in the correct order.

No. 3 You will now receive points for collecting and pulling in the correct order of the vector points, credited to your account

No. 4 The eye collects the vector points, you must now protect this eye from opponents who try to attack it and hit the collected vector points by attacks from the display in such a way that this eye is now destroyed and the vector points return to the display

No. 5 The enemies can use the eye, which is located under the display panel, as a weapon against the enemies on the display, if you have charged it with enough vector points, you press the eye with soft, medium, hard touch and draw a vector laser beam on the enemy enemies, in this case, they are different insects

No. 6 Try to destroy the enemy insects through the eye and remove them from the display, continue to collect the colored and different vector points in the correct order and try to reach a required score within a certain time, if you do not manage to reach the required score within the required time, the level is considered lost

No. 7 In addition, the background interacts in real time, Google Maps loads the environments and areas that you have specified into the background of the game, through the interaction, this can be to your advantage or disadvantage, for example, barriers appear or the background swallows the vector points for you in the game

No. 8 It may be that you have to collect rotating letters and their required vector points in order, which makes the game more difficult because you are not allowed to touch the rotating letters with the hedgehog's nose, otherwise points will be deducted from your account

No. 600 Youcandoit

No. 1 You have to select on a digital map, places that are displayed near and in your surroundings by the radar

No. 2 Try to follow and collect the vector points on the digital map that are used for the further course of the game. Once you have found the location, your smartphone will sound an alarm. A loud noise and the smartphone's vibration alarm will let you know that there is a digital product nearby that you have previously selected in your watch list on the youcandoit platform. No. 3 Point your smartphone or tilt it in different directions to make the digital product appear on your display.

No. 4 Once you have captured the product on your smartphone display, use the digital vector points that you have collected on the way to the product and fire it up with swiping your finger, try to hit the product with the vector points on the correctly shown vector blank spots and thus freeze it and turn it into an ice cube, and then finally capture it in the shopping basket with your digital finger, via drag and drop

No. 5 If you have not managed to catch the product, it will hide again on another place on the digital map, track the product until you finally catch it

No. 6 Try to find and catch the other and different products that you have previously selected through the app and that are hidden somewhere else, you will receive points for each product you catch that you have turned into an ice cube, individual points for particularly unique products that are not as easy to find as the standard products No. 7 Try to turn as many products into ice cubes as you want, after catching the products, load the digital ice cubes into your watch list after the search, now reduced price banners and reduced price information for these products you have caught will appear in the watch list

No. 8 Now you can click on these products and buy them online at the individual price reduced by the platform, so go and look for your pre-selected products that you had selected in the shopping app that are in your area or surroundings in the village or city, and try to freeze them using the above principle in order to get reduced prices for these products in the future

No. 9 Use the points to unlock the new search for new products from your watch list, so that you can find new products from your watch list at a reduced price using the argument reality app and integrate them into the shopping app. You can also exchange your ice cubes (captured product) with other users to get other products with reduced prices, exchange your captured ice cubes with another product with the user to get a new variety with reduced prices in your shopping list.

No.601 Icanforeyou

No. 1 You have to try to fire a critter as far into a field as possible using a sparrow slingshot, which means that you have to hit running creatures on your radar outside the field in order to reach them with the critter and ultimately eat the creatures. If you have fired several critters at a creature, they will stick to you and you now have to click on the critters using soft, medium hard touch to eat the creature in quick form.

No. 2 Also, after examining the radar, try to hit other figures and monsters with the sparrow slingshot to attach the critters to the monsters and other figures, try to use the sparrow slingshot to place these critters on the creatures and hit them, each hit leads to the life energy of the creature being reduced or diminished

No. 3 So you have to aim carefully and pay attention to the weather conditions and wind speeds, these cause that you can not fire and hit the creatures so easily, so like in golf, pay attention to the scoreboard for these adversities that adapt to the real world

No. 4 The game is played in the morning, noon and at night, at night they have to select the colored, glowing critters and target the correct colored creatures with the same color and finally hit them

No. 5 The critters serve as ammunition, to get more critters you have to keep your hit rate stable using a display so that new critters can be generated automatically

No. 6 As the game progresses, you can catch special items while the critter is flying through the air and towards its destination, and change and transform it in the air into a bomb, ice ball, fireball, arrow, water ball, time fuse, flamethrower, etc. This transformation gives you more options to destroy your mobile creatures.

No. 7 Finally, the critter can and must also complete a certain distance of kilometers in terms of destroying creatures in order to refine his sparrow slingshot and receive points for each creature eaten and destroyed. These points can be used in the shop to improve your sparrow slingshot with special abilities.

No. 8 Look closely at Radar, which is used to determine the location of the creature, target it and hurl the critter at the moving targets, i.e. the running creatures and monsters

No. 602 Jumpthetime

No. 1 You must try to jump up to a required height in kilometers, this means that you jump onto an hourglass, this runs with a certain time, you must jump onto the surface of the hourglass, the time runs out, then you fall down, try to jump onto other hourglasses that have an individual time rhythm, pay attention to the color of the surface, you must follow this using the display board, so jump onto the surface to the next closest hourglass in the correct color order

No. 2 Try to reach the required height, which was set before the game, in a certain total time, while you jump from hourglass to hourglass, enemies appear and try to prevent them, you have to hit them with colored vector points caught in the air to make them harmless

No. 3 The background interacts with the game, it brings advantages and disadvantages, such as swallowing the enemies, releasing additional hourglasses, stopping or accelerating, the speed during jumping, etc...

No. 4 So, when you stop on an hourglass, pay attention to the time display on the hourglass, if the time runs out, then it turns around and you fall down one level or completely freely as described above, so try to plan your jump time moderately and correctly and do it in time before the sand of the clock falls down to reach the required, set height of kilometers at the end of the game

No. 603 Chamberofsecret

No. 1 You are in a chamber of horrors, which means that you and your player appear in a random, dark room

No. 2 In this room there are sound boxes hidden, and these are connected to other players via voice message function, these other players now speak from the app, old sayings from the Book of Horror.

No. 3 Now ghosts appear from the sound boxes, you have to try to catch them with your vacuum cleaner, once you have freed the room from the ghosts, it is now your turn to say the old sayings of the Book of Horror into the smartphone and thereby summon a random dark room with ghosts

No. 4 Try to catch the ghosts again in the next level, they are now in a new dark room that is bigger and scarier, use your flashlight to show the ghosts in a certain radius and then finally catch them with your individual vacuum cleaner

No. 5 Be careful that the ghosts do not steal your life energy and, if you have taken all of their energy, do not turn them into a ghost that can then be captured by other players in the new level. If this happens, you are eliminated from the game.

No. 6 Try to use your vacuum cleaner to capture the required ghosts that are sought on the display board through the chambers of horrors that are randomly generated from the locations in your surroundings by Google Maps

No. 7 For each ghost you capture you will receive ghost points, which you can use to unlock new levels or to try to improve your vacuum cleaner in the future

No. 8 If you have captured the ghosts that are generated by other players in the app through their voice pronunciations from the old book of horrors, through the sound boxes, you must now illuminate these sound boxes with the collected letters, which you can shine on the floor or walls in the Chamber of Horrors, with your flashlight and remember them in the correct order, and enter them as a code in the sound boxes so that the other players can no longer pronounce a new ghost.

No. 9 After catching all the ghosts in the game's randomly generated Chamber of Secrets, you must choose a portal that you will use to get to the next Chamber of Secrets

No. 10 Clean all the chambers of horror of the ghosts with your individual vacuum cleaner and deactivate all the sound boxes of the other players using the letters you have memorized. No. 11 Travel through the various chambers of horror and hunt the ghosts and also collect items that are important in order to change the game events randomly.

No. 12 At the end of the game, when you have deactivated all other players who were randomly selected for the game through the Internet carousel process, you will have the opportunity to download the Book of Horror as a digital download or ebook to your smartphone.

No. 13 Now log in again using the procedure described and speak the incantations from the Book of Terror to participate in this game again

No. 604 Pumpetpunch

No. 1 In this game you try to do the following on the smartphone display: you see pump lines on the display board, pay attention to them and use the pump lines that appear on the smartphone display in the correct order to create a connection between the remaining pumps that are in the corners of the display.

No. 2 You have to put the pump parts, lines together according to a scheme of your choice, this means that you try to connect small, medium, and long pieces, lines together to get a connection to the pump

No. 3 Based on the connection, when it is completed, start the pump and you must tap with soft, medium, hard touch to absorb the different colored vector points from the display

No. 4 Insert your pumpline like a snake and position it in the correct directions to pick up the colored vector points that appear

No. 5 If you have some colored vector points sucked up by the pipeline, use them to hit enemies that appear, the game is underwater, watch out for enemies trying to sabotage your pipeline

No. 6 Punch these opponents with your pump sight and try to hit the correct colored vector point, depending on the color, the correct colored opponent, if this does not happen, the shot is not marked as a hit

No. 7 Pay particular attention to the shape and color of the absorbed vector points that you use to hit the individual opponents with your pump

No. 8 If the enemy sabotages a part of the pipeline, the important intermediate piece disappears from the connection and can no longer absorb the colored vector points. Use this destroyed intermediate piece as quickly as possible to ensure the normal operation of the suction.

No. 9 You receive pump points for each enemy you hit, which you can then use to add new pump parts and intermediate pump lines in real time in the game

No. 10 Meanwhile, use the pump snake to suck up the different colored vector points to charge the main pump. These vector points serve as ammunition. Make sure that your supply is always full, otherwise you will no longer be able to fire at your opponents.

No. 11 Avoid sabotage and destruction of the pipeline, and always try to reconfigure your pipeline to match the vector points

Mr. 12 Put the pump parts together to form a construct and defend your pump station from the enemies who try to attack it individually

No. 13 Put the pumping parts together like memory and puzzle pieces and vary their shape and their effect of changing the connections

No. 14 Kill all enemies in the required time and enter the new, creative levels with background in the future

No. 605 Heartwear

No. 1 You have to try to buy a certain clothing product, the first thing that comes to mind, to do this you use the Google Photo AI program, enter your desired clothing in text form and use the scroller to select the categories, as mentioned, for example, current time, current year, current emoji, current temperature, comedy or action from the film world etc. or the same, selected from the past No. 2 Once you have entered this data, Google AI Photos shows you the clothing you have selected for tomorrow or for the future, which you can then drag and drop from the figure into your shopping basket, Google AI Photos creates a realistic representation of a person who may correspond to your desired clothing

No. 3 If you have received a representation that does not appeal to you and you do not like it, you have 3 attempts for each day, as an option available and to choose from, you have to trust your gut feeling and not distort your senses with regard to your input No. 4 If you like the figure shown with the AI-generated clothing, enter small hearts, vector points, at the positions of the clothing pieces and attach them to your reminder list

No. 5 Go to your shopping cart and click on the clothing item you just generated and you will immediately receive the next options where you can get and view these clothing items in your area

No. 6 Go to the suggested store in your area and try on the clothes live and then decide whether the purchase makes sense for you

No. 7 Exchange your reminder list with other users of the app to get new inspiration, be open and confident in exchanging ideas with other users of the app

No. 606 Thereiam

No. 1 You have to take a seat in a digital poker room and register for the game, no limit Texas Holdem - thereiam, you then take part in the table with an individual stake amount and try to redesign the game with a joker. No. 2 You connect via Skype, microphone and camera, with an added digital mascot (see app catdoad /

bet with the same name), which is placed on the digital poker table for the player

No. 3 The Skype user controls the digital player with the mascot or takes over the administration and responsibility for the game when the normal player activates him as a joker for the current game and its round.

No. 4 Via Skype, the randomly selected player communicates with the normal player of the game, as a joker, the real-time connected game on the digital poker table and the game action

No. 5 is the digital mascot's turn, so the Internet Skype user selected by the random generator speaks the mechanisms of the bet to the leading digital player at the digital poker table

No. 6 As a digital player, try to quickly agree on the use of the mascot user via small talk, because your time runs out faster than you could think, so react individually and carefully via the swipe-protected Internet connection or the protected communication channel

No. 7 Ultimately, each player in the game can activate the mascot 3 times when it is his turn, making the game unpredictable and intuitive, either to the advantage or to the disadvantage of the entire game at the digital poker table

No. 607 Vectordoods

No. 1 You use the following additional hardware to bring the DJ mix to a real level (see the vinylmix+ app), which is used to sweeten and personalise the DJ mix with new flavours in the future. No. 2 You order coloured DJ vectordots, which you then stick or sticker onto the rotating vinyl record. These are equipped with touch and WiFi sensors or infrared or Bluetooth. No. 3 Now tap the coloured DJ vectordots with a soft, medium or hard touch while the vinyl record is rotating on its own axis. The pinned coloured DJ vectordot that you have touched then sends a signal to the main DJ console. A certain transition or individual sound or beat or voice, depending on how you have programmed and set up the coloured DJ vectordots beforehand, is now played through the sound system to the mix in order to personalise and refine it with new flavours. No. 4 Each coloured DJ vectordot, 6 on the number must be set on the vinyl record before use, this means that you connect it to your music software via USB and then, as mentioned above, play or load the individual sound rhythms onto it. No. 5 After transferring the sound rhythms to the different colored DJ vector dots, you can now place or stick them onto the vinyl record, these will now rotate with the vinyl record on their own axis, now use your finger and touch one of the colored DJ vector dots with soft, medium, hard touch, now the set sound that was previously played onto it via USB connection using the music program is transferred to the main DJ console and you activate it in real time if you want by pressing the magic button.

No. 6 You click or touch the colored DJ vectordots and the sound as it was played on them is added to the mix in real time, stay individual and mix, via colored vectordots, your new DJ mix of the future using your own finger input

No. 608 shoe fork

No. 1 You must try to catch or collect with your body and mouth running insects that randomly generate themselves on the smartphone display and try to protect different and different vector points in colors and shapes or different sizes.

No. 2 You must now try to protect these insects from a bird's eye view with your shoe fork from running shoes that can crush these insects. This works if you try to tap one or more shoes with your digital shoe fork with soft, medium, hard touch

No. 3 If you touch a shoe shortly before it tries to crush the insect and drag and drop it, meaning place the shoe fork in the shoe and use soft, medium, hard touch to spread the shoe so that a certain size of foot can fit in it, if you manage to spread this shoe for the appropriate foot that is shown on the display board, in the correct order that is required, then the foot will automatically integrate into the shoe and ultimately the shoe will run out of the smartphone display and be rendered unusable, which means that it will no longer be able to crush or destroy the individual insects.

No. 4 Pay attention to the insects and give them a vector path by finger touch, swipe or slide to catch the vector points, make the swipe so intelligent that they catch or slide several vector points at once and in one go.

can collect

No. 5 By catching the different vector points, you get points, with these points you have to bid on time items in order to complete the game in the required time

No. 6 Try simultaneously to control the insects with the vector path and specify its direction, plus to prefer the emerging shoes with the shoe fork so that the feet from the display board can fit in it, and then automatically run away with the shoe from the smartphone display and thus not step on the insects

No. 7 You must separate the smartphone display from the vector points as far as possible and reach the required score in the running time to get to the next level

No. 8 In the next more difficult level, the background interacts with you, it swallows, hides, sucks, or spits out new vector points from its gates to help you or confuse you, there are always new functions that the background performs, depending on which level you are in.

No. 609 Crawlyousee

No. 1 You must pay attention to the direction symbols of the smartphone, tilt your smartphone in the specific directions that are shown to you, either up, down, right, left and pay attention to the arrow directions of the corners in which you move the smartphone

No. 2 Now, for each correct arrow direction that you have moved with the smartphone, insects appear on the display. These insects have to catch special colored and differently sized moving vector points that appear and are spit out from the eye at the top of the display. No. 3 You touch the corresponding insect and tilt your smartphone in the direction where the different vector points are located, just in front of the insect. Before you pick up the vector point, you have to activate the insect using soft touch for small, medium touch for medium, hard touch for large vector points.

No. 4 Now grab the vector points from the display and detach the smartphone display from the emerging vector points produced by the eye

No. 5 You receive one star for each vector point you capture. You must collect and receive the required number of stars within the required time to advance to the new level.

No. 6 Try to collect all the vector points on the smartphone display with the different insects. If you have done that, the eye will no longer produce any and no new ones will appear on the smartphone display. As described, you must also have collected enough stars to unlock a new level with a higher level of difficulty.

No. 7 in the new levels the background of the game interacts with them, it devours or produces or slows down or accelerates their different vector points in the game to make the game harder or easier

No. 8 In addition, the eye shoots laser beams at your insects, which you have activated and brought to life by using the arrow directions on your smartphone. Watch out for the laser beams and avoid them in order to be able to control your insects to collect the vector points.

No. 610 Voicetobox

No. 1 You have to choose your favorite boxer as a character, you can also create one yourself or integrate your face into one of the individual boxes via selfie

No. 2 Now you design the boxing ring, which means that you put 4, 6 or 8 sound boxes in the corners of the boxing ring or on the boxing ropes

No. 3 Now select your favorite songs from your music archive and touch them on the respective boxes, by touching them via drag and drop, you now put the song into the sound box

No. 4 Now the spectacle begins, the boxer has to get into the ring and suddenly hears text words from one of the sound boxes, now he has to try to punch out the word of the song (instrumental plays in the background), which is shown in letters and its vector points in front of the boxer.

No. 5 You see the letter and its vector points in front of the display and have to use soft, medium, hard punch by pressing the control buttons to trigger these punches and try to hit the different vector points of the letter

No. 6 If you hit the vector points in the right order, the letter will disappear from the display and a new one or a word will appear in front of your face on the display of your smartphone

No. 7 Try to make the words and the entire text or text passages disappear by punching the vector points

No. 8 You get points for each vector point you hit, which you can use to turn off the sound boxes. This happens when you activate these special points. If you have collected enough points, you can first deactivate a sound box, try to deactivate all the sound boxes to download the song for free as a gift.

No. 9 Finally, people who log into the game by chance from the internet can intervene in the game. These people call out these words through voice commands via their smartphone (microphone), which are then played through the sound boxes on the boxing ring.

No. 10 You must now punch these words with your vector points, with your boxing glove or boxer's way, punch the vector points of the appearing words and letters from the scheme in order to turn off or fight the Internet users so that they keep quiet

No. 11 When you have collected enough points against the internet users, the game switches to the view of the person who is now giving the voice commands, so you as a boxer now distribute the words through the sound boxes (via the smartphone's microphone) and try to disturb the internet user who is now acting as a boxer and try to force him to give up the fight.

No. 12 You only have a limited time to say the words, if the time runs out and the Internet User Boxer gets all the vector points, then the game switches back and it is now your turn to try to punch out the Internet User's words with your boxing gloves

No. 13 Defeat the Internet users and challenge them to new opponents in the randomly generated Voicetobox game

No. 611 Lettering

No. 1 In this app, instead of a sound layer, you have to take a lettering that you have written yourself with your digital pen on the display of your tablet. No. 2 You will now receive blank vector points on the lettering that are placed in the correct positions of the letters.

No. 3 You must now try to insert the correct colored sound vector points into the blank vector points to generate a sound

No. 4 A color appears briefly on the blank fields that you have to remember. Now touch your colored vector points with your finger using drag and drop from your vector line with the running vector points that appears at the bottom of the display and pull the correct colored sound vector points into the blank vector point. No. 5 You can also tap the blank vector point field (circle) several times to assign the correct color of the vector point. These 2 options switch in the game. Pay attention to the time, as it is running against you. You have to insert all the colored sound vector points into the blank vector point fields (circles) within the required time. No. 5 Once you have assigned the lettering to your colored sound vector points, you will be credited with one point for each sound vector point that you have placed correctly. Collect enough points to now purchase instrumental sounds. You will be able to download these from the sound archive when you have collected enough points in the game.

No. 6 Now try to assign sound beats to the vector points you set previously. This is done by dragging and dropping the downloaded sound notes (sound vector points) from the eye of the display board onto the colored sound vector points you set previously at the right time.

No. 7 Try to set the correct sound note vector points on the colored sound vector points, your lettering will now get a sound with notes if you have set all sound vector points on the previously set colored vector points

No. 8 Press play and now try to hear what your self-created lettering sounds like. You can also use this lettering or the letters in vinylmix+ (see app) and see what kind of sound was generated for the song.

No. 9 Battle with other users from the app to achieve the perfect assignment of the vector points in the required time, those who collect more points and generate the sound that fits the song win the inlettering battle

No. 612 Vinylmix+

No. 1 You have 2 digitally displayed vinyl records on the display of your smartphone that can be seen

No. 2 Now integrate your name onto the vinyl records, this means that you drag and drop the first letter onto the first vinyl record and the second onto the second vinyl record from the name list

No. 3 Now the first two letters with their vector points appear on the vinyl records, on the first vinyl record, the letter S and on the second A

No. 4 in the letter D 6 vector points are added, in the second letter A 5 vector points

No. 5 When the vinyl record starts to rotate, the transparency or transformation of the song begins. You tap the colored vector points of the letter with soft, medium, hard touch and receive additional instrumental transitions for each vector point, which are played live in the recording, using soft, soft transitions, medium, for medium and hard touch for hard transitions.

No. 6 You can also click the switch button in the app and use the transitions to activate other beats or voices with the vector points

No. 7 Decide what you want to use, you can possibly activate this function on the vector points on the second plate and on the first the instrumental transitions

No. 8 A required vector point is shown on the scoreboard, which you must click on at the right time with touch, you will receive sound points for correctly following the sequence

No. 9 With the sound points you have earned, you can download new sound packages for the DJ app and transfer them to the vector points. Select a sound package you have earned and integrate it into the sound vector points. Drag and drop these packages onto the vector points and operate them as described above with soft, medium, touch to get an individual mix in the live recording of the song.

No. 10 Once you have created your current individual mix using the digital new DJ letters - vector points system, you can apply your remaining letters and transfer them to the vinyl records. Once you have completed your mix, upload it to the in-house music DJ platform.

No. 11 You can record your mix by imitation and send it to other DJs in the system for editing, they can then change their mix live using the above principle and make it sound better or different

No. 613 PsmartSound

No. 1 In the future, you will order so-called psmart Instrumental Sound Cover cases for your smartphone. Depending on which model you own and use, the case will then be standardized and created to suit you. After ordering, you cover the cover on the back of the smartphone. The free game for the Instrumental Sound Cover will now be activated automatically on your smartphone. For the guitar, you must now play a song in the background from your streaming provider and try to play the blank fields that appear with the instrumental cover case in the guitar design so that the sound from the cover case you are playing flirts into the blank fields.

No. 2 Collect points, as in, see guitar antre and connect, for example, next an instrumental sound cover aka double bass and try to collect points after it, as just mentioned principle

No. 3 You have 5 instrumental cover sound cases in your package, just now 2 instrumental covers were introduced a little, the rest of the instruments that can be purchased as sound cover cases on the internet site psmartsound.pl are as follows: The remaining instruments follow with the names: Flute, Piano, and Violin

No. 4 You can also add and order other instrumental sound covers in the package, which you can then select yourself and easily from the website psmartsound.pl

No. 5 You can then use the points you have collected to compare them with other players, depending on how many you have earned. If you have one of the top 3 positions in the points ranking, you will receive a voucher for a free instrumental sound cover package, which you only have to send to your friend so that your friend can challenge you in real time and with his skills to a psmartsound battle in the real world. No. 6 Try to meet up with your friend at home in person and connect your smartphones of the future to your television of the future and stream the game live to keep a larger display in front of you. Record this playback and ask YouTube users to replay it in videos or improve it in order to learn from it and get motivation to ultimately become a musician, perhaps in the future to take part in live tournaments and win prizes there.

No. 614 Brain Lead

No. 1 You have to scan your eye color with the Alfons camera, measure your body weight with the Alfons smartphone and scan your body with the Alfons smartphone, thereby you will receive a comic-like brain with space modules, displayed

No. 2 Click on a module, i.e. on a free space in the comic brain, wait for a short response via voice distortion - voice message, in this example the response says the word, do you want an invertload on chukabakka language, confirm with yes or no

No. 3 If you accept the confirmation with Yes, the superdrive stream starts, which means that you turn on your computer simultaneously with the app user in real time and then make the data that you want to exchange available at the same time, you will see the image in a comic-like graphic, the contents of your computer hard drive No. 4 Now place a digital flower on the data folder that you have chosen and

activate your superdrive stream after placing it, which means that the other person carries out the same principle in the same way and at the same time No. 5 If the drag and drop time management has been successfully checked, you can exchange your data with each other via live superdrive stream

No. 6 Now one space module on the comic brain has been used up, you still have many modules at your disposal in the free version financed by advertising, which does not

offer download and upload speeds in the full bandwidth, if you buy the super deluxe version, you can use several modules of the comic brain simultaneously and at the same time, plus the full speeds of your broadband Internet connection, use

No. 615 Handstand Comic

No. 1 You have to choose a stick figure or a woman, while other participants play simultaneously, which means that you go first and now the Internet users can see on their smartphone display that you have positioned your stick figure or woman

No. 2 Now a player from the internet swipes in one direction on his smartphone through his touch display, either up, down, left or right, now a new stick figure appears on your smartphone screen on the hands of the stick figure or woman to be standing on.

No. 3 This continues from now on until other players in this massive multiplayer session have reached a certain height with their stick figures, which means that the checkpoint is now activated, as the users of this game have built the structure to the checkpoint together with their own swiped stick figures in real time.

No. 4 At the checkpoint, several people must now sing a song passage correctly together, see the principle of the karaoke function, the song in this example is handstand and is by miley cyrus, who provided it

No. 5 Sing the song passage, alternately, simultaneously through your microphone and practice it correctly, then you can continue to build the line figures upwards. If you sing the passage incorrectly, a line figure, whether male or female, will shake with its legs or hands on the constructed structure. If you continue to sing the passage incorrectly, the figure will collapse and fall apart. Hopefully, you can sing the song passage perfectly together on the next attempt, otherwise the next line figure will collapse and in the worst case, all the line figures will break and collapse into one another and you will have to start the game again from the beginning with your team. No. 6 If you manage to reach the required height, you will receive a points scale showing how quickly you climbed the required height. The fastest player teams, which vary from day to day, will receive premium access as a gift at the end of the month from the music streaming platforms as a free download code.

No. 616 Misterniceguy

No. 1 You see a live broadcast of a poker game on YouTube, no matter which scheme is shown, the following happens: the same game scheme is now streamed digitally on misterniceguy.pl, at the command of the owner or organizer, where players from all over the world register via a random face carousel

No. 2 If the players who have registered with their own selfie and their bankroll is the same as that of the live player from the YouTube channel are now on the digital, live stream poker site misterniceguy.pl, the game now begins with the viewers who could be provided with the following option on YouTube Premium

No. 3 You log in to Youtube Premium Poker live streaming and now play in real time as follows: the selected Youtube viewers can attach emojis to the video of the live poker session, which is broadcast live, in place of their favorite poker player, who can be seen live on the video, using soft, medium, hard touch to the video and to the player, special and newly invented poker emojis, these special and newly created poker live stream emojis transmit the following information in real time from the video live channel to the digital players on the platform misterniceguy.pl

No. 4 This information includes the poker move, the bet amount and the poker hand. The poker move is transferred to the digital player of misterniceguy.pl using soft touch, the bet amount using medium touch and the poker hand using hard touch. This means that the randomly generated digital player now receives a special poker emoji on and next to his digital poker face. He can use this as a joker 3 times in the game.

No. 5 If he uses the joker, he can use a soft touch on his emoji, which he received live from the YouTuber, because the YouTuber clicked on his favorite player in the live stream video and attached an emoji to the video, to see the YouTube player's poker move via animation, next to his digital character pseudonym, by medium touch on the transmitted poker emoji, he receives the bet tip or suggestion of an individual amount to bet, by hard touch he can now see the cards that the poker player is playing on YouTube in the live session

No. 6 From this information, the digital poker player on misterniceguy.pl could learn something or possibly react in the same way and integrate his round, if he has used the joker, into his personal poker game rhythm, the special poker emoji should help him and, when it is his turn and he has used the joker, can possibly, completely or probably change the entire game, the entire real-time game is provided via Swip (Show width interface protocol) technology, in live and digital, through which, see the app Gummibärenbande in the future, insured and secured for you to watch via pay per view

No. 617 Critterball

No. 1 You try to evoke a Critterball, which means that you try to pick up other Critters, small, medium and large, with a Critter through different directions and paths in a selected capital city, this world

No. 2 You control your critter through Google original landscapes, be it the capital of Germany (Berlin)

No. 3 You must try to pick up other critters on the paths and tracks, for example if you have picked up some small, medium and large critters that were indicated by the radar, the critter transforms into a critter ball

No. 4 Now you must try to roll over people, cars and other creatures that you have located with your radar and direction finder with the Critterball

No. 5 You have to drive the required sections of the route, in this example, in Berlin with your Critterball and roll over the various people, creatures and cars to get points.

No. 6 The game is timed and you have to meet the required goals on the scoreboard that are being sought, which means that you have to find a certain number of people, individual cars and creatures on the tracks, streets of Berlin in order to finally overwhelm them

No. 7 For rolling over a person you get 1 second per person, the more you roll over at the same time, the more points you get, for cars, 2 seconds and for individual creatures, 3 seconds

No. 8 You have to find a certain number of people, cars, and individual creatures within the required time limit and then roll them over. If you don't manage it, the Critterball turns back to its initial status and you have to start all over again, looking for new Critters.

No. 9 You also get normal points for rolling over people, cars and creatures, which you can then use to equip your Critterball with the following abilities, namely giving it special abilities, for example, Critter Arrows, Faster Rolling, Resistance Ability, the transformation into a Fireball, Ice Ball, Turbo Ball, or the inclusion of individual weapons, such as machine guns, grenades, bazookas, etc.

No. 10 By the way, you have to collect elementary important items on the route in the streets of Berlin. If you have collected enough of them in the required time, these items are used to expand the routes or streets of Berlin. The items are kilometer stands and are hidden in different forms on the streets and routes of Berlin. The more items (kilometer stands) you find and collect, the more streets and places you can then unlock later on the map of Berlin.

No. 11 In multiplayer mode, you can try to control Critterballs together with several people and, in this example, make Berlin unsafe. There is also the Critterball Racewars. In this game, you play against other Critterballs (other participants from the Internet) and, like in Mario Kart, you have to drive the tracks of the capital cities of this world and come in the top 3 of 13 players in the required time to unlock new tracks in this race game. As described above, you can pick up special weapon systems and transformations while driving to prevent your opponents from winning. No. 12 Critterball can also be played on virtual reality and the original locations and landscapes can be driven through with the Critterball.

No. 618 Tourguy

No. 1 You have to try to complete a digital map in different countries, that is, the digital map shows you goals that must be completed in the real world in order to find the game that was hidden by the app

No. 2 Use the navigation and radar function to hunt for the digital game in your area or surroundings, you don't know beforehand what kind of game it is

No. 3 If you have set off on the route with your smartphone, various routes are made available to you and presented to you, you collect colored vector points (flight - kilometer points) along the way, these show you the navigation system, as well as the route guidance

No. 4 When you arrive at the place where the game is, the smartphone will light up an alarm through the radar. You must now position the camera in the position where the illuminated point on your radar is located. This means you scan the position and, if you are lucky, the digital game will appear on the smartphone screen. You can now take part in this game live and in real time or add it as a checkpoint level to your level inventory and continue playing at home afterwards.

No. 5 Before you can play the game, you must check whether you have collected enough colored vector points (flight kilometer points) in the right color, because only then will the digital game be activated on your smartphone display

No. 6 If you have collected enough colored vector points (flight kilometer points) on the various paths to the destination location of the game, you can use your digital game that now appears on the screen

No. 7 In addition, you must touch the smartphone display where the game is displayed, using soft, medium hard touch from the puzzles that block the display to each other, in order to give the display a clear view to make the game visible

No. 8 Once you have made the game visible, the game starts, which means that you try to place a digital airplane with your finger and its parachute jumper with swipe on a specific place in the game

No. 9 If you have swiped your plane, this plane now flies digitally through the screen, now you have to drop your parachute jumper, the tour guy, and let him land on the required target, you get points depending on how you land on the target points circle, these are added to your flight kilometer points as a bonus, and bring more input for your points counter, since the targets are individual points circles on which the parachute jumper (tour guy) lands

No. 10 Scan the destination and save the level on your smartphone in your level list, then call it up again at home in chill mode and comfortably recall the level and then play it either on the smartphone or your TV connected to the smartphone

No. 11 Collect the levels hidden by the app on your digital map in the real world, collect enough to start the game at home or on site, for each level you pass you will receive flight kilometer points, you collect these points to later exchange them for real flight kilometers on the website tourguy.com No. 12 Play through the levels you have collected

live on site or at home, after each successfully passed level the app will generate a new one and hide it on your digital map for you to find, depending on which country you are currently in, go on a search and find the new levels to be able to continue playing the game

No. 13 The kilometers run in real life are needed to be able to control your plane digitally, so walk the routes and collect real kilometers in addition to the colored vector points (flight kilometer points) to set your plane in motion in the game, if you run out of digital flight kilometers, the game pauses, so you have to go outside again and collect additional kilometers to set your plane in motion in order to be able to control it through the levels.

No. 14 Try to keep moving and play through the extraordinary levels that are generated for you from Google Maps according to the principle described above. You will become the next tour guy in the points ranking and receive an original gifted flight ticket as a gift for traveling to other countries in the real world to continue the game. If you are first in the game rankings, you will receive a tour guy who will accompany you to the country you want to travel to with the free flight ticket and will experience the trip, tour or vacation you want with you.

No. 619 folding chair

No. 1 You must try to go through a digital map in your area or surroundings, that is, the digital map shows you goals that must be completed in the real world in order to get the desired download wish and get what was hidden by the app for free

No. 2 Use the navigation and radar function in your area to hunt for your digital download wish. You know in advance what you have expressed as a download wish, because you have published and expressed this wish in the app.

No. 3 Once you have set off on your journey with your smartphone, various routes are made

available to you and presented to you. You collect colored vector points along the way. Each of these vector points has a specific meaning. The red ones are digital megabytes, the yellow ones are digital kilobytes, the green ones are digital gigabytes, the blue ones are bits, the purple ones are positive individual download speeds, the ice blue ones are negative download speeds. These show you the navigation system, as well as the route guidance to the destination of your desired download position.

No. 4 Once you have reached the place where the wish download is, the smartphone will sound an alarm through the radar, you must now position the camera in the position where the illuminated dot on your radar is, which means you scan the position and, if you are lucky, the digital wish download will appear on your smartphone display, spoiled by the app

No. 5 Before you can click on the wish download, you must check whether you have collected enough colored vector points (download quantity - kilometer points) in the right color, because only then will the wish download be activated on your smartphone display.

No. 6 If you have collected enough colored vector points (download quantity - kilometer points) on the various paths to the goal location of the game, you may use your digital wish download, which now appears on the screen, as approved. No. 7 In addition, you must touch the smartphone display, where the wish download button is displayed, with a soft, medium hard touch from the puzzles that are blocking the display to each other in order to give the display a clear view in order to make the download button visible. No. 8 If you have made the download button visible, the wish download only starts when it has been checked in what quantities, sizes and speeds you have collected the colored vector points that served as a unit by walking on the various paths that were available to choose from.

No. 9 If you have collected enough individual or different colored vector points on the way to your destination, the app calculates the size and speed in which you can receive your desired download

No. 11 Collect the target download locations hidden by the app in the real world using your digital map, collect enough to start the desired download at home or on site

No. 12 Download your desired download , that you have collected, live on site or at home, after each successful wish download, the app will generate a new wish that you have expressed and will be displayed on your digital map for finding, depending on which

Country they are currently in, hidden, they set out on the Search and find the desired downloads to continue playing the game

No. 13 The kilometers you walk in the real world are used to determine your colored vector points, file sizes and internet speeds. No. 14 Try to keep moving and, according to the principle described, walk through the extraordinary destinations that are generated for you from Google Maps, you will be the next folding chair uploader in the download rankings and you will have the opportunity to integrate your fantastic and special media data into the game.

No. 15 Start your upload after you have hidden the desired download button for your uploaded media data in the app or location and surroundings at a specific destination. You give users the opportunity to access your fantastic media data through real movement in order to move up the kilometer ranking of downloads by making their personal upload available.

No. 16 Take a folding chair and a backpack with 6 or more beers from the, see app beermouth, on your adventure, in your area or surroundings, as a companion on the way, when you have successfully found the destination, consume your beer in peace and wait until your desired download has been successfully loaded on your smartphone or brought system

No. 620 Fishmaster3000

No. 1 You have to try to get through a digital map, that is, the map shows you goals that have to be completed in the real world in order to find the game that was hidden by the app

No. 2 Use the navigation and radar function to hunt for the digital game in your area or surroundings. You don't know beforehand what items you have to collect along the way. You will be shown this when you reach your destination.

No. 3 Once you have set off on your journey with your smartphone, various

routes are made available to you and presented to you. You collect various fish baits along the way. The navigation system will show you these, as well as the route to your destination. No. 4 Once you have reached the place where the game is, the smartphone will light up an alarm using the radar. You must now position the camera in

the position where the illuminated point on your radar is. This means you scan the position and, if you are lucky, the digital game will appear on the smartphone screen. You can now take part in this game live and in real time or add it as a checkpoint level to your level inventory on your smartphone and then continue playing at home.

No. 5 Before you can play the game, you must check whether you have collected enough individual fish bait in the right shape, because only then the digital game will be activated on your smartphone display

No. 6 If you have collected enough individual fish bait on the various paths to the destination location of the game, you can use your digital game that now appears on the screen to start the duel or game that has now started at the destination location.

No. 7 You also have to touch the smartphone display where the game is shown using soft, medium hard touch from the puzzles that are blocking the display to each other in order to give the display a clear view in order to make the game visible and unlock it. No. 8 Once you have made the game visible, you can now

duel with digital fish that have appeared on the smartphone. See the game principle of the SEGA Bass Fishing series. You try to attract the digital fish with your previously collected fish bait by swiping the digital fishing rod that has been made visible on the smartphone screen and fish them out of the water. No. 604 fishmaster3000

No. 9 If you have caught the required digital fish with your previously collected fish bait, which you collected on the way out of the water with your digital fishing rod, and put them in your digital fish basket, you must start moving again and find a new destination on the digital map, according to the above scheme, try to find the destination and collect different, individual fish baits again, by walking in different ways you fill up your fish bait stock.

No. 10 If you don't feel like dueling in a live duel with the various fish species, scan the target location and save the level on your smartphone in your level list, then call it up again at home in chill mode and comfortably recall the level and then play it either on the smartphone or on your TV connected to the smartphone

No. 11 Collect levels on your digital map in the real world that are hidden by the app. Collect enough to start the duel at home or on site. For each level you pass, you receive Fishmaster points. These points can be used in your own online item shop to buy the items that are used to fight the fish species or to catch the creatures that you know from SEGA bass fishing. These help you to individually equip your next level and your fishing route and thus strengthen it and refine it for the future.

No. 12 Play through the levels you have collected live on site or at home. After each successfully completed level, the app generates a new one and hides it on your digital map for you to find. Go on a search and find the new levels to continue playing the game.

No. 13 The kilometers you run in real life are needed to be able to control your fishing route digitally, so walk the routes and collect real kilometers in addition to the fish bait to set your fishing route in motion in the game, if you run out of digital steps, the game pauses, so you have to go outside again and collect additional kilometers to set your digital fishing route in motion so that you can continue to cast and control it through the levels of the underwater world.

No. 14 Try to keep moving and play through the extraordinary levels that are generated for you from Google Maps in accordance with the SEGA Bass Fishing principle. You will become the next Fushmaster Star in the rankings and you will receive a gift, a true-to-original trophy, sent to your home at the end of the game or you will receive a real fishing route as a reward for completing the collected levels of Fishmaster3000. You can also use the fishing route you are given to take part in real fishing tournaments. No. 15 The fish in this tournament are provided with a QR code and you have to catch them with the fishing route you won from the waters in your area where they were released in real time. If you have caught a fish, then scan the QR code of the fish with your smartphone. If you have scanned and digitized it, you can hide the digitized fish on the digital map or folder in different places for other users of the game. This switches the game from reality to the digital world again.

No. 16 If your fish is found and caught, you can make a deal with the catcher, which means you exchange different fish with him and get loyalty points from the owner of the fish shop in your fish shop on the digital rare fish from the deal, which you should use in the future to get a live fish from the owner in the distant future.

No. 621 BombermanGo

No. 1 You have to try to get through a digital map, that is, the map shows you goals that have to be completed in the real world in order to find the game that was hidden by the app

No. 2 Use the navigation and radar function to hunt for the digital game in your area or surroundings, you don't know beforehand what kind of items they are

No. 3 If you have started your journey with your smartphone, different routes are made available to you and presented to you, you collect coloured bombs along the way, these also show you the route on the navigation system

No. 4 When you arrive at the place where the game is, the smartphone will light up an alarm through the radar. You must now position the camera in the position where the illuminated point on your radar is located. This means you scan the position and, if you are lucky, the digital game will appear on the smartphone screen. You can now take part in this game live and in real time or add it as a checkpoint level to your level inventory and continue playing at home afterwards.

No. 5 Before you can play the game, you have to check whether you have collected enough colored bombs in the right color, because only then will the digital game be activated on your smartphone display

No. 6 If you have collected enough colored bombs on the different paths to the destination of the game, you can use your digital game, which now appears on the screen, to start the duel that has now started at the destination.

No. 7 In addition, you must touch the smartphone display where the game is displayed, using soft, medium hard touch from the puzzles that block the display to each other, in order to give the display a clear view to make the game visible

No. 8 Once you have made the game visible, duel with other participants who have connected to it against the computer opponents, see the game principle of the Bomberman series, you try to eliminate and destroy the opponents with the colored bombs you have previously collected

No. 9 Once you have eliminated all enemies, a new portal opens, go through the portal to unlock the new level, which means you have to start moving again, by walking and finding it on the digital map, according to the above scheme, try to find the target location and collect colored bombs again, by walking along different paths you fill up your bomb stock

No. 10 If you don't feel like dueling in a live duel, scan the destination and save the level on your smartphone in your level list, then call it up again at home in chill mode and comfortably recall the level and then play it either on the smartphone or your TV connected to the smartphone

No. 11 Collect levels in the real world that are hidden by the app on your digital map, collect enough to start the duel at home or on site, for each level you pass you will receive Bombermango points, these points can be used in your own online item shop to buy the items you need to fight the enemies you know from Bomberman, these will help you to individually equip your next level and your Bomberman and thus strengthen him

No. 12 Play through the levels you have collected live on site or at home. After each successfully completed level, the app generates a new one and hides it on your digital map for you to find. Go on a search and find the new levels to continue playing the game.

No. 13 The kilometers run in real life are needed to be able to control your Bomberman digitally, so walk the routes and collect real kilometers in addition to the colored bombs to set your Bomberman in motion in the game, if you run out of digital steps, the game pauses, so you have to go outside again and collect additional kilometers to set your Bomberman in motion in order to be able to control him through the levels

No. 14 Try to keep moving and play through the extraordinary levels that are generated for you from Google Maps according to the Bomberman game principle. You will become the next Bomberman star in the rankings and you will receive a gift, an authentic trophy, sent home at the end of the game or a cuddly toy as a reward for completing the collected levels.

No. 622 *Dzienkujemkwiat*

No. 1 You have to try to get through a digital map, that is, the map shows you goals that have to be completed in the real world in order to find the item that was hidden by the app

No. 2 Use the navigation and radar function to hunt for the digital items in your area or surroundings, you don't know beforehand what kind of items they are

No. 3 If you have set off on the route with your smartphone, various routes are made available to you and presented to you, you collect colored vector points along the way, these also show you the route guidance on the navigation system

No. 4 Once you have reached the place where the item is, the smartphone will light up an alarm through the radar. You must now position the camera in the position where the illuminated point on your radar is located. This means you scan the position and, if you are lucky, digital flowers will appear. You can now catch these with your digital fishing net.

No. 5 Before you can throw out the catch net, you must check whether you have collected enough vector points in the right color, because only then will the digital catch net be activated on your smartphone

No. 6 If you have collected enough colored vector points on the various paths to the destination location of the item, in this case the lavender flower, you can extend your digital catch net and use it to catch the digital lavender flower that is now visible at the destination location.

No. 7 You also have to free the smartphone display, where the Lavender flower is displayed, from the insects and release it using a soft, medium hard touch, so that you have a clear view of the catch. You receive points for the free release of the insects and can exchange these for points. With the points you can bid on individual presents on [dzienkujemkwiat.pl](http:// dzienkujemkwiat.pl) and send them with your flower.

No. 8 Once you have gained a clear view of the Lavender flower and have released and chased away the insects from the display, then throw the digital catch net and try to finally catch the Lavender flower

No. 9 If the digital Lavender flower has been caught by your net, it will jump into your digital shopping basket. You can now order this flower for free from the website dzienkujekwiat.pl and send it to the address of your loved ones.

No. 10 The website offers you the easiest and most free way to show your loved one that you, through movement and instinct, took the time to get this product flower for her before anyone else

No. 11 The special thing about the flower is that it has a recording microphone and can communicate with you and speak to you, in addition to this flower, you will receive the same, real flower as you know it from a flower shop

No. 12 The website dzienkujekwiat.pl offers this function for lovers to go hunting and embark on an adventure to find a great gift for their loved one and present it to her as a gift

No. 13 You can also trade your digitally captured flowers from your hunt for other rare flowers offered by users for exchange, all you have to do is make an honest deal with the person you want the flower from

No. 623 Timenotodie

No. 1 You have to try to suck up time items with soft, 1 second, with medium, 2 seconds and with hard touch 3 seconds, with an elephant trunk in order to top up your time account. No. 2 Insects run through the display and try to eat your time items, which means that the time items are also scattered on the smartphone.

No. 3 Try drag and drop to place the elephant trunk on the time items and use soft, medium, hard touch, then suck it up

No. 4 You must act quickly and safely because the insects multiply, race quickly and multiply when they collide

No. 5 Collect these time items during the game and increase your time account, in addition, you have to make the insects disappear from the display of the smartphone

No. 6 Therefore, simply suck up enough colored vector points with your elephant trunk and load them up so that your elephant can

No. 7 Each insect has a specific colored contour, which shows you with which vector point you have to shoot the insect with your collected vector point from the elephant's trunk

No. 8 If, for example, you have targeted a colored insect, then touch the proboscis, this automatically changes the proboscis color after the touch, now you can shoot the insect with the recorded, relevant vector point

No. 10 Try to dissolve all insects and make them disappear from the smartphone display in the required time

No. 11 The background of the game interacts with them, it can eat insects, shoot them, freeze them or, at a disadvantage, double and multiply them

No. 12 So suck up lots of time items and shoot the insects with your elephant trunk. In the next levels, different sizes and shapes of insects will appear.

To eliminate these insects, you must eliminate enough standard insects to unlock the other shapes of the elephant trunk in order to absorb larger

colored vector points. No. 13 In multiplayer mode, you can use multiple elephant trunks to suck up the time items and destroy the insects with the matching sucked-up vector points.

No. 624 Bookworm

No. 1 You control a bookworm through the smartphone display, you have to be careful not to get caught by the insects that appear, you have to collect letters with their vector points in a certain order, which means that if you are close to a letter, vector points appear on the letter

No. 2 Each letter has different vector points and in the worst case, rotates around its own axis or moves in different directions on the smartphone display, so pay attention to how you collect the colored vector points, because these must also be collected in the right order by your bookworm, see scoreboard

No. 3 You have to collect a complete word one after the other, i.e. collect the appropriate letters and their vector points in the correct order

No. 4 If you have completed the word, books will appear on the display, these serve as a portal for the jump to the next level

No. 5 You can also destroy the insects that try to steal your life energy with special items that you pick up, which means that if you pick up a certain item on the smartphone display, it is equipped with special abilities, in this case, an item can give you an ice ball, fire ball, wind ball, earth ball, faster movement or invisibility, collect these items and give yourself a big advantage

No. 6 Try to activate the bookworm portals in the required time to get to the next level. If the time runs out and you have not collected the complete word, no bookworm portal will appear and you cannot leave the level.

No. 7 New insects in different sizes and shapes keep appearing on the smartphone display, try to avoid them or destroy them with your picked up weapon items

No. 8 If you have activated a bookworm portal, all you have to do is head over to it and go through the portal to the next level

No. 9 For each vector point you collect, your bookworm grows in length, so make sure you collect the correct number of vector points so that the bookworm's tail doesn't get too big, otherwise you'll have difficulty controlling it through the display and will be easier for the insects to find. No. 10 In multiplayer mode, you control up to 3 bookworms at the same time, so each player is given a differently designed bookworm.

No. 625 Magneticfrog

No. 1 You must try to collect colored energy modules with your frog on the smartphone display to destroy the enemy insects

No. 2 This means that you have to absorb these colored energy modules in order to create an individual, colored magnetic field

No. 3 With your frog tongue, which you can extend out of your frog mouth, you can absorb the colored energy modules that are on the smartphone display

No. 4 Try to collect the matching and colored energy modules in your vicinity or surroundings with your frog tongue

No. 5 If you have collected some colored energy modules, you can now, as your frog is charged, place a colored magnetic field on the smartphone display, which means that if a colored insect of the same color is near the colored magnetic field, it will be sucked up by the colored magnetic field and then eventually disappear from the smartphone display

No. 6 Try to clear the display of the different colored insects and destroy or suck them up with the correct colored magnetic fields

No. 7 For each insect you destroy, you get time points, the game runs on time, destroy enough insects to constantly recharge your time account so that the game can continue to be played

No. 8 The goal is to destroy and dissolve all individual insects from the display within a certain time

No. 9 In multiplayer mode, up to 3 different frogs can be used simultaneously by other Internet users to simplify the game

No. 626 Alienpoint

No. 1 You must try to destroy colored, appearing and different aliens that appear from all directions on the smartphone display with your sparrow slingshot and turn them into colored vector points in order to receive ammunition for them.

No. 2 Try to use a sparrow slingshot to eliminate these colored aliens that appear, which means that you must first load your sparrow slingshot with ammunition.

No. 3 To pick up ammunition, you must do the following: collect the colored vector points on the smartphone display with your finger using soft, medium and hard touch. At the beginning, only small amounts of the colored vector points in different sizes are visible.

No. 4 You must try to press on, for example, a small, green, colored vector point that is on the smartphone display with soft touch and then drag and drop it onto your sparrow slingshot

No. 5 If you have activated it by soft touch pressure, then pull it with your finger onto the sparrow slingshot, now you have to quickly fire it with the visor of the sparrow slingshot, in this case a small green alien

No. 6 If you don't hit the little green alien exactly, it can happen that it catches the small green vector point and immediately throws it back at you. If that happens, you have to block the vector point with your finger during the flight and stop it in the air with your finger and push it to the side of the display. No. 7 If you hit the alien, it turns into a small green vector point. If the alien hits you, however, your life energy is deducted.

No. 8 Try to transform all colored aliens, as just mentioned, into colored, small, medium, large vector points in order to secure more ammunition for the future of the game

No. 9 The appearing colored aliens are available in different colors and sizes, so you have to pick up the same color and the same size of the vector points from the smartphone display and fire them with your sparrow slingshot

No. 10 Since the ammunition is not available in large quantities at the beginning, you have to pick up exactly the right one for the appropriate colored and different sizes of the aliens, in order to then finally hit them with the shot of the vector point to turn it into an ammunition vector point

No. 11 If you hit several aliens in a row, you will get additional ammunition in 3 digit amounts on the smartphone display ready to grab

No. 12 If you have transformed several aliens into different vector points at the same time, use your finger to draw a vector path around and onto the vector points that have appeared and then drag this onto your sparrow slingshot to get the ammunition faster. No. 13 The game is also timed and you have to eliminate all the colored and different aliens in the required time to get to the next level.

No. 14 In multiplayer mode, you can operate 3 sparrow slingshots and use your fingers together to collect the different colored vector points and use them to destroy the aliens

No. 627 Fristpaintfirsteat

No. 1 In this game you try to create the following with the help of Google Photos AI, you have to try to color an individual picture that is suggested to you by Google Photos AI with your digital brush

No. 2 Try to paint the blank picture, true to the original picture suggested by Google, with your brush

No. 3 You must use the required colors and insert them into the correct places of the blank image with your digital brush

No. 4 If you have coloured in a part correctly, you will receive time points for it, try to colour in the entire blank picture and complete it in the required time

No. 5 For each correctly placed brush stroke you will be awarded points, you will duel in real time against another player from the Internet, from the faces carousel

No. 6 Try to color the blank picture with your digital brush faster and more accurately than your opponent

No. 7 If you finish faster and have painted all the colors correctly, you win the duel. You get points for each correct color for the blank picture.

No. 8 In addition, your time will be compared to your points and you will receive bonus points for coloring the blank picture faster in this example

No. 9 In new duels, new pictures are provided and must then be colored

No. 10 At the end of the month, try to win many duels and get into the top 3 of the points ranking

No. 11 If you manage to get into the top 3, you will receive a free meal voucher for your restaurant in your area

No. 627 Fristpaintfirsteat

No. 1 In this game you try to create the following with the help of Google Photos AI, you have to try to color an individual picture that is suggested to you by Google Photos AI with your digital brush

No. 2 Try to paint the blank picture, true to the original picture suggested by Google, with your brush

No. 3 You must use the required colors and insert them into the correct places of the blank image with your digital brush

No. 4 If you have coloured in a part correctly, you will receive time points for this, try to colour in the entire blank picture and complete it in the required time

No. 5 For each correctly placed brush stroke you will be awarded points, you will duel in real time against another player from the Internet, from the faces carousel

No. 6 Try to color the blank picture with your digital brush faster and more accurately than your opponent

No. 7 If you finish faster and have painted all the colors correctly, you win the duel. You get points for each correct color for the blank picture.

No. 8 In addition, your time will be compared to your points and you will receive bonus points for coloring the blank picture faster in this example

No. 9 In new duels, new pictures are provided and must then be colored

No. 10 At the end of the month, try to win many duels and get into the top 3 of the points ranking

No. 11 If you manage to get into the top 3, you will receive a free meal voucher for your restaurant in your area

No. 628 Pollinvader

No. 1 You have to try to jump from a skyscraper into a water pool, on the pool there is a jumping rubber

No. 2 Land on the bouncy rubber and it will push you in a different direction where there are other pools near you or in the surrounding area, try to land on the next pool and from there get back on the bouncy rubber to land on another one
No. 3 While you are in the air, sharks will try to eat you in the air or take your life energy, watch out and fight these sharks with your hammer, hit the flying sharks and destroy them while you are in the air

No. 4 Each pool has a specific bouncer, which means you have to jump on the right one to get enough spin to land on the next pool with the bouncer

No. 5 You get points by reaching a certain height in the air and for each shark you destroy, bonus points

No. 6 Also try to get over an intermediate rope in the air and then jump into the next pool, you will get extra points for this. No. 7 Every pool that is near you or in the area

has a certain size and a certain color, pay attention to the scoreboard that shows you to jump into the right pool.

No. 8 If you jump into the wrong pool, for example, you will not be able to reach the others because this one has too weak a jumping rubber, you will then have to return to the previous one and from there, aim for the right one

No. 9 Always keep moving and pay attention to the scoreboard that tells you which pool you have to jump to next

No. 10 You can also land on the intermediate rope, move from there and then select the correct pool with the correct jumping rubber and jump down onto it

No. 11 By the way, each bouncy ball has a special meaning, which means that each one has a different bouncy spin that can move them to the other pool

No. 12 The game is timed, so you have to jump the correct distance, which is measured in kilometers, and keep moving forward

No. 13 In addition, some jumps in the passages may encounter barriers that you must avoid, stay cautious and focused on your jumps and land on the correct pools and their specified jumping rubbers

No. 629 Rukibazuki

No. 1 You try to control a character called rookiebazuki, on both of his arms are installed bazookas, you move him, at the bottom of the smartphone display, from left to right

No. 2 Try to hit ducks that appear on the smartphone display from all directions with rukibazuki using the bazukas

No. 3 You must collect ammunition beforehand, this happens when you catch a duck with your net and bring it into your ammunition machine for processing

No. 4 You only have 13 nets at the beginning of the game, so be sure when you throw out your net and try to catch the flying ducks

No. 5 If you have caught some ducks, you will receive 4 rounds of ammunition for each duck you have caught and put into the ammunition machine, 2 rounds for the left arm and 2 for the right arm

No. 6 Be careful that the ducks do not hit you, this means that some ducks try to fire different balls at you with their mouths, or try to dive at you

No. 7 The ducks come in different colors and sizes, follow the scoreboard that tells you which ducks you have to fire at first

No. 8 If you have caught enough ducks at the beginning and thus received ammunition, fire at the different ducks in the required order, be careful not to get hit by the ducks, otherwise you will lose life energy, if your life energy runs out, you lose the game

No. 9 If you have shot down some ducks, you will receive individual vector points which are counted as points in time: red, 1 sec., blue, 2 sec., green 4 sec., yellow 5 sec.

No. 10 The game is timed and you must therefore try to collect enough different vector points as described above. The collection works when you throw your helmet at the different colored vector time points that appear and collect them like a boomerang in the air.

No. 11 If you have recorded some vector points, you will get these added as time to your time account, if you, for example, miss the duck with your sight, you will be given 1 second.

Reduced from time account

No. 12 Also try to hit letters in the air with your boomerang helmet and activate them, if you activate these letters on the smartphone display, then these letters serve as weapon systems, these letters then fire shots at the ducks from their vector points, the letters also rotate on their own axis and are an important part of the game

No. 13 Finally, try to remove the required, different ducks from the smartphone display and do so in the required time to get to the next level. In multiplayer mode, you can control up to 3 different characters and play the game.

No. 630 Wildcard

No. 1 You must try to use a wildcard in no limit Texas Hold'em Poker, which means that when it is your turn, you must do the following: No. 2 You are given a card reader and writer, you shout out loudly to the crowd at the poker table, wildcat and are now allowed to use the card reader and writer for an individual amount. No. 3 You must now enter your code on the card reader and writer or have the wildcard scanned like a chip card

No. 4 If you have done this and your wildcard has been accepted, the card reader and writer will roll out a bundle of cards inside the device

No. 5 After the random roll and spin process, the card reader and writer spits out 1 or, if you want, 2 new cards, which you can swap for your old ones. No. 6 Now you have to put an individually required amount into the sliding compartment of the card reader and writer as a contribution for the generated cards. No. 7 This contribution is then continued as a jackpot as soon as other players at the poker table use

their wildcard, and using the process described, the individual amount of money is used to feed the jackpot. No. 8 Once you have received your new cards or card (joker wildcard, used), you can continue playing classic No Limit Texas Hold'em poker at your poker

table with the other players. No. 9 At a random, specific time, the dealer calls out the jackpot and the collected amount of the amounts put into the card reader and writer is added to the pot played, regardless of the round and style of play. 10 Now the poker

game will become much more interesting and dangerous, as the other players do not want to miss out on the associated jackpot, which is usually a high amount

No. 631 Youwonderwoman

No. 1 You have to try to get through a digital map, that is, the map shows you goals that have to be completed in the real world in order to find the game that was hidden by the app

No. 2 Use the navigation and radar function to hunt for the digital game in your area or surroundings, you don't know in advance what kind of game it will be

No. 3 If you have started your journey with your smartphone, different routes are made available to you and presented to you. You collect colored and different hearts in different sizes along the way, which also show you the route on the navigation system.

No. 4 When you arrive at the location where the game is, the smartphone will light up an alarm through the radar. You must now position the camera in the position where the illuminated point on your radar is located. This means you scan the position and, if you are lucky, the digital game will appear on the smartphone screen. You can now take part in this game live and in real time or add it to your inventory as a checkpoint game and continue playing at home afterwards.

No. 5 Before you can play the game, you must check whether you have collected enough colored and different hearts in the right color and size, because only then will the digital game be activated on your smartphone display

No. 6 If you have collected enough colored and different hearts in different shapes on the different paths to the goal location of the game, you can start your digital game that now appears on the screen.

to use

No. 7 This game is about reaching a person that you can now see on your Love Radar, you use the hearts you collect to make the people visible on your Love Radar

No. 8 If you have made the people visible on your radar or clicked on the emoji faces, you will now see the real faces of the users of this game

No. 9 Touch the face and see if you have found the hearts required to unlock it and start the conversation. If you have found the individual, different hearts for each face, you can now use them. This means that these hearts can be used to unlock more pictures and others can be used to unlock a personal conversation and turn the emoji face into a real photo. No. 10 In the real world, collect the different hearts hidden by the app on your digital map to then use them for your Love Radar. No. 11 Play the game, live on site or at home. After every

successful Love Match, the app generates a new one and hides it on your digital map to find. Go on a search and find the new Love Matches to be able to continue playing the game.

No. 13 The kilometers you run in real life are needed to activate the Love Radar and unlock new emoji faces, so walk the routes and collect real kilometers in addition to the colored and different hearts to expand the Love Radar with new emoji faces, this is how you refine the game and now you have to go outside again and collect additional kilometers to get your Love Radar moving and thus see new emoji faces. No. 14 Try to keep moving all the time to make new face emojis visible on the Love Radar, as mentioned above, if you have collected enough different hearts on the way to your destination, such as red ones to unlock additional profile photos, green ones for voice conversation, yellow ones for text conversation, blue ones to send videos, then you can use them and try to contact a single in the app, click on the emoji face and unlock the real face with your collected kilometers.

No. 15 If you have noticed emoji faces that you might like, then click on them and unlock them with your run kilometers, now you can see the real face and with your different collected hearts, you can finally establish a contact connection with a single

No. 16 Continue the conversation with the single to make it a Love Match, which means that the nice and happy conversation becomes a Love Match and is now saved in your conversation list

No. 17 After some time, their different hearts are used up and they have to go hunting for hearts again in order to continue the conversation. The single person who is having the conversation with them then hides a new destination on the digital map, which they have to find in order to then continue the conversation with them at that location.

No. 18 Go outside and find the target location and collect the different hearts hidden along the way by the app to continue the conversation with the single or another person

No. 19 You will receive gifts from the app after you have run a certain number of kilometers, such as flowers, love gifts or free vouchers for a restaurant visit in your area, so keep moving to reach the individual kilometer count that is required

No. 20 If you reach the required mileage, you can make your love match happy and give him a gift or invite him to a restaurant to get to know each other better

No. 632 Muddy

No. 1 You have to try to create a muddy vehicle (a Muddy) while driving along the original Google Maps route, using special items that you can put together individually in real time to achieve a transformation. No. 2 At the beginning of the game, you choose a normal canister or chassis, which means your car is just a

square, rectangle, triangle, circle on bad wheels without good steering and resistance capabilities or without weapons systems. No. 3 You now have to compete in the race against other cars, which means that you have to stay on the track, as the track has no outer planks that you can be protected from.

No. 4 In the initial phase, try to approach different colored acceleration vector points to progress over the muddy track

No. 5 If you have reached a certain speed in front of a transformation item, you can pick it up and your bolide will now receive, depending on which special item you have hit, a transformation. In this example, your car or bolide will possibly receive new tires, new material, new steering wheel, new brakes, new chassis, new housing, new options for expanding your weapon system.

No. 6 If you have picked up an individual item with the required speed, your car will have this equipment implemented for a certain period of time

No. 7 After a while, this equipment transforms back to standard mode, so use the transformation as long as you can to secure an advantage over the other players on the track

No. 8 If, for example, you have achieved an advantage by doing this, try to consolidate your speed by collecting the different colored vector points on the track in order to gain an advantage by driving down and collecting the transformation item while maintaining the speed required.

No. 9 You must also try to activate letters with the name of your vehicle on the track, drive on the required letters to receive a bonus transformation of your vehicle or car

No. 10 Use the transformations while driving to ensure your chances of winning against the other players

No. 11 Try to get into the top 6 of 18 possible racing cars to unlock new transformation items for the future on other tracks

No. 12 Be diligent and quick, because time is running against you in this racing game, you have to cross the finish line in the required time to unlock the next upcoming track

No. 13 Pay attention to the route guidance and make sure that the other players do not use their transformations against you, as this will lead to your disadvantage

No. 14 The particularly authentic routes from Google Maps can possibly help you to win the race, as the routes interact with the game, they partially change the weather and the route, by appearing barriers or shortcuts in the real-time game No. 15 Use the advantages of the interaction of the route to your advantage and always stay at the required speed, which allows you to pick up the transformation items.

men

No. 16 If your car is pushed off the track, which is usually muddy, you can be put back in the same place where you fell off 3 times in the game

No. 17 Therefore, after your transformation, try to push the other cars off the current track and down, as you have noticed, the tracks have hardly any outside planks in this racing game, so be very careful or aggressive at the same time with the control of your vehicle (Muddy)

No. 18 Become the best Muddy driver in the 36 tracks (capital cities) of the world and receive extra points for the monthly points ranking every month for each completed race cycle of the tracks

No. 19 If you have passed the month as 2 drivers, for example, you will receive individual transformation items for your vehicle inventory, which you can use at any time during the trip

No. 20 Use the special items you have won carefully for the next battles with the other players from the Internet Carousel

No. 633 Iceland

No. 1 You try to escape from an island in this hack and slay, jump and run game, you start in co-op mode with 3 characters and try to sail away from the island, through the waters of the oceans to find a new location and search with your radar for a new paradise, which you then colonize with your ship at the end of the game.

No. 2 Try to escape from the island of the undead with your 3 simultaneously controllable heroes, you start the game with the principle of the well-known game DeadRising, try to get away from your location and follow the navigation radar, which shows you the way to the new checkpoint in the game

No. 3 You take turns controlling your 3 hero characters in co-op mode and ultimately try to meet at a location, i.e. checkpoint, in order to then escape from the island together. Once you have reached the checkpoint, randomly selected internet players can log in and control two of the 3 characters with you in live mode. No. 4 Your primary goal is to escape from your location, which can be a village, city or a wasteland. Follow your navigation radar, which constantly shows you new locations that you have to travel to.

No. 5 Your opponents in this hack and slay, jump run game are undead who come at you in very large numbers and want to kill you, pay attention to their speed and their life energy and the collection of the important weapon system items that can be found on the way and on your location via radar

No. 6 Run and jump over barriers and passages to escape from the overwhelming hordes of the undead, collect vector points that give you more speed and resistance, you also have to collect letters, these give you special information about the next location, use the collected letters to decipher the next location with your book of navigation and try to reach the place within a certain time

No. 7 If you have collected certain weapon systems, see DeadRising, then optimize them with the additional modules you have collected in order to use them in the fight against the undead. No. 8 In the best hack and slash, jump run style, slaughter the undead with your collected and modified weapon systems or at least try to keep them in check. Try to go through the passages in the game and get through them quickly using run speed, because the undead come at you in individual hordes from all directions. The undead are generated by an undead factory, which you should not attack.

No. 9 Also try to convert a small number of undead with your conversion magic book and turn them back into normal people. To do this, you must collect the magic letters

and speak them to the individual undead using a microphone in order to convert them. If you have converted and converted some, these people will help you, if you collect a weapon system, to convert the other large numbers of to fight back and destroy the undead No. 10 You also have the option of taking inhabitable animals on your team, you must first tame them and win them over, this is done again with specially collected weapon systems and the conversion letters from your magic book, which you constantly update and complete the content and passages with the letters you

find No. 11 If you have managed to find the destination with your character where the other 2 characters are, you can now go into battle against the undead in groups of three at the same time and crush them with your individual, collected weapon systems No. 12 Try to kill the required number of undead in order to unlock your radar for new paths, because the more undead you crush or kill, the more new paths are made visible on the radar, search for and find the final goal, as described at the very beginning of the game, the harbor, in order to sail away from the island

No. 13 If you have managed it, sail to the next undead island, which you then, with the experience you have previously learned, try to free from the undead in order to destroy the undead factory. There are a total of 13 islands that you ultimately have to free from the other undead beasts. If you have managed that, sail to the paradise place and establish a population and its infrastructure based on a real-time construction simulation game, which is familiar from Age of Empires, and populate the liberated islands with your peaceful people.

No. 634 Itspokerfolks

No. 1 You have to try to complete a digital map in different countries, that is, the digital map shows you goals that must be completed in the real world in order to find the game that was hidden by the app

No. 2 Use the navigation and radar function to hunt for the digital game in your area or surroundings, you don't know beforehand what kind of game it is

No. 3 If you have set off on the route with your smartphone, various routes are made available to you and presented to you. You collect different colored vector points (poker chips) along the way, which show you the navigation system, as well as the route guidance.

No. 4 When you arrive at the place where the game is, the smartphone will light up an alarm through the radar. You must now position the camera in the position where the illuminated point on your radar is located. This means you scan the position and, if you are lucky, the digital game will appear on the smartphone screen. You can now take part in this game live and in real time or add it as a checkpoint level to your level inventory and continue playing at home afterwards.

No. 5 Before you can play the game, you must check whether you have collected enough colored, different vector points (poker chips) in the right color, because only then will the digital game be activated on your smartphone display

No. 6 If you have collected enough colored, different vector points (poker chips) on the different paths to the destination of the game, you can use your digital game that now appears on the screen

No. 7 In addition, you must touch the smartphone display where the game is displayed, using soft, medium hard touch from the puzzles that block the display to each other, in order to give the display a clear view to make the game visible

No. 8 Once you have made the game visible, the game starts, which means that you try to use the different, colored, collected vector points (poker chips) according to the principle of no limit Texas Holdem on the smartphone display. If you manage to redeem your vector points (poker chips) using the game principle of no limit Texas Holdem or, in certain cases, use them, you will receive virtual money for the website or poker room itspeakerfolks.com for every card combination you play and win. No. 9 You can then use this virtual money to buy virtual poker chips on the website itspeakerfolks.com. The prices are individually adjusted to the kilometers you have measured. No. 10 Scan the destination and save the poker game on your smartphone in your level list, so that you can then call it up again at home in chill mode and comfortably call up the level again and then play it either on your smartphone or on your TV connected to your smartphone.

No. 11 Collect the poker games hidden by the app on your digital map in the real world, collect enough to start the game at home or on site, for each poker level you pass you will receive poker chips, collect these poker chips and later exchange them for virtual money on the website itspeakerfolks.com. No. 12 Play through the levels you have collected live on site or at home, after each successfully passed level the app generates a new one and hides it on your digital map for you to find, depending on which country you are currently in, go on a search and find the new levels to be able to continue playing the game

No. 13 The kilometers run in the real world are needed to activate the vector points (poker chips), real kilometers on the website itspeakerfolks.com

No. 14 Try to keep moving and play through the extraordinary levels that are generated for you from Google Maps, true to the original, according to the principle described. You will be the next itspoker-folks.com player in the points ranking and you will receive an original poker chip case or a poker table as a gift.

No. 15 Invite your friends to the next real poker duel at home or gamble away your virtual money on the website itspeakerfolks.com

No. 16 In addition, the poker chip suitcase you win contains a QR code that you can scan. Once you have done that, you can hide the real poker chips from the suitcase on the digital map for a user from the Internet carousel who wants to be randomly selected, so that he can now set off from home to earn his virtual money by walking and use it on the website itspo-kerfolks.com.

No. 635 Violetchemistry

No. 1 You try to understand the following chemistry between the symbols of the chemical table, try to use the chemical name symbols as Xetrixo tools, see app Xetrixo possibly No. 2 These chemical name symbols contain, in addition to their names and

color grouping, vector points in the letters

No. 3 You must try to structure the chemical color name symbols to each other, these name symbols fall from top to bottom, in a rectangle seen from top to bottom, in which they are located on the floor, falling to them

No. 4 Try to arrange the chemical name symbols in the correct color order according to the structure of the periodic table, which means in the example that you have 10 variants in this structure in order to find the chemical name symbols, called stones, blocks or squares, to each other and to build them up on top of each other and next to each other.

No. 5 If a chemical stone, block or square, of the same colour falls on a stone of the same colour and size, the structure of the two dissolves and they receive points, which are credited to their points account.

No. 6 Try to structure the other stones, blocks, squares from the periodic table in a way that matches each other in terms of color and size, so that a structure of the 10 variants of the colored and different sizes of the stones, blocks or squares can be connected to each other and to each other, the result is the dissolution of the same colored and size technical stones, blocks or squares of the structure

No. 7 The falling chemical stones, blocks or squares, must be of the same size and color, which should be linked to each other in order to achieve a dissolution of these forms, which must be added to each other and next to each other and to each other in terms of color and size.

No. 8 If you have linked some shapes together in terms of color and size, this structure dissolves and you are now credited with your points for it, in addition, you now expose the shapes and the various colored vector points of the letters from the shapes, as mentioned above, are released.

No. 9 Now use a vector point harpoon to torpedo the released colored vector points that have appeared in the correct color order in order to finally hit them with the harpoon and dissolve them

No. 10 For example, if you have linked and connected the chemical forms and hit the colored vector points released from them, new chemical forms from the 10 different colored and sized variants of the periodic table will now fall from above, downwards towards you, namely onto the display bottom of the smartphone

No. 11 For each vector point you hit, you also receive bonus points and can use them to buy more time points to complete the level in the required time.

No. 12 Free the smartphone display from the falling different and colored shapes of the periodic table you are using

No. 13 Battle in a duel with a user from the Internet carousel, according to the principle described here and become the next violetChemistry Master in the points ranking list, at the end of the game and at the end of the month rankings, you will receive a glowing periodic table, as the winner for playing the game, if you have reached the required number of points at the end of the month, sent home free of charge

No. 636 Demoflowers

No. 1 You must try to equip the drops of falling rain, which can be seen from every side of the smartphone display, with stars using soft, medium, hard touch methods, so that the drops are transformed and then dissolve in the air

No. 2 You pull the stars from the bottom of the smartphone display into the falling water drops. The water drops come in different sizes and colors, so you have to be careful that you pull out the right stars from the bottom of the smartphone display and use soft for small, medium for medium and hard touch for large water drops.

No. 3 Try to stop the falling rain, you will receive sunshine points for each correctly placed star in the individual water drops, which you can use to shine sunlight on the watered plants or flowers that are on the smartphone display

No. 4 Your goal is to stop the rain so that the flowers do not become watery and do not die, collect enough individual points to direct a sunbeam at a flower with the sun that can be found on the notch side of the smartphone

No. 5 Small water drops give you 1 point, medium 2 points and large drops 3 points when you add them to the stars

No. 6 Collect enough points to direct a small sunbeam onto the closest flower, the more distant flowers must be illuminated with a longer sunbeam, for this you must use more points to activate it

No. 7 If you hit a flower with your sunbeam, the flower will start to grow, wait until the growth is complete, the flower can then be used as a weapon to fire the emerging insects with its own special beam

No. 8 Let several flowers grow and wait for the insects to come, which can appear from any side of the smartphone display. The insects attack their flowers at an individual time. Try to position your flowers correctly and individually on the smartphone display to attack and ultimately destroy the enemy insects. No. 9 You will receive time points for each insect you destroy. Collect time points to clear the level of water drops and insects in the required time.

No. 10 Build an individual flower garden and exchange your adult flowers with other users from the game to be prepared for the future in this self and defense game, reach the landscape levels that are true to the original Google Maps and look forward to the battle against the enemy insect troops

No. 637 Rosecoloredlenses

No. 1 You see on the smartphone display different roses in different colors and sizes, which are surrounded by different individual vector points

No. 2 As in the Hot Wire game, try not to touch the vector points and draw a vector path on the individual roses, see the display board that is required, to connect them to a bouquet of roses

No. 3 Try to combine the individual, required roses on the display board in the given time and in the correct order to form a bunch of roses using the drawn vector path (finger swipe)

No. 4 Once you have pulled the rose bouquet bundle together, drag and drop it from the position where it is located into the lens that is located on the top, middle view of the smartphone, to the notch

No. 5 Now the lens, when you have placed a bouquet of roses on it, emits a light effect, this light effect is a random position beam that tries to hit the flying birds that now appear on the display

No. 6 If you hit a bird with the right colored light beam, this colorful, individual bird will start singing, namely the passages from Miley Cyrus' new album - Endless Summer Vacation

No. 7 Try to sing the passages of the song to get points for it, using the karaoke function, then sing the passages that the bird sang

No. 8 Achieve a required score at a certain time interval

No. 9 In addition, faces of different Internet users can appear on the smartphone display. Pull the bouquet of roses into the lens and try to hit the faces with the light beam so that they start singing the passages of the individual randomly selected songs.

No. 10 Sing these passages using the karaoke function to get special points

No. 11 The best points collector wins this game and at the end of the month, if he is shown below the top 3 in the points ranking, he will be provided with the free download code for the new album Endless Summer Vacation

No. 638 Thousandmiles

No. 1 You have to try to complete a digital map in different countries, that is, the digital map shows you goals that must be completed in the real world in order to find the game that was hidden by the app

No. 2 Use the navigation and radar function to hunt for the digital game in your area or surroundings, you don't know beforehand what kind of game it is

No. 3 If you have set off on the route with your smartphone, various routes are made available to you and presented to you, you collect different colored vector points (kilometer points) along the way, these show you the navigation system, as well as the route guidance

No. 4 When you arrive at the place where the game is, the smartphone will light up an alarm through the radar. You must now position the camera in the position where the illuminated point on your radar is located. This means you scan the position and, if you are lucky, the digital game will appear on the smartphone screen. You can now take part in this game live and in real time or add it as a checkpoint level to your level inventory and continue playing at home afterwards.

No. 5 Before you can play the game, you must check whether you have collected enough colored, different vector points (kilometer points) in the right color, because only then the digital game will be activated on your smartphone display.

No. 6 If you have collected enough colored, different vector points (kilometer points) on the different paths to the destination of the game, you can use your digital game that now appears on the screen

No. 7 In addition, you must touch the smartphone display where the game is displayed, using soft, medium hard touch from the puzzles that block the display to each other, in order to give the display a clear view to make the game visible

No. 8 Once you have made the game visible, the game starts, which means that you try to remove the different, colored, collected vector points (kilometers) from the smartphone display according to the principle of bubble bubble. If you manage to solve your vector points (kilometers) using the game principle of bubble bubble, you will receive hearts for each combination solved. No. 9 You can and must hide these hearts in the digital world, see digital folder for your darling,

to challenge him to keep moving. Use the hearts you have earned to set him a goal of 1000 miles that he has to run. No. 10 Scan the destination and save the level on your smartphone in your level list, so that you can then call it up again at home in chill mode and comfortably call up the level again and then play it either

on the smartphone or on the TV connected to the smartphone.

No. 11 Collect the levels hidden by the app on your digital map in the real world. Collect enough to start the game at home or on site. For each level you pass, you receive kilometer points. You collect these points to later use in bubblebubble on the thousandmiles website.

pl to compete against each other No. 12

Play through the levels you have collected live on site or at home, after each successfully completed level the app generates a new one and hides it on your digital map for you to find, depending on which country you are in, go on a search and find the new levels to continue playing the game

No. 13 The kilometers run in real time are needed to activate the vector points (kilometer points), real kilometers on the website thousandmiles.pl

No. 14 Try to keep moving and play through the extraordinary levels that are generated for you from Google Maps, true to the original, according to the principle described above. You will become the next thousand-miles.pl player in the points ranking and you will receive an original kilometer ticket as a gift. With this kilometer ticket you can hide the hearts you have earned in the game bubblebubble on the new digital map suggested by the app for your loved one, in order to get him moving so that he runs at least 1000 miles and collects enough digital hearts for you.

No. 15 When your loved one has completed the 1000 miles and found the different hearts that were digitally hidden in the real world, he can use these hearts to show his loved one how many times he would like to seduce her in a thousand nights at the heart locations in real life.

No. 639 River

No. 1 You must try to jump into a river of your choice, once you have done that, you must alternately click the 4 buttons on your controller to move forward with your swimming character at a higher speed.

start

No. 2 Letters will now appear on the path and in the water. You must now catch up with and capture one of these letters. Once you have caught up with the letter, jump on it and then alternately hop on its colored vector points to activate the letter for you. This means that you must hop on the colored vector points in the correct order so that you can switch the letter into active mode.

No. 3 If you have switched the letter to active mode, you can now use it as a surfboard in the water to get to the next letter more quickly. You have to find the next letter because your active letter, i.e. your surfboard, can only be used for a short time.

No. 4 Try to move on to the next letters step by step to finally overcome the river

No. 5 The rivers are based on real locations from Google Maps and offer various other options in addition to the current that prevent you from crossing the river

No. 6 In addition, there are various animals in the water that cannot make the way to the letters smooth for them, for example crocodiles, sharks, hippos, or Phirianas, which prevent them from blocking the way to the next letter or trying to attack them.

No. 7 If you have swum onto a letter and have jumped off its colored vector points in the correct order, you can continue to use it as a surfboard to move further along the river

No. 8 You have to complete a required distance of kilometers in a certain time to reach the destination of the route, you can collect special weapons items in the river while you swim and use them against the aggressive enemy animals.

to use

No. 9 Ultimately, they must reach the destination of the river in a certain time and try to avoid the animals and barriers, as well as the difficult passages in the river

No. 10 If you have managed to reach the goal within the specified time, a portal will open that will suck you up and transport you to the next river level

No. 11 Try to swim as many rivers as possible, you will receive an active flag on the map for each successfully swum river

No. 12 Be careful that you are not overrun by a user randomly selected from the carousel via the Internet, because if the user manages to swim faster than you, then he will receive the setting of the colored flag in the digital world map.

No. 13 You will also receive acceleration points for your swimming character for each animal you have eliminated and fought with your weapon systems. Use these to accelerate your swimmer on the way to the next letter and ultimately to the goal of the river and its new portal switch.

No. 640 Bullfrog

No. 1 You have to try to get the bullfrog to catch other insects with its frog tongue, the special thing about it is that each insect has a different contour color and is available in different sizes

No. 2 To get an active color of your frog tongue, you need to capture the correct colored vector points scattered on the smartphone display with the frog

No. 3 For example, you pick up the color green, now you can expose your active frog tongue to the green insects and try to start catching them

No. 4 Before you can throw out your tongue, you must first activate the name of the insect by letter recording by the frog

No. 5 If you have now collected the correct letters in the correct order, you can now throw the frog tongue at the green insect described here and try to catch it. The length and size of the tongue is generated by your movement as you run through the smartphone display with the frog.

No. 6 If you come across an insect, the frog loses quality of life or life energy, if you lose all your life energy, you lose a life, you start with 3x the number at the beginning of the game

No. 7 So you have to avoid the insects in order to charge the length and size of your tongue and also not to lose life energy when you collide directly with an insect

No. 8 If you have activated your length and size unit and color of your tongue, you can finally try to catch or suck up an insect with your frog tongue

No. 9 If you have caught an insect of the right size and color, you will receive time points credited to your time account

No. 10 The game is timed and you must try to catch all the insects in the standard time, as time is constantly running down. By picking up insects with your frog tongue you will receive additional time points, which will be useful for the rest of the game.

No. 11 Follow the scoreboard that tells you which insect to catch first, if you catch the wrong insect you will lose time or if you miss it the timer will also be reduced

No. 12 Play in multiplayer mode with up to 4 frogs at the same time and try to remove the individual insects from the display or make them disappear by catching them with your frog tongue

No. 13 The background of the game interacts with the game, it may give you advantages (more vector points, black holes, free time, ice or fireballs) or disadvantages (items to slow down the speed, play more insects, black holes, reduce the frog tongue) etc. in the game rhythm used

No. 641 Jaded

No. 1 You have to try to master a walk on the Parisian Tower, this means that you try to climb the stairs, the stairs light up in different colors, this means for you that you have to follow the display board, this shows you at what moment you have to press which control button and its color, in this case the circle button is red, triangle button is green, square button is blue, X button is yellow

No. 2 The steps light up alternately and have a specific touch, which means that you have to press the right color of the button for the correct color of the step with soft, medium or hard touch in order to climb the steps step by step

No. 3 In addition, you must stomp on the steps with your player at the right moment to activate the touch, in this case the step lights up briefly and you must then, in this example, use a soft touch to press the correctly colored button, matching the step color shown on the display board, so that the color of the step is colored slowly (soft), medium (medium), quickly (hard).

No. 4 It can happen that your steps disappear in front of your nose and you then have to add them by swiping left or right from the smartphone display

No. 5 Some steps need to be given the exact touch to color the steps correctly and to recognize the correct pitch, this means that when a slow note is played, it must be pressed with a soft touch, correct color of the button for the correct step color, a medium note with a medium touch and a fast note with a hard touch

No. 6 In the course of the climb you will have to deal with these procedures, be it after the checkpoint, during or after the checkpoint, which you have to reach in a certain time and at the required height, if you do not climb the required steps in the specified time, you will fall back to the last set checkpoint

No. 7 Climb the steps, using the random principle method just mentioned, and finally climb the Eiffel Tower, which is used here as an example. You will also receive one point for each step you climb correctly. Collect enough points to unlock more checkpoints and activate them.

No. 8 Once you have climbed the Eiffel Tower, you can now choose other buildings in the world and climb them according to the scheme mentioned here, for example the Leaning Tower of Pisa or the Empire State Building

No. 9 In multiplayer mode, you compete against another internet user who was randomly selected for you, may the better and faster climber complete the levels and climb the height of the individual levels

No. 642 Gummybeargang

No. 1 You have to try to get through a digital map, that is, the map shows you goals that have to be completed in the real world in order to find the game that was hidden by the app

No. 2 Use the navigation and radar function to hunt for the digital game in your area or surroundings, you don't know in advance what kind of game it will be

No. 3 If you have set off on the route with your smartphone, various routes are made available to you and presented to you. On the way, you collect colored and individual gummy bears in different sizes, which also show you the route on the navigation system.

No. 4 When you arrive at the place where the game is, the smartphone will light up an alarm through the radar. You must now position the camera in the position where the illuminated point on your radar is located. This means you scan the position and, if you are lucky, the digital game will appear on the smartphone screen. You can now take part in this game live and in real time or add it as a checkpoint level to your level inventory and continue playing at home afterwards.

No. 5 Before you can play the game, you have to check whether you have collected enough colored and individual gummy bears in different sizes and in the right color, because only then will the digital game be activated on your smartphone display.

No. 6 If you have collected enough colored and individual gummy bears in different sizes on the different paths to the destination of the game, you can use your digital game, which now appears on the screen, to start the duel that has now started at the destination.

No. 7 In addition, you must touch the smartphone display where the game is displayed, using soft, medium hard touch from the puzzles that block the display to each other, in order to give the display a clear view to make the game visible

No. 8 If you have made the game visible, duel with other participants who have connected to it or against the computer opponents, see the game principle of the Tetris series, you try to beat the opponents or the computer like in Tetris, i.e. try to make all the colored and individual gummy bears in different sizes that fall from the top to the bottom of the smartphone display on the smartphone display dissolve against each other. No. 9 If you are the first to dissolve all the colored and individual gummy bears in different sizes that you have collected on your smartphone display, like in Tetris, you win the game. No. 10 If you don't feel like dueling in a live duel, scan the target location and save the level on your smartphone in your level list, so that you can then call it up again at home in chill mode and comfortably call up the level again and then play it either on your smartphone or on your TV connected to the smartphone.

No. 11 Collect levels in the real world that are hidden by the app on your digital map. Collect enough to start the duel at home or on site. For each level you pass, you receive gummy bear points. These points can be used in your own online item shop to have various gummy bear packs sent to your home for free in exchange for points. No. 12 Play through the levels that you have collected live on site or at home. After each successfully passed level, the app generates a new one and hides it on your digital map for you to find. Go on a search and find the new levels to be able to continue playing the game.

No. 13 The kilometers run in the real world are needed to be able to control your gummy bear digitally, so walk the routes and collect not only colored and individual gummy bears in different sizes, but also real kilometers in order to be able to move your gummy bears in all directions in the game (see Tetris game principle). No. 14 Try to keep moving and play through the extraordinary levels that are generated for you from Google Maps in a true-to-original way according to the Tetris game principle. You will become the next gummy bear star in the rankings and receive a true-to-original cuddly toy, in this case an individual teddy bear, as a gift, sent to your home free of charge as a reward for completing the collected levels.

No. 15 Very easy to understand, you have to use the digitally collected gummy bears, which previously served as vector point path guidance, to play the game, see Tetris principle, with digital gummy bears instead of Tetris stones and dissolve them in a certain time in order to leave the game as the winner.

No. 643 Scobbyrun

No. 1 You control your Scooby through Google original landscapes from your surroundings that you have personally selected, be it the capital of the USA (Washington)

No. 2 You have to try to collect scooby snacks on the paths and routes. For example, if you have collected some small, medium and large scooby snacks that were shown by the radar while you are running with the character, you will be awarded a low speed with small scooby snacks, a faster speed with medium ones and a high speed with large scooby snacks. No. 3 In this Run Speed game, you try to master the original routes from Google Maps in your area. Collect individual scooby snacks to increase your speed step by step.

No. 4 Be careful of the barriers and passages that appear on the track, duck and jump while running with Scooby, using these procedures or restrictions

No. 5 Also collect colored vector points on the track to make Scooby, the character you are controlling, happy, you must collect the correct colored vector points while running on the track and activate the required letters for the route guidance, this means that you must activate the name of the next street by collecting the letters in order to continue the run

No. 6 Record the correct vector points on the track for your matching letters so that a letter is activated, in this example you have to activate the street name, Goethestr, by recording the letters and its required vector points on the track

No. 7 If you have collected the street name by the letters, the radar will show you a new path that you can and must follow with Scooby. If you have not picked up any other street name on the route by collecting the letters and their vector points, you will not be shown a new path to follow.

No. 8 There are also enemy opponents appearing on the track, which you can call out of your microphone, they say, while the enemy appears on the track, loudly scobbydoo through the microphone and the enemy that appears and blocks the track is frozen

No. 9 Now you can fire at him with an individual scobbysnack, which can also be picked up as a weapon item, and destroy the opponent and remove him from the track

No. 10 If you have run a certain distance and activated a new street name, you can go to the new run up level, the game is timed and you have to complete the required kilometers with Scooby, which decrease on the scoreboard as you run

No. 11 Run new routes by collecting new street names as described above, follow the radar to reach your destination

No. 12 Try to walk the entire state and its routes and activate or open a new portal to the new state through the kilometers created

No. 13 In co-op mode, you can switch characters with an internet user, in this case the internet user controls scrappy doo and runs the course with them at the same time, the aim of the game is to try to unlock and unlock the other characters from Scooby Doo, these characters then serve as an additional personality to be able to control the game from a different side in the future

No. 643 Turboslug

No. 1 You must try to use your turbo snail on a digital alarm clock, which means that you have a digital version of an alarm clock on your smartphone

No. 2 The digital alarm clock has 49 holes or openings so that a special ball or sphere, in this case, should fall into

No. 3 You control your turbo snail on the edge of the digital alarm clock and in a moment press on the turbo snail that runs around the edge of the digital alarm clock

No. 4 The turbo snail has to collect 7 balls on the edge, each of these individual balls gives the turbo snail an individual speed to go around the edge in a certain time

No. 5 Press the turbo snail at the moment you think of and it will hurl balls onto the smartwatch's second hand, which rotates on its own axis, onto the second hand branch. Try to catch the second hand branch, otherwise, one of the 6 the ball will fall into nowhere and you will lose a ball from your collection. No. 6 If you have released the ball or ball onto the second hand branch at the right time, the smartwatch's hand will move this ball or ball further while it rotates on its own axis. This means that the ball or ball runs down the hand and jumps out at the tip of the hand and finds a place in one of the 49 different openings.

No. 7 Try to hit the remaining balls into the existing holes or openings with the alarm clock second hand branch

No. 8 Once you have done that, the turbo snail stops its ride through the edge of the digital alarm clock and now speaks the numbers to you via microphone or writes down the possible future lottery numbers on a QR code that you can scan in order to be able to participate in the 6 out of 49 lottery with these numbers.

No. 644 Shopitup

No. 1 In this variant of no limit Texas Holdem, you must try to use your dice when it is your turn, which means that you have about 30 seconds to plan your throw, the other players can decide 3 times per person during the game whether they have to use the dice

No. 2 If another poker player decides that they should use the dice, then they must obey, it now means that they must throw 2 dice on the middle of the table or against the edge of the table, if an individual number appears, then you must look at the calculation display board and see which calculation symbol appears, in this example an addition symbol appears, then the numbers on the dice must now be added and your planned bet must be multiplied, divided, subtracted, added by the number of dice that have been added together, or you must look at the number of numbers as a percentage number and increase or decrease your bet accordingly No. 3 In this example, you have been given the addition method on the display board for your dice, now you must add the numbers on the dice together, for example 4 and 5, that is a value of 9, you must then either multiply your bet by 9x or increase

(add) by 90% percent by 90% percent (subtract) or by 9 (divide), this decides, the scoreboard again randomly selects the method and shows you with which calculation method you now have to play your bet

No. 4 In this example, if you have received the addition method from the display board as a billing symbol, you must add 90% to your stake, which in this example is 30 euros, which means that you now have to add 90% to your stake amount, i.e. 27 euros more, which gives a total stake amount of 57 euros if the other poker players have called on you to play this variant in your turn.

No. 5 Each poker participant may call out the variant described here as a challenge 3 times and ask the poker player whose turn it is to play to play this variant. If the poker player who has to make the bet refuses, he will receive an individual penalty that he must pay or he will be out of the game for the next 13 minutes.

No. 6 This variant of no limit Texas Holdem is designed to confuse the game and challenge the gamblers to control their bets by the calculation symbolism procedure by random principle

No. 645 Snowdeport

No. 1 You have to use a snow shovel to try to remove enough snow from the smartphone display, new snow is constantly falling, which can be seen on the smartphone display and this tries to block your view

No. 2 You must now try to use the removed snow to make snow balls

No. 3 While you are removing the snow with the snow shovel, moles appear in the positions where you are handling the shovel, these moles try to block your smartphone display with snow balls that you throw at them, thus trying to take away your view

No. 4 If you have removed a few kilos of snow, you must put this removed snow into the snow ball machine, now the snow ball machine fires snow balls at the targeted moles

No. 5 Try to hit a mole with one of the snow balls that are individually compared to the moles, you will receive sun rays for each mole you hit

No. 6 You now use the sun rays to fight the falling snow flakes, this means that you now try to hit the snow flakes with your sun beam cannon, but to ensure this you have to hit enough individual moles to get sun rays

No. 7 Try to detach the smartphone display from the snow flakes in real time to get a clear view of the emerging moles

No. 8 For each snowflake you hit you get sunshine points, collect enough to get the required number, when you have received the required number or number of sunshine points, you can activate the sunshine move, when you trigger this, all snowflakes disappear from the smartphone display and it stops snowing

No. 9 Now you can see the moles appearing better, so save enough snow for your snow ball machine to hit all the moles with the individual snow balls at the end and make the moles disappear

No. 10 If you hit a mole, for example, it disappears from the mole hole. Now you can use the hole to place a snowman there if you have enough snow left. This snowman is used to shoot the moles further away with his snow balls, so he serves as a weapon system that helps you to get a better grip on the moles that appear.

No. 11 The game is timed and you have to make the required individual moles disappear from the display in the time running out in order to free your smartphone display from the snow balls that are thrown at you by the moles. In addition, a mole snow ball that hits you takes away your life energy, so pay attention to your life energy display and do not let the moles destroy you.

No. 646 Bluechuck

No. 1 You have to try to color different shoe variations appearing on the smartphone display in a certain color

No. 2 You use a hose that must first absorb the colored vector points from the display in order to activate the exact color for the hose

No. 3 If you have absorbed enough colored vector points from the smartphone display, in this case, the blue color, you can now try to color the individual white shoes with this color

No. 4 Be careful that no snake, which is also on the smartphone display, slips into your shoe, otherwise you will lose the shoe and it will then dissolve

No. 5 You must therefore dye the shoe the color of the snake that is coming towards you in order to prevent the snake from crawling into the shoe

No. 6 Different shoes appear on the smartphone display, there are also colored vector points on the display and of course the colored snakes that try to crawl into their shoes

No. 7 You have to, as described, feed your hose with colored vector points to get enough color, which you then use by beam shot on the various types of schools.

No. 8 Try to dye all shoes in the required color so that the colored snakes cannot crawl into the shoes

No. 9 In addition, if you have colored a shoe, you can now move it and destroy the snake with a stomp attack, the same color must of course be present, drag and drop the, in this case, colored blue shoe onto the colored blue snake to flatten it

No. 10 If you have colored different shoes with your hose and pulled or dropped the shoes onto the colored snakes that have appeared, they will now disappear from the smartphone display

No. 11 Now you can put individual flowers into the shoes that appeared as a reward for the destruction of the snakes

No. 12 These flowers serve as weapon systems and can now shoot colored vector points at the upcoming new insects to color them

No. 13 You must then use your second hose to suck up these colored insects, for this you will receive time points to increase your time account, because the game is timed and time is running against you, in this touch defense game

No. 14 If you have sucked up all the insects that appear from the smartphone display in the correct order, the smartphone display will be free and portals will appear that you can use to get to the next level

No. 647 Flashmeghost

No. 1 You must use your smartwatch flashlight at night to illuminate hidden ghosts that have been moved to the real world, they use their digital map, navigation plus radar technology to search No. 2 Once you have found the position of the ghost on the digital map, i.e. the real position that you found in the real world, try to use the smartwatch

No. 3 Once you have located the position, please activate your smartwatch's digital flashlight at night, point it at the position shown by the app, it will light up, now point at the position and try to illuminate the emerging ghost that was briefly visible on the smartwatch, this means that you aim at the position in the real world and try to catch the ghost with a vector point network that has to be sifted from your smartwatch to the position.

No. 4 If you have caught it, you must now swing your hand, where the smartwatch is on your wrist, in the given directions in order to calm the mind and then with soft, medium, hard touch on the smartwatch display, finally by pressing on the display, you can capture it

No. 5 If you have caught the spirit in your smartwatch, you can now train it with the training function, see the former game Tamagotchi, try to give it a personality, take care of its everyday life, like with a little baby from the Tamagotchi school

No. 6 Only by running kilometers in the real world can you use them to unlock different types of training for your mind, so go for a walk every day and collect real kilometers that serve to further train your mind with the training function and unlock new functions of handling for the mind

No. 7 Finally, the training is completed and you must now let your ghost compete against other ghosts, fellow players who may also have been trained, in an arena called Flashme. To do this, you only have to connect your smartwatch to the PC and upload the ghost to the arena on Flashmegghost.pl and verify it with your personal data. No. 8 Once you have uploaded the ghost to the website flashmegghost.pl, your ghost will be selected by a random carousel and, after being selected, will compete against another player from the Internet in the landscape arena that is true to the original Google Maps.

No. 9 If you win the duel, you can transfer the ghost you won from the website flashmegghost.pl to your smartwatch and then release it into the real world

No. 10 If your ghost is found in the real world, you will receive ghost points for it, with these points you can buy special training procedures in the online shop flashmegghost.pl and apply them to your current ghost

No. 648 Sheitdoes

No. 1 You must observe the following in this poker variant of no limit Texas Hold'em: when it is your turn and you bet the Joker Turn (3 different ones), you must throw a die in the middle of the poker table. The number of eyes on the die determines the multiplication, namely the amount of your bet. The other poker players must now imitate the principle and add their bet, in the amount multiplied by the number of eyes on the dice thrown.

No. 2 Once all poker players have added their stake, the round continues in the normal rhythm until someone else calls their Joker Turn and uses it according to the principle just described. Each player has 3x Joker Turns that they can use and call.

No. 3 The next Joker Turn is the accumulation of a jackpot that is collected by the players, this means that when it is their turn, they put their bet into a jackpot machine and keep it there, the remaining poker players do the same throughout the game, so the amount of money in the jackpot grows, when all poker players have used their 2x second Joker Turn and put their individual bet in the jackpot machine, the jackpot machine decides when and at what time the jackpot is implemented into the game

No. 4 The jackpot machine can bring and implement the entire collected jackpot money amount into the poker game before the flop, after the flop, during the flop, before the turn, during the turn, after the turn, before the river, during the river, after the river through the activation carousel, where these random variants are on it.

No. 5 The last Joker Turn is that all poker players, individually rotated through the position carousel, must swap their seat and place while playing with each other after the position carousel draw, which means that the personal bankrolls now have different owners and the changed game now has a new game rhythm than before

No. 649 12Honkeys

No. 1 You must try to defeat the Animalus (opponent) with your 12 honkeys in a turn-based strategy game, you must simultaneously and at the same time control these 12 honkeys in a certain time sequence

No. 2 Each of these 12 honkeys has specially tailored weapon systems, which he uses in turn to use against the Animalus (enemies)

No. 3 You start the game with your 12 honkeys by random selection, you have about 35 seconds to control one of the 12 honkeys, these 12 honkeys are characters based on the different monkey species

No. 4 Try to use your specially armed, randomly selected honkey (monkey) in this example, a chimpanzee, to navigate it on the map in 35 seconds and bring it as close as possible to the opponent, look at the radar and you will see the route to your opponent (Animalus)

No. 5 In the game you must or can move all 12 Honkeys (monkey species) after each round played, which means that when the round starts, you only have 35 seconds to position the Honkey Chimpanzee, in this case chosen, in the right place you have in mind

No. 6 The opponent also has only 35 seconds to move his character (animal) on the original map generated by Google Maps and to guide him to his desired position

No. 7 They try to bring the closest Honkeys equipped with their special weapon system into the enemy area in order to get close to the enemy so that they can use their individual weapon system, which is different for each Honkey

No. 8 If you are close to your opponent and your Hon-key chimpanzee or another Honkey (monkey) has the right weapon system to handle the distance or use of the weapon system so that it can hit the opponent, place it in the best position on the map that you think is best, ideally so that your opponent cannot see you or possibly hit you when it is his turn. No. 9 In this case, you have stalked an opponent (animal, animal) with the Hon-key chimpanzee. The opponent may not see you and cannot guess where the fire, in this example from a bazooka, the chimpanzee's special weapon, could come from. Only when the opponent has been hit will your position be displayed on the live radar.

No. 10 Try to stalk the other enemies (animals) with other Honkeys (monkeys) and position yourself to shoot at the enemies. If you have brought some Honkeys close to your enemy, they simultaneously switch the Honkey that carries the perfect weapon system and activate it by shooting at the enemy that is in the immediate vicinity or further away.

No. 11 Try to surround the first opponent with several Honkeys or challenge him in a single fight, defeat the first opponent in the switch, by alternating the Honkeys or alone, with a specially selected Honkey

No. 12 The game is a round-based game, which means that after the 35 seconds have elapsed, it is the opponent's turn to let his, in this case, animals compete against them, the player who has destroyed or beaten all opponents on the first map generated by Google Maps wins the round game

No. 13 As the game progresses, individual weapon items and medicine packs appear in the game for you to collect. You can use these when you collect them during the fight to gain an advantage over your opponents.

No. 14 Every hit from an opponent's weapon deducts life energy from the Honkey's scale, depending on what weapon he used. Note that your Honkey only has a limited life energy at the beginning of the game. As the game progresses, the Honkey transforms into a better soldier and gets better weapon systems and more life energy in the game. He rises to a higher rank and thus receives better equipment and energy packages.

No. 15 Finally, conquer the lands in your vicinity or surroundings, which are generated by Google Maps, according to this principle, plant your flag and control the areas you have conquered in percentage terms and use it to make your Honkeys heroes.

No. 650 Shark Alarm

No. 1 You try to swipe downwards from the top of the smartphone display with your finger. After each swipe with the tip of your finger, a shark appears, which you try to transport into the water shown at the bottom of the smartphone display in order to catch a colorful, bright, individual, sought-after fish, which is shown on the display board, with its mouth (soft touch, for a small opening of the mouth, medium

touch, middle opening of the mouth, hard touch, large opening of the shark's mouth) and then with the next fingertip swipe to move it out of the display in one of the smartphone directions

No. 2 Pay attention to the colors and sizes of the fish in the shark tank. You have to call out the color via microphone as you pull your shark down into the tank to turn the shark into the right color. You also have to try to pick up the fish as described above with a different mouth size and, once you have picked it up, swipe it in a certain direction shown, out of the smartphone display.

No. 3 The fish that move around the bottom of the tank are fast and difficult to catch, make sure that you catch the fish with a swipe and then use a soft, medium, hard touch with their individual mouth size to catch them. If you have caught the fish and swiped in a required direction from the smartphone display, you will receive alarm points, which you must collect in case you lose track and with the collected alarm points, the fish can be paralyzed for a short moment in order to catch them better.

No. 4 The weighted fish that you have removed from the display will now appear in this massive touch game on other displays of players whose smartphone displays are on and will fall into the tanks of other players in this game, so be aware that in this game many players try to massively overfill their fish tank with their own wiped away fish, so pay attention and react quickly by catching and wiping the fish that appear

No. 5 If you have taught your fish tank and were able to clear the fish tank in the required time, you win the round in the Shark Alarm game described here. If you have removed enough foreign fish from your tank from the smartphone display, you can also trigger a so-called Shark Alarm + and transfer all of your swimming fish from your tank to another tank by calling the game name, thus overfilling the tank of the foreign players in this world and ultimately forcing the player to give up.

No. 651 Spitghostfire

No. 1 You must try to confuse with your spitfire, spitting fire, emerging ghosts that appear from the sound boxes for various reasons

No. 2 Try to locate a ghost on your radar in this game played in bird's eye view, your radar shows you the location of the ghost creatures using different colored vector points

No. 3 Walk through the different rooms of the game and try to listen to the sound or let yourself be guided by the music or sounds that the ghosts produce

No. 4 You also have to collect various singing notes and then use them against the ghosts, which means that you first have to convert a ghost that you have found through the radar with your collected singing notes

No. 5 In your singing notes book, the individual singing notes are listed. When you stand in front of a ghost, you have to shout or repeat them through the microphone in order to convert the ghost and then confuse it with your spit fire spells that you have collected in the various levels.

No. 6 If you have confused and converted the ghost, try to paralyze it with your ghost cannon, which you know from Ghostbusters, and then finally capture it

No. 7 Once you have caught your first ghost, you must now take it to the portal machine to turn it back into a person. On the way there, where you cannot use radar, various creatures are waiting for you, which you must fight with the various weapon systems you have collected in the levels.

No. 8 The individual creatures defend this portal, they have to eliminate these creatures in order to get to the portal machine, if they have managed to feed the spirit into the portal machine, the spirit turns into an active player, which means that now, by chance, an Internet user who has registered for the game can now control this freed person

No. 9 Your goal is to form a team of a maximum of 13 different players to play the levels that are true to the original Google Maps and to free the remaining ghosts. If you lose a player, you cannot replace him, which means that the Internet user connected to the game drops out.

No. 10 Pay attention to your life energy meter, you can charge it with collected media packs if the creatures steal your life energy

No. 11 The game is also timed and you must use your ghost cannon to pick up the ghost you are looking for on the scoreboard and bring it to the portal machine to turn it into a team member within the allotted time.

No. 12 In the next levels, a huge number of creatures will appear that you have to destroy with your own team, collect various items to strengthen them and increase the experience level of the team through various fights and battles that you have fought with the creatures.

No. 13 In the best Diablo style, try to catch the remaining ghosts and destroy the remaining hordes of creatures in order to ultimately travel through the various portals to new hellish levels and fight against other teams playing the game in the final goal of the game

No. 652 DrFrankenstein

No. 1 They try to play the game using individual faces based on the game principle of Tetris and Plants Vs. Zombies, which means that they have to register with their own selfie in this game to participate in the game.

No. 2 Once you have uploaded your face, it will be transformed into a kind of comic graphic, which means that you will be randomly assigned a zombie face by the game, for example.

No. 3 Have enough faces registered for this game, in this case 130 faces or even more, depending on how the app feels during the day through its AI

No. 4 Now the game starts and the transformed faces fall from the top of the smartphone display in a rectangle shape, down to the bottom of the display, see Tetris game principle

No. 5 Now try to match the faces to each other, next to each other, below each other and opposite each other, by changing the direction of the control keys. If one face fits on one of the other and looks the same, you will be awarded points for the connection.

No. 5 These points for the successful connection, use one to drag and drop a weapon item from the left or right selection list onto a face. Once you have done that, the face you have selected will receive a special ability, which you can then use by pressing on the face or automatically to destroy enemy face creatures falling from above using the technology from Plants Vs. Zombies, which means that you fire a special shot, for example a water jet, fireball, ice ball, earth ball or a laser beam, to destroy the enemy creatures.

No. 6 The connection of the faces you have linked dissolves after the special shot and gives you bonus points after a successful hit, which you should then use after completing the level to build your digital village and equip it with defense lines and barriers

No. 7 Only after completing the level does the game switch to the self and defense phase, which you know from Coin Master and determines which attacks should be defended, the extra is that you can also explore other villages in the construction status and then spy on them, even in the intermediate level, if you get there, and ultimately attack them

No. 8 Try to dissolve all faces as described above and free the smartphone display from the enemy creatures that prevent you from connecting your faces in order to ultimately get to the next level.

No. 9 Once you have reached the intermediate level, you can build your village and protect it with barriers, depending on how many bonus building points you have previously collected.

No. 10 So try to constantly link the faces in order to use the points you earn to equip your faces with weapon items and thus block and destroy the enemy creatures with the special ability. In return, you will then receive the bonus points to slowly expand and develop your village and protect it with protective shields from the attacks of the other players.

No. 11 Once you have integrated and used your bonus points, you can now return to the level-like Tetris game and continue playing the game of face links based on the principle described above. If the game runs out of faces, the game must then be continued on one day or the next. New users from the random carousel register for the game with their selfie and thus release new faces.

No. 12 Build up your village steadily and conquer the other villages you have built with attacks, see Coin Master for example, become the village king and finish the principle of Tetris & Plants Vs. Zombies described here as Dr. Frankenstein

No. 653 Damdididam

No. 1 You as a participant (3x in number) must try to do the following in this show, which will later become a late night show: you must select certain categories on the display monitor, using a time scroller procedure, in the show, be it Action, RPG, Jump and Run, Hack and Slay, Drive Race, etc., this means that you select a year, day, when a computer or console game was released, you will be asked individual questions about the selected game, which you must answer beforehand.

No. 2 Try to answer the correct answer to the game by giving 3 wrong answers at most. If you have given the correct answer in this case, you will receive an additional selection time scroller, which means that you now have to look for a checkpoint in the game's database in order to continue playing from the selected checkpoint of the computer or console game in order to reach the next checkpoint in the game.

No. 3 Once you have reached the checkpoint, you will receive Alf Dollars, depending on which categories are priorities or Difficulty level, you have chosen, your presenter of the show is Alf, the extraterrestrial life form from the TV show, he plays a joker with you after you have passed or mastered the checkpoint game, either you say no or risk, in this case, your just won Alf dollars against Alf, the presenter Alf tries to imitate the same thing that you had just played, but this time, it is a timer, if Alf reaches the game checkpoint faster and the next step of the game faster, to this point, in this case a level checkpoint from Mario or Sonic the hedgehog, you lose the Alf dollars you have won earlier and go home empty-handed No. 4 You can bet with Alf, after each correctly answered question from the computer and console area and the checkpoint has been earned, namely your individual won Alf dollars in the challenge with Alf or you can duel with the other 2 participants in the show Damdididam in real time, with their individual Alf Dollars, stake amounts

No. 5 If, as a participant in the show, you have earned the most Alf dollars at the end of the broadcast, you can come back next time as the defending champion and duel with other users from the Internet who are taking part in a multi-event or start or carry out exciting computer and console game duels with the presenter of the show, namely Alf. The live recording of the checkpoints from the computer or console games will also be broadcast on YouTube. In addition, individually selected YouTube viewers can bid on the channel with real money stakes to see whether the better player is Alf or Sue herself.

No. 6 If you have left 3 shows in a row as the winner, you can exchange the Alf dollars you have won for real money units or invest them against Alf in the last game. It's about using the Alf dollars to challenge him in no limit Texas Holdem heads up. You win or lose everything in this last game of the show, which you ultimately leave as the winner with real money. or as a loser with a consolation gift, never allowed to enter the show again

No. 654 Live Ticker

No. 1 You must note the following in this no limit Texas Holdem or no limit Omaha variant: When it is your turn and you take part in this game, you must note the following: your poker chips have a live ticker on the front or back, which means that you only have a short amount of time to place a bet. A display board shows you 3 suggestions as to what bet you could place in this time. When the live ticker for your chips starts beeping, it means that you have a short amount of time to place these chips. Otherwise, your poker chips will go into the jackpot, which increases steadily when players miss placing their bets.

No. 2 The special chips with the live ticker must be used in the game within the required time, which is also shown on the scoreboard. If these chips are now in the standard pot, it can happen that they start to beep again, which means that you then have to look at the front or back and now find out from the live ticker that you have to add, subtract, multiply or divide your next bet with the number shown randomly on the chip in percent.

No. 3 If it is your turn and one of the chips starts to beep, then look at the number (1-9) randomly selected by the chip, which is now on the front or back of the chip, using the calculation methods or symbols just mentioned. Now you have to redefine your bet and follow the beeped chip with the live ticker, or you will be eliminated from the normal game.

No. 4 The jackpot generated above is individually integrated into the live game by the randomly called scoreboard and can therefore change the entire game to the advantage of the winner.

No. 5 In addition, live viewers can vote on the voting desks and determine which numbers, which must be between 1-9, should be displayed on the live ticker chip and integrated into the game

No. 6 Each poker player owns an individual amount of these live ticker chips if he agrees to the games and the organizer, in accordance with this, agrees to this game procedure

No. 655 Workingspot

No. 1 In this variant of no limit Texas Holdem or no limit Omaha, the active poker players must put on an individual mask, in this case, in this example, the player whose turn it is puts on the Alf mask and for the other active poker players at the poker table, special masks are provided, which must also be put on

No. 2 The mask of the active poker player now plays its bet, which means that other players from the audience with the same mask are involved in the game, which means that the audience members determine the bet of the active poker player, which means that they transfer the bet to him via lightning PayPal transfer, to his personal display, which is attached to the poker table, together.

No. 3 Now the active poker player wearing the Alf mask sees the transferred stake amount that he has to bet, then the other active poker players at the poker table are integrated with their participants from the audience, which means that they decide for each individual poker player whether they want to match the stake placed before or raise the stake

No. 4 By voting, the audience involved, wearing the same mask as the active player, sets the move to the current poker player whose turn it is, via an info display that is streamed in real time to the poker player's display.

No. 5 Now the next poker player must follow this move and the stake amount transferred via Blitz PayPal. The audience masked participant, who can be seen on his poker display on the poker table, must now follow and bet, in this case the next masked active poker player increases the stake previously placed by Alf.

No. 6 Now the round continues as normal, according to this principle and the masked poker players either fold or go or increase the amount to be played. With the help of the masked participants from the audience

No. 7 in this example, the variant workspot, the masked audience member plays with their own money, for the active poker players who sit together at the poker table, masked in the mask of their audience member, with

No. 8 In this example, the masked team Alf wins the round, the variant can be activated 3x in the evening and during the game, which brings more action and an uncanny pleasure in the future of no limit Texas Holdem and no limit Omaha at the poker table

No. 9 In the YouTube variant, special registered YouTube users can also participate in the game by sending money and movement information to the active, live poker player via the cashmove button, online, on his display via the live button on the YouTube page, to the active, live poker player on his display, which is attached to his place, or transferring it to play. According to the principle mentioned above, this variant can also be called out 3 times and played together in the evening.

No. 656 Deathwish

No. 1 You must note the following in this no limit Texas Holdem variant: in the middle of the poker table or on the digital display board there is a position carousel (code name: deathwish). As a poker player, you can activate this three times while you are playing. This means that if you activate it, the following can happen: you spin a ball on the carousel, this flips onto a seat where another poker player is sitting. Now you have to swap positions with each other before or during the game. This means that you now receive a different bankroll or, if you have to swap places during the game, you receive the other sitting player's current amount of money and have to continue playing the round and from then on.

No. 2 You have 3x the opportunity to use the deathwish carousel in the game, hope that you get a place where there is a higher bankroll or a higher amount of money with which you have to continue playing, each of the poker players playing gets 3x this chance to change the entire course of the game, either positively or negatively, advantage or disadvantage

No. 3 It can also happen that a spectator on the deathwish carousel was randomly chosen, this spectator must now, until someone spins a ball on the deathwish carousel again, play with the bankroll and the amount of money of the poker player

No. 4 It can also happen that the ball on the deathwish carousel falls on calculation methods, for example on the addition, subtraction, multiplication, division, sign and on the corresponding number from 10-90 percent, then your bankroll must be added, subtracted, multiplied or divided by the number hit.

No. 5 It may also happen that the ball on the deathwish carousel indicates that you have to leave the game without your money or it will be added to the jackpot, the ball can then also possibly land on the jackpot symbol and you will get this collected jackpot added to your bankroll

No. 6 There are other ways that the ball cannot escape from the deathwish carousel, for example, the ball can fall on new cards, either before the bet or while playing their round

No. 657 Youmouth

No. 1 In this variant of no limit Texas Holdem, you must try to implement and bring in the spectators and YouTube participants who are live in the action of the game. No. 2 You play

your round in no limit Texas Holdem. When it is your turn, you can use the joker mouth gamble, which means that you choose a spectator from the audience and ask him how high he should call out the bet without knowing what cards the poker player has received. The round continues like this, and when it is your turn again, you choose the next spectator from the audience and he calls out loudly, again a bet amount that the poker player must place. This continues until the round is finished.

No. 3 The other variant is that the poker player has a YouTube display in front of his eyes on the poker table, which means that individual YouTubers who have registered on YouTube for this live recording or poker round can see live how the game is played. When it is now a poker player's turn, the YouTuber can stream real money to the selected poker player on his YouTube display via YouTube stream and determine the stake without seeing which cards the poker player is holding and influence the further course of the player's round. He sees the pot and the live game on his monitor and uses his streamed real money to determine the poker player's move. He controls him basically right up to the last card that is played and receives the amount won after the round has been played back from the poker player to his YouTube poker account, transferred live. No. 4 The YouTubers can individually determine which poker players they want to play with live, so they can stream with their real money and support the selected poker player with the digitally transferred money in the Live poker round at the poker table, support live and plan the moves with him, see the Youtubers, but not the cards of the other players, as is the case with a real, no limit Texas Holdem game

No. 5 The Youtubers can act as jokers in the poker round, this happens when the live poker player at the table activates his Youtube Joker Youmouth, the real active poker player has 3x jokers, which he can and must use and activate in the game in order to make the game more attractive and unpredictable

No. 6 If the Youtuber loses his stream money, which he has transferred to the active poker player to play, by controlling the poker game, this will be deducted from his special YouTube account and he will be eliminated from the game. Now a new Youtuber can try to register for this variant of no limit Texas Holdem by random selection through a face carousel and play with the selected, active poker player who is sitting live at the poker table and determine how the poker player should play.

No. 658 Soupblade+

No. 1 You have to try to get through a digital map, that is, the map shows you goals that have to be completed in the real world in order to find the game that was hidden by the app

No. 2 Use the navigation and radar function to hunt for the digital game in your area or surroundings, you don't know in advance what kind of game it will be

No. 3 Once you have started your journey with your smartphone, you will be provided with various routes and presented with them, you collect on the way, colorful and individual (Koch)

Ingredients Emojis in different sizes, these also show you the route guidance in the navigation

No. 4 When you arrive at the place where the game is, the smartphone will light up an alarm through the radar. You must now position the camera in the position where the illuminated point on your radar is located. This means you scan the position and, if you are lucky, the digital game will appear on the smartphone screen. You can now take part in this game live and in real time or add it as a checkpoint level to your level inventory and continue playing at home afterwards.

No. 5 Before you can play the game, you have to check whether you have collected enough colored and individual (cooking) ingredient emojis in different sizes and in the right color, because only then will the digital game be activated on your smartphone display

No. 6 If you have collected enough colored and individual (cooking) ingredient emojis in different sizes on the different paths to the destination of the game, you can use your digital game, which now appears on the screen, to start the duel that has now started at the destination.

No. 7 In addition, you must touch the smartphone display where the game is displayed, using soft, medium hard touch from the puzzles that block the display, to each other in order to give the display a clear view to make the game visible

No. 8 Once you have made the game visible, duel with other participants who have connected to it or against the computer opponents, see the game principle of the series by soup-blade (App Gallery No. 18)

No. 10 If you don't feel like dueling in a live duel, scan the destination and save the level on your smartphone in your level list, then call it up again at home in chill mode and comfortably recall the level and then play it either on the smartphone or your TV connected to the smartphone

No. 11 Collect levels in the real world that are hidden by the app on your digital map, collect enough to start the duel at home or on site, for each level you pass, cooking creation, you receive Soupblade points, these points can be used in your own online item shop to get or receive various and rare ingredients (cooking) emojis in exchange for points. No. 12 Play through the levels that you have collected live on site or at home, after each successfully passed level the app generates a new one and hides it on your digital map for you to find, go on a search and find the new levels to be able to continue playing the game.

No. 13 The kilometers you run in the real world are needed to unlock your colored and individual (cooking) ingredient emojis No. 14 Try to keep moving and play the

extraordinary cooking creations according to the soupblade (App Gallery No. 24) game principle, you will become the next cooking star in the rankings and receive as a gift, true to the original, kitchen utensils, in this case an individual set of kitchen plates, sent to your home free of charge as a reward for completing the collected levels

No. 15 Very easy to understand, you have to use the digital collected, colored and individual (cooking) ingredient emojis, which previously served as vector point path guidance, to master the game, see principle Soupblade (App Gallery No. 24)

No. 659 Audience Report

No. 1 You must try to keep the following in mind in this variant of no limit Texas Holdem: you play with an additional player who is mounted as a display or monitor at your place on the poker table, which means that viewers at home can log into the live poker game using their TV via webcam, which means that they must first pass a random selection process, and if they have been selected via the face carousel, they must answer 3 questions from the poker profile they want to play with.

No. 2 If you have passed the face selection process via carousel and your face has been selected plus, you have chosen the poker player you want to play with and answered his 3x questions, you can team up with the poker player, which means you stream your face onto the monitor or display that is attached to the poker table and see the poker player's cards, now you can decide together what to do next, either bet an amount you have determined or leave the game

No. 3 Each of the poker players has a monitor or display attached to their poker seat. This method allows spectators to play live if the poker pro allows them to do so. There is also a streaming round after each no limit Texas Holdem round. This means that only the spectators compete against the other spectators shown on the monitors according to the no limit Texas Holdem model and play with the bankroll of the poker pros. The spectators can also use their own bankroll to play. This is transferred via Blitz Paypal to the display where the monitor is attached. When the normal game with the poker pro's bankroll has ended, the poker pro can now play with the bankroll of the respective spectator (team comrades) and, according to the principle of no limit Texas Holdem, either win something or lose everything.

No. 660 Gumble

No. 1 You must try to use the Gumble Joker in this variant of no limit Texas Holdem, you can use and play it 3 times in the poker game at any time, this means that when you use the Gumble Joker, you can change the poker game as follows

No. 2 The chip stack is made up of the kilometers run in the real world, which means that in order to take part in this poker round, you have to walk a route set by the organizer in the real world. On your smartphone, you will see hidden poker chips with different amounts of money on your digital route guide (navigation system), which serve as signposts (chips as point signposts). Collect the hidden poker chips as you run and complete the route in the required time in order to then use the digital poker chips, which have different monetary values, in the live poker game. This means that, for example, you have run around 8.5 km in 80 minutes and have digitally collected a chip amount of 85,000 dollars. You can and must exchange this digital chip amount for real chips at the poker table for the duel. No. 3 There are now other poker players sitting at the poker table, who in this example also have a have run a distance of 8.5 km and have qualified for the poker game, but who, according to this principle, have probably got a different chip amount through the different, individual, collected poker chips and are now playing with the exchange for real chips, i.e. the same value that was collected

No. 4 The individual poker chips that you have now received have a different back, so on the back of the chips there is sometimes a percentage number (10-90), you do not know beforehand what percentage number is on the back, only when you use the chip on the poker table will you see that, for example, your poker chip has a 30 on the back and an arithmetic symbol, for example, the addition symbol, or subtraction multiplication, division symbol, in this case an addition symbol is visible, now you have to add 30 percent of the value of the chip to your chip, otherwise you are not allowed to continue playing.

No. 5 It is up to you whether you have collected these poker chips, but you will only find out when you have exchanged these digital poker chips from the running for real chips, and afterwards, you can see this on the back of the poker chip when you put your bet into the poker round

No. 6 Try to take these chips from the other poker players and by varying and changing the entire game, stay on the hunt for new chips. If you have lost them all, go over a required distance in a required time that the organizer has suggested for you and later come back to the poker table with new chips collected and duel again with the other poker players.

No. 661 Bohaterem

No. 1 You have to pay attention to the following in this poker variant, you have to make and design your own cards before the game starts, this means that you can briefly see emojis on a display board in order to draw them on your blank cards, this in turn means that you have to integrate 4 different emojis per card series, i.e. 16, into your hand of cards, these have to look similar to the emojis that the other poker professional players have drawn, to do this you integrate numbers from 1-9 into the different corners of the cards or the deck of cards

No. 2 You have now compared your 4 emojis in 4 different colors that you have drawn on the blank cards (16) and understood a sum from the drawing, which means that you now have 13 different cards, 9 cards with numbers per deck of cards (13) and 4 cards with 4 different, same colored emoji drawings per deck of cards (16 cards) and must integrate them into the game, bohaterem

No. 3 Following the game principle of no limit Texas Holdem, play with your self-created deck of cards, which works according to the function of no limit Texas Holdem, use your new cards in the game and laugh more than usual when you use your own emojis and force them to win and succeed or lose, play as usual, with your bankroll or integrate the other game variants from the sidantre.com App Gallery of poker

No. 662 Livepress

No. 1 You must try to keep in mind the following in this poker variant of no limit Texas Holdem, they are based on a random principle, which means that you must use your bet through a bet carousel

No. 2 It's your turn, you have to put the ball into the bet carousel and spin the carousel, the ball stops on an individual amount that you now have to bet, the mini carousel is attached to your position, at the poker table, and varies with its individual game round to round No. 3 You now have to bet the bet amount that was rolled out, selected by the ball, in the next round, addition, subtraction, multiplication, division signs are randomly hit by the ball, which you as a poker player now have to pay attention to, if the ball hits, for example, an addition sign and the corresponding number, in this case 13, then you have to add 13% to your bet that was rolled out previously and continue to bet, if you hit the subtraction sign, you deduct 13% from the bet, if you hit the multiplication sign, you have to increase your bet 13x, if the ball finally hits the division sign, then your bet has to be divided by the number 13 divided

No. 4 in the next round you have to put the last ball into the betting carousel and let it spin, either the spinning ball hits the bet, fold, call or all in field, chance decides, then for you whether you have to call, raise the bet, get out or bet everything at once

No. 5 If you have survived the 3x possible principles of the carousel, you must now select an individual participant of the poker game to be played, who will now be responsible for using this poker variant. Once everyone has played through this principle, you can activate the standard mode of no limit Texas Holdem again and continue playing in a relaxed manner.

No. 663 Stillwesteady

No. 1 You must first try to position a stick so that it stands stable on the ground, then you must look at the scoreboard and pay attention to which next stick you use to connect with the one you placed at the beginning

No. 2 Each stick has 4-6 colored vector points to which you can and must attach the new stick

No. 3 You must place the first stick on the ground and select the next one shown on the scoreboard and attach it to the first stick with its vector points

No. 4 If you have, for example, attached 3 rods together, you will slowly get an individual height

No. 5 Try dragging and dropping the bars shown on the display board and attaching them to the vector points of the nearby bar

No. 6 With the added bars, the height of the structure increases and you get points for it, for each bar that is attached, you get points

No. 7 Try to climb the required height with the bars in a given time

No. 8 Also try to build a stable connection so that the bars do not fall into each other or fall off the structure

No. 9 Build steadily upwards and place your rods carefully on the colored vector points, these serve as anchors and keep the connection of the rods stable

No. 10 Once you have reached the shaped height, you have passed the goal of the first level, in the following levels, you must climb another height and use other bars, this time, small, medium or large

No. 11 Handle these different shapes of bars and achieve stability and the required height in the given time and thus reach the goal of the level

No. 12 Build the structure you want to reach the height with stably and carefully and battle against other builders who are trying to do the same as you, build your structure faster and more stably and reach the required height faster than your opponents

No. 664 Comewithbestflow

No. 1 You must observe the following in this poker variant of no limit Texas Hold-em: you will be dealt your cards normally, now you must choose a player with whom you want to exchange cards and

No. 2 You look at your cards before you bet and then swap places with your chosen poker player, who can also look at the cards before swapping places

No. 3 Now you see a circle on the scoreboard, after you stand up you have to throw a dart chip at this circle, this circle has 4 curves around it, a curve is an addition, a subtraction, a multiplication, a division scale

No. 4 Now the poker player who has now stood up must throw a special dart chip at this circle (dartboard) before sitting down. If, for example, the dart chip attaches itself to the addition of the circle and the chip remains attached to a certain number, in this example 35 (1-100), he must increase his bet by 35% if he sits down on the spot where the other poker player was sitting.

No. 5 The other poker player must do the same, he throws the dart chip and it attaches itself to the multiplication round of the circle and to the number 50, which means that he must increase his bet by 50% if he has sat down in the other place, but this time, as mentioned, with the cards of the other poker player

No. 6 So the first poker player, with his new cards, places his bet, added plus 35% percent increase, the other his bet plus 50% multiplied, a

No. 7 After that, the round continues in the same way as you know it from no limit Texas Holdem, until one of the players in the new round is randomly selected by the dealer for the principle described here and has to swap places with another poker player, plus the throw on the poker dart board and its calculation process, which can then vary the stake individually.

No. 665 DonKarussell

No. 1 You have a poker table that works with the frame, which means that you can not only rest your arms there, but also the following function is built in, which means that a ball runs through the armrest, when you have activated this, the ball stops, so you can now see on which individual field it has stopped

No. 2 The armrest has the following fields built in when it is your turn before you can look at your cards, that is, you press the play button from your seat and let the ball spin, this ball spins in the armrest and stops on an individual field, in this example on a chip with a certain amount of money that you now have to bet before you have looked at your cards

No. 3 In this case on a 3000 dollar chip, you have 3 ball attempts in this round to play with the ball, now it is the other poker player's turn, he presses the play button before looking at the cards and the ball spins from his point of view and falls on an individual field, this field in this case is a chip with a money amount of 30,000 dollars, the poker player must now bet this amount, like the other poker player with his 3000 dollars, in order to see his cards or he will drop out of the no limit Texas Holdem poker game

No. 4 Now it is the turn of the other poker players, they spin the ball through the armrest and are shown on which field the ball will stop, i.e. on an individual chip amount of money that they then have to bet, everyone has placed their randomly drawn bet, the game continues from then on, as usual according to the principle of no limit Texas Holdem on the poker table.

No. 5 The players can now again choose the ball and see what amount is selected by the ball, all poker players on the evening have 3x plus further attempts to choose the ball, which is a bet chip drawn with an individual money amount that they must play with

No. 6 In addition, the ball can also land on a card that must be exchanged for yours during the game. The other poker players do not see this, only the player who spun the ball can decide whether he wants to exchange his card for one spun by the ball during the game. It can also happen that the ball lands on the all-in button and the poker player, all-in, has to go into the round with his entire bet. It can also happen that the ball lands on the field where he then has to sit out completely or swap places with another poker player. Another field is the cold button, which means that the poker player is frozen for the round and can only continue playing after 3 rounds. In addition, there are the mathematical chip bet money amounts, these show you which method you have to use to add, subtract, multiply, divide your bet. If the ball falls on an addition chip bet amount with the number 37% percent (1-100% percent numbers), he has to add 37% percent of money to his bet, etc. Depending on which mathematical chip is hit

No. 7 Now the poker game becomes much more interesting than before and more unpredictable, chance decides the chip bet amounts, by the chance of the ball that runs around the armrest and selects the chip bet money amount, or another field, as described above in the procedures that could come by chance

No. 666 Basid

No. 1 You must try to complete the following elements in this poker variant. When it is your turn, you must try to use 5 basketball chips to turn the Cinema Joker into a mini basketball basket on the table. The backboard randomly indicates the amount of chip basketball you must throw. This means that in this case, you will see 300 dollars on the backboard. Now you must take your 300 dollar basketball chip and try to turn it into the mini basketball basket. If you hit the throw, each player must give you 300 dollars. If you miss, you must pay each poker player 300 dollars. You have 5 Cinema Jokers in the game. You have used the first one in this example. Now you have 4 jokers left, so 4 throws at the mini basketball basket for an individual amount. No. 2 If it is another poker player's turn, he can call out the Cinema Joker before looking at his cards. In his case, If the scoreboard, i.e. the backboard, shows 1300 dollars, if he hits the total with his chip basketballs, he receives 1300 dollars from each player, if he doesn't hit, he has to give each player 1300 dollars, so the probability, depending on how well you have practiced mini basketball beforehand, is cost-saving or cost-effective for you, depending on when you use your Cinema Joker and call out

No. 3 You must try to unsettle the poker players during the game by calling out the Cinema Joker. From then on, you continue to play the principle of no limit Texas Holdem until someone uses their Cinema Joker and calls it out to the crowd. This means that if, for example, 3 players see the flop, then they can call out their Cinema Joker before the turn and try to convert the individual amount of money that is shown on the backboard of the mini basketball basket with their chip basketball. In this case, this means that poker player No. 2 calls out the Cinema Joker and now has to hit a required amount that was shown on the backboard, 20,000 dollars, with his chip basketball. This is to change the game for the others and to manipulate them. If they hit, they receive 20,000 dollars as a gift from the 3 players each, or even if they don't hit each of the three. pay out \$20,000

No. 4 The amounts on the backboard of the mini basketball hoop, which is in the middle of the poker table, are determined by the audience by voting procedure, button on click, together, in case a Cinema Joker is called by a poker player, the crowd in the audience decides, up to an understandable and normal amount, which depends on the bankroll of the players, therefore very different, in the general sense of the total bankroll of the poker players

No. 5 So have courage and show your joy of playing this poker variant, change the game and earn more chips with small, medium or large amounts of money, which are only possible by hitting the chip basketball into the mini basketball basket

No. 667 Catima

No. 1 You must try to do the following in this poker variant of no limit Texas Holdem: Your live poker game will be transmitted simultaneously and in real time to a digital poker game, which means that the viewers in the cinema, as players in their selected seats, can register for the digital poker game with their pseudonym if they have passed the selection criteria. The selection criteria include only an email address and their personal PayPal account, which must be verified. With the face recognition and their personal ID card, they can then take part in the participation, which is decided by a random face carousel.

No. 2 The viewers can then register in the digital game in the cinema via PayPal with their stake amounts and play the same amounts (have a bankroll) as in the live poker game, no limit Texas Holdem. For example, 8x participants are selected for the

digital no limit Texas Holdem poker game via the face carousel. These people then register with their email address and the real ID check at the game cash desk, these 8x poker players must then transfer the same bankrolls to the credit account for the poker game via Paypal as the real players at the real table have. No. 3 Then the selected 8x poker players who have registered for the digital poker game can take a seat next to the spectators with their own poker game controller, now the digital poker players can start the no limit Texas Holdem Cinema game at the same time as the real poker players

No. 4 Teams can now be formed, which means that a digital and a real poker player can connect together via Microalf headset, so he can communicate with him and share or transmit certain information about his own game, which means that the real poker player, for example, is promised the hand of the digital poker player and can now give him orders via Microalf headset on his own initiative as to how he should play the game from now on, the other way round it also works according to the same no limit Texas Hold'em principle for the digital poker player, he can receive the hand via Microalf headset from the live poker player and give him orders on his own initiative as to how he should play his bets and his hand

No. 5 The whole game now runs in real time and none of the real poker players or digital poker players can circumvent the system because it is checked by the Gummibärenbande Security Systems in real time and seconds, via stream, so the game is either played without teams that are not equipped with a Microalf headset, or it runs as usual, according to the variant where 2x players are connected to each other simultaneously and in real time, which is decided by the audience with a vote before the two poker games begin.

No. 668 Clownwon

In this poker variant of no limit Texas Holdem, you have to try to put on a clown mask by recording each poker player. You have to win this mask in the next round at the poker table. This means that you have to take a certain percentage of the bankroll from the other players at the poker table in order to then win the clown mask, which is individually linked to the audience voting system. This means that if you reach the value that was required, you can now put on this clown mask and link up with the viewers in the room. This means that you can use the button voting system, like on the show *Who Wants to Be a Millionaire*, to ask the viewers what bet they should place in the next round. For example, they are shown the cards and can communicate with the audience via a microphone headset and then use the voting system to place a desired amount of the audience's bet in their hand. You determine this in real time with the connected audience, which is ensured by the clown mask, your bet amount and its individual amount. You have to get through this round wearing the clown mask together with the audience, which means that you are connected to the spectators in the room with Microalf headsets, and find out from information on your cell phone, via the community voting system or via information via the headset, how much you have in your hand or how much you should bet with your hand before the flop, after the flop, after the turn or after the river. Play your hand as far as possible with the live audience and end the round with your communication, in the next round the clown mask will then be given to another poker player at the poker table, depending on how much he should win from the other players' bankroll, in percentage terms. This way everyone has a high probability of being in contact with the audience with the clown mask and playing an individual poker round that could be unpredictable.

No. 669 Cinemapoker

No. 1 You have to try to change a poker variant of no limit Texas Holdem to make the game more interesting, that means you invite people to the cinema, these people can see through the cinema which poker players are playing at the poker table, the people see but not all the cards that are being played and have to place their bets on which player should win the next game, after the first card deal, after the flop, after the turn, after the river

No. 2 The people sit in their seats and have a personal bet controller that can follow the stakes for the specified game sequence. With the controller, it is possible to place an individual bet on the favorites of the poker game before and during the game. Each of the people in the cinema now places their bet on their favorite poker player and hopes that the tip that was given is correct and that they can now double, triple, quadruple or individually increase or decrease their bet, whether or not they can. They play against the cinema bank, which controls these odds and ultimately pays out or keeps the stake of the people in the cinema for itself. No. 3 The good thing about this variant is that a few selected people in the cinema can now swap seats live with the poker players through a face carousel in order to now be able to take part in the poker game live. In turn, the now passive poker player, who recently took part in the poker game live, sits down in the cinema. Hall and now bets, as described above, on his live poker players

No. 4 So over time, the people betting live in the cinema change places with the people playing live poker and we as viewers get a new cinema poker presentation on YouTube, where the viewers - the YouTubers - can also bid live on their favorite poker players using the bet button, as mentioned at the beginning. In the meantime, new people keep coming into the cinema and changing, thus the complete action of this variant of no limit Texas Holdem.

No. 670 Shockwave

No. 1 You have to try to incorporate the normal monthly calendar in this poker room no limit Texas Holdem, which means that after you have received the cards, you have to look at the calendar to see what bet you have to play, which means that a 30-day calendar hangs as a display board above the poker table, and you have to integrate this into the poker game

No. 2 A transparent wave runs on the calendar, which randomly draws a number from the calendar for the poker player whose turn it is to play, for example, this would be calendar day 13, which means that the poker player has to bet 13% of his bankroll for the first bet if someone has called the Joker Shockwave before the game.

No. 3 Now he has to put up an additional \$13,000 from his bankroll, which in this case is \$100,000, in order to start the game

No. 4 Once he has placed his bet, another poker player can call a Joker Shockwave and the next poker player must then, as described above, randomly choose a calendar number, in this case 24, so he has to pay 24% of his bankroll to play the game.

No. 5 Each poker player has 5x Joker Shockwaves at their disposal and can call these out before the cards are dealt or during the game, thereby forcing the other poker players to set their bankroll using random calendar numbers, as described, as a percentage, forcing them to bet this percentage value. No. 6 The calendar has 30 days and each poker player has 5x Joker Shockwaves as an addition to the entire game. The Joker can be called out at any time and the number hit on the calendar decides how high they have to bet their percentage of the bankroll before and during the game. The poker game continues as usual, in the same principle, only that the Jokers can and will change the entire game individually until the entire number calendar is exhausted.

No. 7 The players, if they want, can buy a new calendar from the dealer after playing and then use the jokers, as described, which you will then receive, to change and variate the poker game in the future

No. 671 Rollerball

No. 1 In this poker variant, you try to observe the following in order to participate in the poker game. You must adhere to the following principles, which means that you must do the following with your bets. As is well known, every player has the same bankroll at the poker table, unless it is individually staggered. This is now recalculated in the rollerball game. You, as one of the 6 poker players in the example, must try to increase your bankroll before the game by challenging the other players' bankrolls.

No. 2 You have to take part in the rollerball game in order to be able to take part in the poker game at all, which means that when one of the poker players starts the rollerball game, he has to do the following with his bankroll: his bankroll, in this example of around 300,000 dollars, is placed on an area (a circle with borders), the money is then distributed into 30 amounts, i.e. 10,000 dollars, on the 30 different borders around the circle, which means that a 10,000 dollar amount has to be placed on each border

No. 3 Now another poker player throws a ball as close to a border as possible until it is close enough to the \$10,000 amount. The closer the other player is to the amount with his throw, the more this amount is added to his bankroll. Each player has 3 attempts to position his rollerball close to the \$10,000 amount of the first player and his bankroll. So each poker player with his entire distributed bankroll has to withstand 3 throws (15 throws in total, since 5×3 is given) from the other poker players in order not to reduce his bankroll. So in this example 3 poker players hit 3 balls close to one of the \$10,000 amounts. They can now add 30,000 dollars to their bankroll, etc.

The game continues until all of the 15x throws have been thrown by the remaining poker players

No. 4 It can happen that you can lose up to 150,000 dollars in this rollerball game or win 150,000 with your 3x throws per poker player, so the bankrolls are distributed individually with plus or minus, depending on which poker player has positioned his rollerball attempt with his 3x attempts, close to the borders and the money amounts, each of the poker players has made his 3x throw attempts with the rollerball, so 18x attempts in total, and the bankrolls have been otherwise increased or decreased with new money amounts, so the poker game no limit Texas Holdem begins according to the standard principle with the newly calculated bankrolls

No. 5 The game now starts and every poker player has the opportunity to win an additional rollerball joker. This happens when he wins 3 games in a row. The poker player then receives 1x Joker rollerball. This means that the poker player can use this joker on another player and try to position an individual amount of his bankroll using the rollerball by throwing it close to the amount of money designated by the dealer, which is randomly generated by the scoreboard. In this case, the joker player hits the amount of money or close to 50,000 dollars, so the designated poker player has to give him 50,000 dollars from his bankroll.

No. 6 The game of no limit Texas Holdem continues to work as usual, only that the players try to get this joker card, called Rollerball, with a high probability, in order to then hit one of the bankrolls of the other poker players with the rollerball so that they can deduct it, the individual amount of money that has to be hit is variable and randomly generated by the scoreboard, see for example the ball throwing game Boccia

No. 672 Checktheducks

No. 1 You must try to use different colored ducks in this poker variant, there are 6 of them, which means that each poker player receives a randomly colored duck, red, green, blue, yellow, black, white (dealer), which he integrates individually into the poker game of limit Texas Holdem

No. 2 When the poker player sees the flop he can use his colored duck, this has the function of exchanging the first card from the flop during the poker game, the second colored duck, the second card, the third, the third card, the fourth, the 4th card (turn), the fifth, the last card, i.e. the river

No. 3 The Red Duck , the first card from the flop, the green duck, the second card from the flop, the blue duck, the third card from the flop, the yellow duck, the fourth card (turn) and the last, the black duck, the fifth card (river)

No. 4 A random carousel, which the dealer spins before the game, will decide which duck and its color, which of the 5 poker players will receive and can then use it during the game

No. 5 In this example, the first poker player uses his drawn red duck, which means that he has to exchange the first card of the flop, the game continues after the exchange as long as nobody wants to use his duck

No. 6 In the first round it is not necessary to use the ducks, only when the freak mode of the poker player to be played is activated, this variant can be used with the use of the duck function described here

No. 7 If the poker player, i.e. the 1, wins the pot by exchanging the card, he must pay an individual amount to the dealer, which is determined by a percentage number from 1-100, this number is decided by the drawing, by a rotating carousel

No. 8 The number that was spun is then deducted from the winning pot, per percentage value of the number and given to the dealer, who stores the amount and transfers it to the white jackpot duck, which stores all the winning amounts through the insertion process, which were determined by the ducks

No. 9 After a period of playing, the dealer throws the white duck, which has stored the collected percentage amounts (amounts of money given by the poker players), on the table and now the stored, so-called jackpot in this respect, can be cleared at the end of the hand through the short deck no limit Texas Holdem principle played from then on, i.e. the poker player wins the jackpot if he wins the hand while the white duck was placed on the poker table.

No. 673 Jamthechip

No. 1 In this poker variant of no limit Texas Holdem, you must note the following: the chips are beer token lids and you must try to fill these lids with your money on the back of the lid, which leads to the bet, before you have consumed enough beer over the month.

No. 2 If it is your turn and you want to place a bet, you must try to get as close as possible to the dealer's cards, the blank field of the flop, with your beer mat using a finger swipe, drop or flick with the chip. If you get close enough, you can place and bet the amount you have in your stack that you have previously determined yourself.

No. 3 The other poker players try to do the same. The person who flicks, swipes or drops close to the blank field of cards may place their bet with their beer mat (back, amount of money). Those who do not manage to hit the surface of the card flop, blank field, may not continue playing and may not place a bet in this round. They wait until the round is over. The other steps of no limit Texas Holdem must now be continued as long as they flick their bet amount of money beer mat close to or on the blank field or on the dealer's cards and correctly uncover the beer mat with the amount of money side. Otherwise they are eliminated from the round. They wait until a new round begins and carry out this described variant principle of flicking the beer mat (amount of money, with the correct amount side) on the dealer's cards or on the blank field of cards for the time being.

No. 674 Razerub

No. 1 Here you have to try to erase an image in a certain rhythm, which means that the app presents individual images and you try to wipe them away with your eraser, in this example the image contains a face of you that was taken via selfie, you now have to follow the vector point path with your finger to erase the contours, for example, and also wipe away certain areas where there are vector points that hold the area together, this means that you first have to erase the vector point paths with your eraser in order to get to the areas of the painted sections, if you have activated the vector points in these sections using soft, medium, hard touch, you can now try to erase the area with the separate colored eraser

No. 2 You receive individual points for each contour, vector point and painted section, which you use to get more time, meaning that you can top up your time account credit to erase the face in this game completely in the required time, so that you can skip to the next picture to erase it from the smartphone display.

No. 3 You must first pick up a correct colored vector point to change your eraser to its color in order to wipe away the same colored area, the face is divided into many different colors and areas, so touch the vector point with soft, medium, hard touch to change your eraser to the required color, use this eraser and keep the required time to wipe away the individual area, as slowly as possible to make the entire image of the picture disappear

No. 4 Next, the app will provide you with new images that have different colors and smaller, medium, large, mega areas, which you carefully try to erase with your eraser in the required time, according to the principle described, first collect the vector points that show contours, then use touch to activate the different colored vector points that are in the shapes and areas of the image in order to transform your eraser into the required color that is needed to erase the area. Once you have erased the required areas and sections of the photo or image, this area will now disappear and be replaced by a transparent color, which shows that you no longer need to erase this area.

No. 5 Use as many transparent areas as possible to get certain points, which you can then use to top up your time account credit in order to do it or master it in the required time. In addition, if you have placed the entire photo in transparency, then you will receive a perfect bonus point bonus. Collect these perfect bonus points to unlock more images or photos in order to get to the next level. In the next levels, more difficult areas appear, which you try to erase with your eraser.

No. 6 In Battle Mode, you compete against a randomly generated player from the Internet carousel. You have to erase the photo faster in the required time to beat your opponent and then challenge a new one. If you are in 1st, 2nd or 3rd place in the month with your score, you will receive a voucher for a photo that has already been erased, which you can have sent home as a real picture from the app as a gift.

No. 675 Nunchak

No. 1 In this game you try to use nunchakos to cut up different types of fruit so that they fit into the baskets, which means that different types of fruit appear on the smartphone display from the left, right, top, bottom and diagonal side of the display. These types of fruit also have different sizes, small, medium, large, mega and fall individually from the sides of the display through the smartphone display.

No. 2 You try to use your nunchakos to chop up these types of fruit so that they fit into the different baskets, this means that you chop up a large banana, for example, and then make 2 from it. From the existing 2, you now have to chop it up again. Once you have divided the banana into several pieces, drag and drop these chopped banana pieces with your finger into the corresponding banana basket to hold them there.

No. 3 There are tons of different types of fruit that need to be chopped up and collected in the fruit baskets. For example, if you have 6 different types of fruit in different sizes, chopped up into the smallest with the nunchakos, and collected the chopped up fruit with your fingers by dragging and dropping it into the appropriate fruit baskets, you can now do the following:

No. 4 You receive points for successfully chopping and pulling the fruit into the baskets. You must reach a required number of points in the level to unlock the next level. Once you have done this, you can now select a basket with the chopped fruit varieties and do the following with it. After you have finished, you will see the basket in the middle of the display. Now you have to move it in the required directions with the smartphone that are displayed. This means that if you pull the basket to the left, you have to move your smartphone to the left in the air. The smartphone and the game remember the direction in which you moved the smartphone using the gyroscope in the smartphone.

No. 5 Now, due to your movement, your chopped up fruit pieces appear on another smartphone display or on the left side of another player's smartphone. The other player must now put these together again to form normal pieces. This means that he uses drag and drop, for example, to put the 2 small pieces together to form a banana, 4 small pieces to form a medium one, 6 small pieces to form a large one and 8 small pieces to form a mega banana. If this player has used the opportunity to pull the small bananas together using drag and drop, i.e. on top of each other, he must now put the separate shapes that he has pulled together into a fruit basket. Once he has freed the smartphone display of the small banana pieces, i.e. pulled them together into the different and individual sizes, and placed them in the fruit baskets, he can now also move the individual fruit basket in the required direction with his smartphone when he has cleared the smartphone display. is shown, now according to the principle described above, these fruit shapes appear on another smartphone display or fellow player, from the direction previously moved, on his smartphone display, on

No. 6 The game is a massive multiplayer hack and slay game, where new types of fruit keep appearing if new ones are activated by new players, see the principle described, try to clear your display and collect points in order to activate a new level, which is produced by the other players of this game, as mentioned, through the different types of fruit, it continues until you have reached the required score, i.e. a required goal, how many levels you have to play depends on your skill, i.e. your destruction with the nunchaks against the types of fruit and pulling the chopped pieces into the fruit baskets, or at the end, the correct, required, movement of the fruit basket with the smartphone

No. 676 Memojiking

No. 1 You have to try to complete a digital map in different landscapes, that is, the digital map shows you goals that must be completed in the real world in order to find the game that was hidden by the app

No. 2 Use the navigation and radar function to hunt for the digital game in your area or surroundings, you don't know beforehand what kind of game it is

No. 3 If you have set off on the route with your smartphone, different routes are made available to you and presented to you, you collect different, colored and different emojis along the way, these show you the navigation, as well as the route guidance

No. 4 When you arrive at the place where the game is, the smartphone will light up an alarm through the radar. You must now position the camera in the position where the illuminated point on your radar is located. This means you scan the position and, if you are lucky, the digital game will appear on the smartphone screen. You can now take part in this game live and in real time or add it as a checkpoint level to your level inventory and continue playing at home afterwards.

No. 5 Before you can play the game, you must check whether you have collected enough colored, different and diverse emojis, because only then will the digital game be activated on your smartphone display

No. 6 If you have collected enough colored, different and diverse emojis on the different paths to the destination of the game, you can use your digital game that now appears on the screen

No. 7 You must also move the smartphone screen, where the game is displayed, by soft, medium hard touch from the puzzles that block the display to each other touch to give the display a clear view to make the game visible

No. 8 Once you have made the game visible, the game starts, which means that you try to dissolve the collected colored, different and diverse emojis in the bubblebubble principle (see game principle), or to connect them to each other, next to each other and one below the other with the same emojis in order to create a connection, which means that the connection of the same emojis in the same color and shape and facial expression causes a dissolution, try to connect all the collected emojis that appear on the smartphone display with each other and thus ultimately dissolve them, the aim is to remove all the emojis collected earlier on the way to the destination, and there are quite a few, from the smartphone display, you get points for this, with these points you can unlock other places and environments on the digital map to conquer them

No. 9 For each area you have completed in the game, you will receive a flag that you can place on the area or surroundings to inform other players that you hold the record for points at that location and that this is held by you in that location or area. If a player in the game becomes aware of your flag, he can take the same route and visit the location to break the points record in order to place his flag at that location.

No. 10 Scan the destination and save the game on your smartphone in your level list, then call it up again at home in chill mode and comfortably recall the level and then play it either on the smartphone or your TV connected to the smartphone

No. 11 Collect the memojiking games hidden by the app on your digital map in the real world. Collect enough to start the game at home or on site. You get points for each level you pass. You collect these points and then exchange them for emojis that you can hide on the digital map for your friends or fellow players to generate new levels for. No. 12 Play through the levels you have collected live on site or at home. After each successfully passed level, the app generates a new one and hides it on your digital map for you to find, depending on which country or area you are currently in. Go on a search and find the new levels to continue playing the game.

No. 13 Try to keep moving and play through the extraordinary levels that are generated for you from Google Maps, true to the original, according to the principle described. In the points ranking you will become the next memojiking.pl master player who conquers many places and areas in the real and digital world with his flags. No. 14 Invite your friends to the next real memojiking duel at home, and try to play the games or

Play through levels together to get new emojis, which means that you get points for each level you pass, look for new levels in the real world to get new points after completing them, exchange the points on memojiking to get new emojis, which you then hide on routes in the real world for other players to find and play with

No. 677 shopping spree

No. 1 You have to try on an octagon (8x sides) table, per side try in this variant to purchase food shops using cards, each side contains several, small, medium, large, mega - shops in card form, this means that you have an LED line (band) around the octagon (8x sides) that randomly triggers a light after the selection button

No. 2 The light rotates around the octagon (8x sides) and randomly, a point lights up (see wheel of fortune) that stops on one position, on the area, on one side, in this case on a grocery store called Bidle, you can now purchase this property by buying cards and try, when it is your turn again, to buy the next property grocery store, either on the same side and the same area or on another side with a different area of the octagon

No. 3 On each side of the octagon, there are different properties that can be purchased. In this case, you have previously purchased the grocery store picture on the first side of the octagon. If you are lucky, the light point will stay on the first side again. If the light point falls on the middle field of the grocery store, you can purchase this by purchasing cards. Try to buy all formats to purchase the entire area. If you have purchased all card formats, in this case small, medium, large, mega with the money you received at the beginning of the game, you will receive the completed property.

No. 4 You will receive \$300 in addition to your balance for each complete randomly rotated light point round that you have activated with a button. There is also an integrated wheel of fortune card, with which you can draw special cards that can be purchased if the light point lands on the wheel of fortune field.

No. 5 The other players (4 in total) also try to get a completed property or try to exchange their acquired cards with them in a trade or to manage the property in conjunction with them, which is divided into 4 cards in percentage terms, either 3 equal to 75% and the last to 25%, etc. In the process, each property that the player comes across has to pay rent, only when they own all 4 cards from one area, one side, can they build buildings on them and receive more rent, in this case for the individual 4 cards won.

No. 6 So it is best to try to acquire all 4 cards (32x in total) of an area or one side of the octagon (8x sides) in order to build buildings on it and receive even more rent for it, or exchange the area or side with your trading partner, i.e. the other player, on a percentage basis in a fair manner. There are also 2 stacks of cards in the middle that must be drawn randomly by the light point when it falls on them. These contain special effects to your advantage or disadvantage.

No. 7 Each player tries to get a completed property in order to attach buildings to it in order to receive more rental income from it or he collects several small, large, medium or mega cards from the different areas.

sides of the octagon (8x sides) and receives normal rental income, depending on which card the other player now appears on through the light point

No. 8 So play according to a similar principle to Monopoly and become the property shark of the Octagon with your small, medium, large or mega businesses (property cards) and create a larger monetary value for yourself through the rental income. With this monetary value you can pay other rents from other players and also purchase new buildings on your areas or sides and their properties. The one who goes bankrupt and has no money left or.

Anyone who cannot pay the rent from the players is eliminated from the game

No. 678 Groveon

No. 1 in this poker variant of no limit Texas Holdem, you must bet the following to participate, which means that every poker player gets a Bluetooth Alf Box attached to his poker seat

No. 2 These Bluetooth sound boxes are connected to individual YouTubers who can watch the live poker game live on the Internet

No. 3 The Youtubers can participate live in the action of the live poker game using the Poker PutIn button, which means that, for example, one of the 6 Youtubers to play chooses a poker player and connects to the Bluetooth Alf Box, and can now give his tips through his language, which is output by the Bluetooth Box, which the poker player can either follow or reject live at the table.

No. 4 The Youtuber can also play live digitally, which means that he can play his bets on the live button Putin in the same mode as the live poker player who is playing. He basically transfers the amount to the stakes, plus the stake of the poker player, which is then displayed alongside in the live session, so the Youtuber can play the round with his favorite poker players and play against the other 5 Youtubers who follow the same principle, play, bid and either lose everything or win everything in the round, namely the pot.

No. 5 Each of the 6 poker players to play receives a Bluetooth Alf Box with which they are connected to the live YouTube Poker selected players.

With this connection it is possible to change the entire game or to disturb or make the other players nervous, to humiliate them or encourage them with their live conversation, and ultimately to customize the entire game and view it from a different perspective.

No. 6 During the live poker game, you can and must exchange the Bluetooth Alf sound boxes with the dealer's call or randomly rotated sound carousels with the other poker players in order to get an improved variation of it and magically change the game in the future

No. 679 Hitdog

No. 1 You must try to catch a dog that steals a newspaper from outside your house. This means you must chase him on your bicycle and lure the newspaper or newspapers away from him and return them to the place where they were lying.

#2 Try to complete the levels from your original location (see Google Maps selection) and get all the stolen newspapers back from the dog to put them back in the right places where they were stolen.

No.3 For every newspaper you place in the right place on the house, you get points that you can use to strengthen your bike, because with each level, the run behind the dog becomes more difficult and you have to face and overcome different passages and obstacles to finally catch up and overtake the dog.

No. 4 The breed of the dog changes from level to level, so you must always be on the alert, constantly improving your bike and adapting it to the conditions of the levels, the game is timed, try to catch up with the dog in the required time and take the newspapers from him, bring them back and then catch up with the dog again when he has fetched new newspapers again.

No. 5 If you manage to return all the newspapers to their place, you have passed the level. If you do not manage to do so in the required time, you have to start the cone again from the beginning.

No. 6 Finally, when all the newspapers have been returned to their place, they will have the opportunity to catch the dog, this happens when they collect and charge the necessary bonus along the route of the levels, in this case a net or a lasso, this bonus must be constantly charged when chasing the dog, these bonuses are scattered along the routes of the levels and can be collected accordingly, fill up the charging bar indicator and in this case use the net or lasso to catch the dog at the end of returning the newspapers.

No. 680 ArrestthePresident

No. 1 In this game you have to free the president of an individual country, which means that you have to free him from custody, this happens when you free him from prison No. 2 In order to free the president from prison you have to convince the court to acquit him and release him No. 3 The court needs important evidence for the acquittal and the dropping of the charges, you have to gather this

evidence first, this happens when you go on a search and find important letters that are scattered around your country in order to complete the unfinished passages of the file for the acquittal

No. 4 You go on a search and a great adventure that is full of tasks that you have to master in order to get the required letters that are important for the missing passages of the file in order to complete them so that you can force your president to be acquitted in court. No. 5 You have a radar that shows you a route that you have to run and when you collect the letter at the point that the radar

shows you, you have run the virtual route that is connected to reality, which means that you have to collect real kilometers in the real world for your pedometer and charge it up to integrate this into the virtual game so that your character, who is controlled from an ego perspective, can be set in motion.

No. 6 You now have the opportunity to control your character and search for the important and essential letters that have been scattered and hidden in your country. You must overcome various passages on the way and in the search for these letters, which means in the best Park Cour manner and ego perspective, you must find the letter in a certain time through the radar and try to find it in cities, villages, forests and other environments.

No. 7 If you have overcome the soft, medium and hard passages on the way to the important letter, you must do this within a set time, otherwise you will start again at the beginning of the action and must expect that your pedometer will have to be recharged, so use your patience and strength, especially with more difficult passages, and calculate how much you will have to overcome the individual difficulty. No. 8 If you have managed to find a letter and reach it with your collected steps, you can collect it and save it in the file and put it in the place that the passage absolutely needs to make sense, to bring about the correct articulation with the completion and linking of the individual and various other passages, to work with it and create a dictation from it, to convince the jury and the judge in court and the prosecution to make the wrong decision and ultimately enable the acquittal of the President.

No. 681 VMOS

No. 1 You choose a music layer using your music program, load a song into it and select your music layer for further processing. No. 2 Try to set colored vector points at the points of the beat (layer), i.e., top, bottom, diagonal, vertical. Once you have set your individual vector points, the program code follows, which you implement in each vector point when you click on it. No. 3 Once you have set and written your program code into the colored vector points, you can now load a new layer and then merge the vector points together using line links. A spider web-like undergrowth is created. No. 4 You place this undergrowth on a globe similar to the earth and then pull it over in 3D form. The lines that are now on the globe have a special meaning and function, which means that you can now let information run through them. No. 5 If an information line hits a vector point, this vector point can receive and interpret this information and use this as save a folder and make it available to them visually, which means that with a click on the vector point, they receive the necessary information and have it visually displayed as a folder

No. 6 The trick is that you can feed the information lines with your own information via stream by clicking on them and then attaching them. In addition, your stream, which you can start, is then transferred to other vector points and your information from the lines, check the code that is hidden behind them. If one piece of information fits another, the information is implemented in the vector point and is created visually as a file folder and can be displayed again. You can now display your vector points as a file and drag and drop them together if it has been checked whether the programming code is linked to each other. No. 7 Ultimately, you can use this VMOS Visual Music Operating System as the basis for a hardware-controlled system and thus create an interface that you can use safely in the future and avoid being slowed down by hack attacks.
